Guideline 12: If the Results of Previous Studies Are Inconsistent or Widely Varying, Cite Them Separately A gripping and revealing first-hand account of one family's experience in the Exclusive Brethren community in New Zealand. Ngaire Thomas grew up, married and raised her children within the Exclusive Brethren church in the Palmerston North area. In plain, non-judgemental style, Ngaire describes life inside this community with its strict rules. She says: 'By the time I was nine, I had developed an independent spirit . . . [which] usually meant that a person had begun to think for themselves rather than obeying the M.O.G. [Man of God] - an undesirable trait that needed to be dealt with.' Behind Closed Doors tells of the struggles Ngaire and her family went through in order to remain within this close but challenging community. She and her husband Denis, a very devout man, had a strong and committed marriage, raised five children and attempted to live a good life within the church. However they were eventually excommunicated and went to live 'on the outside'. Ngaire describes the trauma of adjusting to life on the outside and its devastating effects on her children. This is a fascinating window into a world that few of us will ever know - told by an intelligent and compassionate woman. Policy Patrons offers a rare behind-the-scenes view of decision making inside four influential education philanthropies: the Ford Foundation, the W. K. Kellogg Foundation, the Bill & Melinda Gates Foundation, and the Eli and Edythe Broad Foundation. The outcome is an intriguing, thought-provoking look at the impact of current philanthropic efforts on education. Over a period of several years, Megan E. Tompkins-Stange gained the trust of key players and outside observers of these four organizations. Through a series of confidential interviews, she began to explore the values, ideas, and beliefs that inform these foundations' strategies and practices. The picture that emerges reveals important differences in the strategies and values of the more established foundations vis-à-vis the newer, more activist foundations—differences that have a significant impact on education policy and practice, and have important implications for democratic decision making. In recent years, the philanthropic sector has played an increasing role in championing and financing education reform. Policy Patrons makes an original and invaluable contribution to contemporary discussions about the appropriate role of foundations in public policy and the future direction of education reform. An inside look at the politics of book reviewing, from the assignment and writing of reviews to why critics think we should listen to what they have to say Taking readers behind the scenes in the world of fiction reviewing, Inside the Critics' Circle explores the ways critics evaluate books despite the inherent subjectivity involved and the uncertainties of reviewing when seemingly anyone can be a reviewer. Drawing on interviews with critics from such venues as the New York Times, Los Angeles Times, and Washington Post, Phillipa Chong delves into the complexities of the review-writing process, including the considerations, values, and cultural and personal anxieties that shape what critics do. Chong explores how critics are paired with review assignments, why they accept these time-consuming projects, how they view their own qualifications for reviewing certain books, and the criteria they employ when making literary judgments. She discovers that while their readers are of concern to reviewers, they are especially worried about authors on the receiving end of reviews. As these are most likely peers who will be returning similar favors in the future, critics' fears and frustrations factor into their willingness or reluctance to write negative reviews. At a time when traditional review

opportunities are dwindling while other forms of reviewing thrive, book reviewing as a professional practice is being brought into question. Inside the Critics' Circle offers readers a revealing look into critics' responses to these massive transitions and how, through their efforts, literary values get made. Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterpiece of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime. This book offers an inside look at how to publish scholarly articles, book reviews, grants, magazine articles, and commercial and scholarly books. The task of researching and writing a literature review is complex. This text provides comprehensive, practical guidance on the process of researching a range of relevant literature on a subject, then planning and writing a literature review. *The Applied Linguistics Review* is a peer reviewed annual publication. It brings together new empirical and theoretical research and serves as a testing ground for the articulation of original ideas and approaches in the study of real-world issues in which language plays a crucial role. Such issues range from aspects of the linguistic and communicative competence of the individual such as bilingualism and multilingualism, first or second language acquisition, literacy, language disorders, to language and communication related problems in and between societies such as linguistic discrimination, language conflict, communication in the workplace, language policy and language planning. With roots in eugenics and other social-control programs, modern American environmentalism is not always as progressive as we would like to think. In *The Ecological Other*, Sarah Jaquette Ray examines the ways in which environmentalism can create social injustice through discourses of the body. Ray investigates three categories of ecological otherness: people with disabilities, immigrants, and Native Americans. Extending recent work in environmental justice ecocriticism, Ray argues that the expression of environmental disgust toward certain kinds of bodies draws problematic lines between ecological “subjects”—those who are good for and belong in nature—and ecological “others”—those who are threats to or out of place in nature. Ultimately, *The Ecological Other* urges us to be more critical of how we use nature as a tool of social control and to be careful about the ways in which we construct our arguments to ensure its protection. The book challenges long-standing assumptions in environmentalism and will be of interest to those in environmental literature and history, American studies, disability studies, and Native American studies, as well as anyone concerned with issues of environmental justice. Two preeminent legal scholars explain what tort law is all about and why it matters, and describe their own view of tort's philosophical basis: civil recourse theory. Tort law is badly misunderstood. In the popular imagination, it is “Robin Hood” law. Law professors, meanwhile, mostly dismiss it as an archaic, inefficient way to compensate victims and incentivize safety precautions. In *Recognizing Wrongs*, John Goldberg and Benjamin Zipursky explain the distinctive and important role that tort law plays in our legal system: it defines injurious wrongs and provides victims with the power to respond to those wrongs civilly. Tort law rests on a basic and powerful ideal: a person who has been mistreated by another in a manner that the law forbids is entitled to an avenue of civil recourse against the wrongdoer. Through tort law, government fulfills its political obligation to provide this law of wrongs and redress. In *Recognizing Wrongs*, Goldberg and Zipursky systematically explain how their “civil recourse” conception makes sense of tort doctrine and captures the ways in which the law of torts contributes to the maintenance of a just polity. *Recognizing Wrongs* aims to unseat both the leading philosophical theory of tort law—corrective justice theory—and the approaches favored by the law-and-economics movement. It also sheds new light on central figures of American jurisprudence, including former Supreme Court Justices Oliver Wendell Holmes, Jr., and Benjamin Cardozo. In the process, it addresses hotly contested contemporary issues in the law of damages, defamation, malpractice, mass torts, and products liability. Almost unheard of until then, the Exclusive Brethren was suddenly spending up big in election advertising in support of conservative political parties. But its members were shy to the point of paranoia about who they were - preferring, as they said, to 'fly under the radar'. Brethren members assiduously lobbied politicians, but did not vote. And they were very close to then prime minister John Howard. What exactly was their interest in politics? Why did their activism suddenly blossom almost simultaneously across the world, from Canada and the United States to Sweden and Australia? And how did a small, fringe group whose values are utterly detached from those of most Australians infiltrate the highest office in the land? Michael Bachelard, formerly an investigative reporter at *The Age* and now at *The Sunday Age*, has been uncovering the facts about this secretive sect for more than two years. The results of his inquiries are the most comprehensive book ever written about the Exclusive Brethren. It's a fascinating story of politics and power. But it's a very human story, too - of damaged lives, that broken families, and of hurt and anger that stretches back decades. "Over 15 chapters, Dunaway transforms what we know about icons and events. Seeing Green is the first history of ads, films, political posters, and magazine photography in the postwar American environmental movement. From fear of radioactive fallout during the Cold War to anxieties about global warming today, images have helped to produce what Dunaway calls "ecological citizenship," telling us that "we are all to blame." Dunaway heightens our awareness of how depictions of environmental catastrophes are constructed, manipulated, and fought over"--Publisher info. Women brewed and sold most of the ale consumed in medieval England, but after 1350, men slowly took over the trade. By 1600, most brewers in London were male, and men also dominated the trade in many towns and villages. This book asks how, when,

and why brewing ceased to be women's work and instead became a job for men. Employing a wide variety of sources and methods, Bennett vividly describes how brewsters (that is, female brewers) gradually left the trade.
