In Drive-Thru Dreams, Adam Chandler explores the

inseparable link between fast food and American life for the past century. The dark underbelly of the industry's largest players has long been scrutinized and gutted, characterized as impersonal, greedy, corporate, and worse. But, in unexpected ways, fast food is also deeply personal and emblematic of a larger than life image of America. With wit and nuance, Chandler reveals the complexities of this industry through heartfelt anecdotes and fascinating trivia as well as interviews with fans, executives, and workers. He traces the industry from its roots in Wichita, where White Castle became the first fast food chain in 1921 and successfully branded the hamburger as the official all-American meal, to a teenager's 2017 plea for a year's supply of Wendy's chicken nuggets, which united the internet to generate the most viral tweet of all time. Drive-Thru Dreams by Adam Chandler tells an intimate and contemporary story of America—its humble beginning, its innovations and failures, its international charisma, and its regional identities—through its beloved roadside fare. Studies have shown that obese children are more likely to become obese adults and are likely to suffer with numerous health consequences like coronary heart disease, high blood pressure, and Type II diabetes, among others. Studies also indicate that television viewing and exposure to advertising for food products influences children's attitudes toward, food preferences and food purchase requests for foods with low nutritional value. It is important to better understand the role of media in childhood obesity and to learn how media may be used to address this issue in a positive way. This book focuses on communication and media research that can have an impact on reducing childhood obesity. Emphasis is placed on topics related to how the media communicate health-related messages about food, nutrition and diet that influence childhood obesity. Particular emphasis is on the new media, given the fact that media now have more central roles in socializing today’s children and youth than ever before. Advertising and marketing messages reach young consumers through a variety of vehicles – broadcast and cable

television, radio, magazines, computers through the Internet, music, cell phones – and in many different venues – homes, schools, child-care settings, grocery stores, shopping malls, theaters, sporting events, and even airports. In addition, given the disparity in obesity rates between children of color and the general population, special attention is given to research on media targeting these populations. This book studies food practices in contemporary India by situating them in their political, economic and socio-cultural contexts. Widespread in scope, it explores the use of food for exercising power, as a marker of difference and as a potent symbol of expression of identity; studies how food practices are intimately connected to the corporeal self and the fashioning of the self; and examines food safety and its nutritional aspects and notions of hygiene and edibility that are culturally specific. The book looks closely at the political and economic institutions that are responsible for the production and distribution of food, and the role of the state and global policies that influence agrarian policies at home. It discusses meat-eating in India; fermented food from North-East India and how it does not fall within the representation of 'Indian' food; the ideas of health and food safety that inform the making of Bengali sweets; the growing role of fast-food eateries and blog-writing as middle-class identity projects; the nature of colonial discourse on what is an adequate diet for famine victims; who should grow food; and the importance of the concept of food sovereignty.

Tingleville is a transformational romantic love story about two young adults. Joe is a dynamic lawyer who is recovering from the pain of a failed marriage. His ex-wife Mary Ellen was a sexual connoisseur who kept Joe so whipped that he was blind to her adulterous ways until she was able to replace him with a richer man. After a two-year vengeance filled sexual rampage through many of the most desirable ladies of Richmond, Joe realizes that he will never find love between silken sheets. Only by facing his fears and being semi-celibate, can he hope to find the perfect person to love. Lucy, an assistant professor of law at Richmond University, is also recovering from a failed marriage. Her pain was both physical and mental because her marriage to her high school sweetheart ended by annulment while she was still recovering from the first and last beating her husband gave her. After two years as an associate at a major Chicago law firm and another couple in private practice, she abandoned the courtroom for the classroom. The loud ticking of her biological clock and the emptiness of her life has her thinking of finding someone to love. A conference that neither wanted to attend resulted in their paths crossing and becoming intertwined. After a slow start, they race to see if the emotions they

feel are real. One slow dance was enough to ignite fires of passion and put both of them on a quest for understanding. Joe hoped to find a woman to love that would love him exclusively, and be as skilled in the arts of love as his former wife was. He sees potential in Lucy. Lucy's mother told her that sex was as natural an act for a woman as washing dishes or doing the laundry. According to Mrs. Bishop, sex was a chore. It was a woman's obligation to please her man and take her pleasure from the happiness of her husband. She assured Lucy that the act was more pleasurable for men than women. Lucy's first sexual experience and subsequent ones proved her mom correct. One dance with Joe proved her mom wrong and set her on a quest for the paradise named Tingleville.

Change management is not just affected globally by environmental and social conditions, including political and technological changes, but also through convergence, which helps conceptualize change over the past decades. The media industry, in particular, is being challenged by the rise of social media, the crisis of refinancing especially for quality news media, the 'misinformation epidemic', and the changing role of legacy media. The evolving nature of media usage and communication, the rise of produsage and influencers, and intermediaries and their personalized algorithmic content are also factors that impact the industry, along with data privacy and privacy management, and the "new responsibilities" of companies such as sustainability, agility and resilience, etc. This book focuses on permanent change management in the media and related industries. It provides insights into the most common and crucial phenomena of media and change management in general, while also revealing some more specific issues brought about by technical and social innovations. The authors expand the meaning of media management beyond the management functions within the industry to include the management of different media. The book

serves as a useful guide for researchers, students, and practitioners alike, as they are all affected by change processes.
