This volume queries the state and effect of the global
decentralization movement through the study of natural resource
decentralizations in Africa, Asia and Latin America. The case
studies presented here use a comparative framework to
characterize the degree to which natural resource
decentralizations can be said to be taking place and, where

possible, to measure their social and environmental consequences. In general, the cases show that threats to national-level interests are producing resistance that is fettering the struggle for reform. Study conducted in the Bīrbhūm District of West Bengal, India. Taking as its starting point the major issues of democracy which are the ongoing concerns of every liberal Western political system, this volume offers a wide-ranging review of democracy in the European Union. It treats the EU as a new type of political system within the tradition of parliamentary democracies, a system which is neither federal nor intergovernmental, and which consequently has unique problems of how to handle democratic requirements. Part One deals with the two major challenges of interest articulation in the EU, political parties and lobbying. The second part discusses how democracy becomes the key element in the linkage between the EU and its member states, focusing on France, Italy and Belgium where the r Behn examines the weaknesses in our current systems of accountability for finances, fairness, and performance, and suggests a new model of accountability for public management. This comprehensive volume discusses the various challenges of establishing and maintaining accountable and democratically controlled intelligence services, drawing both from states with well-established democratic systems and those emerging from authoritarian systems and in transition towards democracy. Since the 1970s there has been a widespread movement from authoritarian to democratic rule among developing countries, often occurring against a backdrop of severe economic crises and the adoption of market-oriented reforms. This book analyzes this relationship, addressing a variety of questions. Democratic evaluation brings a way of thinking about evaluation's role in society and in particular, its role in strengthening social justice. Yet the reality of applying it, and what happens when it is applied particularly outside the West, is unclear. Set in South Africa, a newly formed democracy in Southern Africa, the book affords an in-depth journey that immerses a reader into the realities of evaluation and its relation to democracy. The book starts with the broader introductory chapters that set the scene for more detailed ones which bring thorough insights into national government, local government, and civil societies' experience of evaluation, democratic evaluation and their understanding of how it contributes to strengthening democracy (or not). A teaching

case, the book concludes by providing guiding questions that encourage reflection, discussion and learning that ultimately aims to inform practice and theory. As the power and scope of the European Union moves further, beyond traditional forms of international cooperation between sovereign states, it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries. The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision-making: opinion formation, interest intermediation, national executive decision-making and national parliamentary scrutiny. From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system. They conclude that more changes are seen within the state-centric than in the societal-centred processes of democracy, thus the public seems to have been 'left behind' in the process of constructing Europe. The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union. This book will be of great interest to academics and researchers of political science, public policy and international relations, as well as those interested in European studies and comparative politics. The dawn of the twenty-first century heralded an apparent change of fortunes for most sub-Saharan African economies, with annual growth averaging over 5% for fifteen years. However, this was not accompanied by structural transformation: poverty, food insecurity, unemployment and inequality persist. Structural transformation has not been - and indeed cannot be - delivered by market forces and neo-liberal economic policies; it requires a state committed to development, and to achieving it in a democratic way. To what extent do the countries of Southern Africa exhibit the characteristics of such a developmental state? What steps, if any, do they need to take in order to become one? The book answers the questions with respect to South Africa, Botswana, Namibia, Zimbabwe, Angola and Malawi. Godfrey Kanyenze and his colleagues have assembled a distinguished team of writers to take the temperature of the regional political economy, and chart a path for its future development. In 2020, America will

elect a president, deciding not just the trajectory of its national politics but the future of American foreign policy. Will the Alt-Right, nationalist, and mercantilist approaches to international trade that characterized Donald Trump's rise to power maintain its hold? Or will the "national security establishment" ultimately prevail, continuing the illusion of the indispensable nation? In *A Democratic Foreign Policy*, renowned IR scholar Ned Lebow draws upon decades of research and government experience to reject both options and set forth an alternative vision of American foreign policy, one based on a tragic understanding of life and politics. Lebow challenges the assumptions of establishment voices on both sides of the aisle, and offers a probing rethinking of America's role in the world to disrupt the inertia of a bipartisan ideology that has dominated foreign policymaking since the days of Truman. Emphasizing the importance of America's core values for shaping domestic and foreign policies, *A Democratic Foreign Policy* provides a vision and blueprint for a new congress and president to reorient America's relationship with the world. This book discusses political controversies involved in global biodiversity policy, and the practical opportunities that are opened up in solving them through increased citizen participation and democratic deliberation. It examines the emerging practice of deliberative global governance and its political consequences. The collection focuses on the intersection of global biodiversity policy and the promise of deliberative democracy. In doing so, it examines how new discursive logics emerge in global citizen deliberation that might destabilize the impasses encountered in biodiversity negotiations, how a "global citizens' voice" emerges in deliberative processes despite the dominance of national institutions in the lives of those citizens, the most effective and innovative ways to amplify the results of large-scale deliberations to policy makers and broader audiences, and how future citizen deliberations can be designed to make them fair, feasible and consequential processes, in general and for biodiversity issues in particular. This highly original contribution to the field provides theoretical discussions, empirical analyses and local experiences of biodiversity policy, making it an invaluable resource for students and scholars of environmental politics, governance and sociology, particularly those interested in deliberative democracy, citizen

participation and biodiversity. The book offers a novel and original synthesis of work in modern political theory and in political science and political economy to offer a theory of democratic justice, considering society as a social contract. This book presents theoretical discussions and practical examples of Action Research from Scandinavia, Latin America and Africa, primarily dealing with how to combine nature conservation and management with local democratic community development, seeing the renewal of Commons as a way to transcend the present dichotomy between these two dimensions. This book examines the development of social democratic parties in Western Europe and suggests that instead of viewing a single model, in the past it was more accurate to consider a Northern and Southern European version. Each model varied in its characteristics, yet each retained an adherence to the same core values. But now a 'new' version of social democracy is emerging that is characterised by an advocacy of the tenets of neo-liberalism. Using case studies from Florida and the Caribbean region, this book summarizes the state of coral reef conservation today. The question this book answers is, what is the best way to protect the vulnerable coral reefs, with an ever-worsening climate crisis? The book's contribution is looking closely at people's avenues to participate in coral reef management, and how the public is increasingly making their voices heard in the management process. Why has democracy flourished in the Federal Republic of Germany despite that country's troubled past? Exhaustive research in German historical archives illuminates the pivotal role played by the veterans of the Christian trade unions of the Weimar Republic, the only group to participate in both of Germany's most successful political experiments after 1945, a 'Christian Democratic' party to unite Catholics and Protestants, and unified labor unions for workers of all political outlooks. They perceived that feuds between the religious confessions and competition among three rival labor federations had greatly facilitated Hitler's rise, and they resolved to bridge both chasms. Playing an influential role on the left wing of the CDU from the 1950s to the 1970s, Christian laborites alleviated class conflict through new welfare programs and laws to grant workers a powerful voice in management decisions. They took the lead in forging the distinctive 'German Model' for labor relations. Pamphlet on the theoretical and administrative

aspects of workers self management, with particular reference to the experience of Yugoslavia - considers the case for limited workers participation, etc. Bibliography pp. 45 to 53. This book explores the nascent and complex terrain of democratization and peaceful political transitions in Africa. It analyzes major election-related conflicts across the continent, explains their root causes and major consequences, and offers measures that may be undertaken to prevent, manage, and resolve election-induced conflicts. It charts a path for the future political and democratic stability in Africa. Democratic procedures are often inefficient; efficient structures tend to be undemocratic. Focusing on Germany and Great Britain as case studies, this book explores the meaning and compatibility of efficiency and democracy in the project of modernizing advanced consumer democracies. Shows that current elitist theories are based on an inadequate understanding of the early writings of democratic theory and that much sociological evidence has been ignored. A timely new perspective on the impact of populism on the relationship between democracy and public administration. Since 2001 The Democratic Republic of Congo has been engaged in a three-fold transition process towards liberalisation, democratisation, and peace. Throughout this process, external actors (donors, international financial institutions, the UN system, aid agencies) have played a leading role, effectively setting the orientations and modalities of this transition, including their institutional dimension. Congolese actors have not been passively subjected to this process, however, but have potently shaped it in various ways. This book investigates the relationship between international aid partners and various Congolese actors since 2001. It examines this relationship as an aspect of the state reform process, with particular reference to the administration. Stylianos Moshonas argues that the pace and nature of reform has been compromised by the contradictions inherent within the process itself, as advocated by international partners, and by the ability of Congolese power holders to accommodate and co-opt such reforms in line with their own political strategies. Rather than framing aid relations as the outcome of the oppositional points of view of donors and Congolese actors, this book presents a systematic focus on the compromises and accommodative characteristics that aid politics have coalesced around, as well as the contradictory positions donors have found themselves in. Compilation of

conference papers and articles on various experiments in workers self management, workers participation and workers control in Israel, Yugoslavia and Norway - includes a bibliography pp. 153 to 157. Conference held in Santa Barbara 1971 October.

Democratic Institutions and Practices is the second study carried out under the Democratic Audit of the UK. This volume explores the formal institutions and processes of the liberal democratic state: including the executive, elections, parliament and the civil service. Why is the search for democratic renewal so elusive? This book examines both the political and policy implications of efforts by the centre-left to transform democracy. This is a story not only about democratic change, but also the identity crisis of centre-left political parties. The book offers a fresh critique of the Big Society agenda, and analyses why both left and right are searching for democratic renewal. Drawing on high-profile interviews and examining an in-depth series of comparative cases, the book argues that the centre-left's search for democratic renewal contains a range of policy and political aims, contradictions and tensions. It will be of interest to students, academics, researchers, interest groups and policy analysts interested in consultation, democratic renewal, labour politics, and Australian and British politics. This book describes in detail the attributes of learning communities and how these characteristics help students acquire a sense of moral responsibility and commitment to fellow students. Clifford H. Edwards provides an account of how schools fail to satisfy student needs and thus promote discipline problems. With democracy on the rise worldwide, questions about "transition" are rapidly being replaced by questions about "consolidation." How can leaders provide for a stable democracy once a nation has made its initial commitment to the rule of law and to popularly elected government? In *The Politics of Democratic Consolidation*, a distinguished group of internationally recognized scholars focus on four nations of Southern Europe—Spain, Portugal, Italy, and Greece—which have successfully consolidated their democratic regimes. Contributors: P. Nikiforos Diamandouros, Richard Gunther, Hans-Jürgen Puhle, Edward Malefakis, Juan J. Linz, Alfred Stepan, Felipe Agüero, Geoffrey Pridham, Sidney Tarrow, Leonardo Morlino, José R. Montero, Gianfranco Pasquino, and Philippe C. Schmitter. This book applies various theoretical tools to explore the advantages and disadvantages of performance

management systems, the ways in which they can be improved, and the strategies through which they can be designed and integrated into the policy making process. By providing both theoretical insights and practical applications, it offers a unique perspective. Using four methods of research that have been rarely applied in the performance management literature: formal (game-theoretical) modelling, operational management, new institutionalism, and cross country statistical comparisons based on international data sets, the book illuminates different aspects of performance management systems in the public sector. It offers an integrative theoretical framework for explaining and designing such systems and their integration into the policy making process, and will open up new avenues of research, expose scholars and students to new methodological tools and equip public officials, politicians and citizens with practical methods for improving the performance of the public sector. "Spain is different" was a favourite tourist board slogan of the Franco dictatorship. Is Spain still different? This volume provides an original series of analyses of how politics in democratic Spain has developed since the remarkable success of the transition to democracy. Since the 1980s, democratic struggles have triggered constitutional reforms, elections, and other forms of political progress. This comprehensive volume offers refreshing perspectives on Africa's democratic renewal and will open up dialogue on the trends and trajectory of Africa's democratic future.
