Reeds Marine Deck 2: Crammer for Deck Officer Oral Exams Apr 05 2022 A no-nonsense study guide helping seafarers to pass their MCA or Flag State oral exams for Deck Officer qualifications. This handy revision guide is the one book that Deck Officer Cadets, Master and Deck Officers will want by their side when studying for the much-feared oral exams. Expert marine training director Simon Jinks strips back the masses of information to the core essential points that are easy to absorb and quick to remember when it comes to the oral assessment. The MCA Deck Officer (Officer of the Watch, Chief Mate and Master) syllabi cover a vast amount of information that candidates are required to understand and use in their oral exam, which for many presents a major stumbling block to qualification. While it inevitably takes a long time for candidates to build up this wealth of knowledge, this study aid is the perfect refresher, listing the key points and including helpful sample questions and worked examples on tidal working, radar plotting and more. Written in simple terms, this trusted crammer covers all the principal areas of the MCA's exam syllabus, including sections on business and law conventions, pollution prevention, responses to emergencies and distress signals. Clearly presented, it is packed with straightforward diagrams and flow charts, making it ideal for revising. This is an invaluable reference for all international STCW Deck Officer candidates, and covers both MCA and Flag State oral exams. It is also suitable for Near Coastal and Boatmaster apprentices, Workboat crew apprentices, Yachtmaster Offshores, Yachtmaster instructors, and fishermen going for their fishing licences on larger vessels, and for shore workers such as vessel superintendents, maritime managers and trainers. There is specific information for all vessels, with sections on smaller, code and domestic vessels.

Smoke Your Firefighter Written Exam May 14 2020 Most fire departments give a written examination as the first part of the testing process. Since there are usually an enormous number of candidates who apply for the position, difficult written examinations are an effective way to narrow the field. There is no excuse for a firefighter candidate to fail a written exam. Those who are committed to their goal will plan and prepare for the written exam to improve their chances of success. While there are other self-help books devoted to helping aspiring firefighters, they only provide questions and answers. These books are useless if you do not understand how to work out the problems. Smoke Your Firefighter Written Exam goes beyond providing sample questions and answers. It teaches the reader the basic rules and principles behind the questions; in other words, how to solve each complex problem. Each section begins with an overview of how to solve the problem. The reasoning behind the correct answer is presented in clear, easy-to-understand language. The reader will become proficient in: mathematics (word problems, geometry, addition, subtraction, multiplication); mechanical aptitude (gears, levers, pulleys, incline planes, screws); language (reading, spelling, grammar, vocabulary); perceptual ability; spatial relations; matching parts and figures; map reading. Illustrations are used throughout the book to teach basic principles and present problems to solve.

Marine Emergencies Jul 20 2023 An influential guide to maritime emergencies and the current strategies that can be employed to cope with the immediate after effects and ramifications of disaster at sea. Many mariners will at some point in their maritime careers become involved in one sort of emergency or another, while in port or at sea, whether it is a fire on board, a collision with another vessel or an engine failure threatening a lee shore. Actions to take in such incidents can be the difference between survival and catastrophic loss. This text provides a direct insight into some of the latest incidents and includes: case studies from emergencies worldwide checklists and suggestions for emergency situations. everything from fire and collision right through to the legal implications of salvage. David House has now written and published eighteen marine titles, many of which are in multiple editions. After commencing his seagoing career in 1962, he was initially engaged on general cargo vessels. He later experienced worldwide trade with passenger, container, Ro-Ro, reefer ships and bulk cargoes. He left the sea in 1978 with a Master Mariner's qualification and commenced teaching at the Fleetwood Nautical College. He retired in 2012 after thirty three years of teaching in nautical education. He continues to write and research maritime aspects for future works.

God's Quantum Vortex Jun 14 2020 The story evolves from the personal experiences of the writer, from his deep (forty years) research and discoveries of quantum cone vortex. Once into awareness, he reveals the techniques of connecting and triggering the act of God events. He formulates the mysteries of self-fate programming. He explains how the government, religion, finance, and science are interconnected for the first time in history. His research deep dives into the Bible, yoga meditation, wave-particle quantum physics, and into occult, the metaphysics. He is not just theorizing about life events; he is proactively changing the events in biblical proportions. He becomes the miracle creator by thought and by action, the trigger man, who can only relate to the higher dimensions and to cosmic intelligence. The formulas he writes may seem similar to previous theoretical physicists,

but they are his own concept, given the examples of his work and e-mail prior to the God's Particle/Boson announcement by Peter Higgs on July 4, 2012. The quantum cone vortex diagram and its connection to yin and yang with annihilation and creation, related to cosmic spiral sequence of four sixes, may seem absurd to earth's fourth-dimensional thinkers, but it is backed by facts by the author. His prediction of the next flood is backed by errors in time measured by Mayans and Nostradamus. Once a person is elevated to the vortex in quantum cone with zero weight / gravity and when time stops in quantum reality, then he/she will be able to be awarded with all possibilities to create or destroy. The writer imitates the out-of-the-box thinking of God, but he is not comparing himself to cosmic intelligence. He just uses the quantum energy (in form of dark and light energy he calls them Satan and God, respectively, for convenience). The examples are powerful and convincing. The reader should not just observe the author's human encounters to get to quick conclusions. It is a manual of how to think without fear. Once the fear is eliminated, the mind is open to deep into subconsciousness and to build the awareness, where all possibilities are unrestricted, and to rise to the sixth cosmic dimension, God.
