***Paradigms in Theory Construction Jul 20 2023 Within the field of psychology there is a proliferation of paradigms, theories, models, and dimensions without an underlying conceptual framework or theory. This conclusion has been reached by representatives of many different psychological specialties. In response to this inconsistency this book presents a hierarchical framework about important theoretical issues that are present in psychological thinking. These issues concern definitions of three major theoretical concepts in theory and practice: (a) paradigms, (b) theories, and (c) models. It focuses on defining, comparing, and contrasting these three conceptual terms. This framework clarifies differences among paradigms, theories, and models, terms which have become increasingly confused in the psychological literature. Paradigms are usually confused with theories or with models while theories are confused with models. Examples of misuses of these terms suggest the need for a hierarchical structure that views paradigms as conceptual constructions overseeing a variety of psychological theories and verifiable models.***

***Theory Construction and Model-Building Skills Jun 19 2023 "This book provides young scientists with tools to assist them in the practical aspects of theory construction. We take an informal journey through the cognitive heuristics, tricks of the trade, and ways of thinking that we have found to be useful in developing theories-essentially, conceptualizations-that can advance knowledge in the social sciences. This book is intended to provide the instructor with a useful source for helping students come up with***

*ideas for research and for fine-tuning the resultant theories that emerge from such thinking. An objective of this book is to move toward a needed balance in the emphases given to theory construction and theory testing"--*

***A Primer in Theory Construction Sep 10 2022***

*Self-determined Learning Theory Jan 22 2021 This volume brings together four semi-autonomous bodies of research (choice, self-determination, self-regulation, and self-management) to form a new theory of self-engaged learning entitled, Self-Determined Learning Theory. This theory explains why and how students self-engage. It identifies the factors that give students the sense of control over their learning that is needed for sustained, adaptive, and ultimately successful learning. It begins by describing the characteristics of disengaged learners, then describes and illustrates self-determined learning theory within both normal and special populations. It then examines the theory's predictive value across several special population contexts and then concludes with a critique of the theory's credibility and worth. Divided into three sections--theory construction, theory verification, and theory evaluation--this volume is organized using the four steps of a previous book, Learning to Theorize: A Four Step Strategy. Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance. Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing. Step 3 evaluates the credibility and worth of the explanation constructed in Step 2. Step 4 adjusts existing beliefs so they are consistent with the new theory. Although aimed primarily at leaders in special education, it should also appeal to researchers and scholars in psychology, educational psychology, and school psychology who are interested in the applications of self-regulated learning theory--in this case to special populations.*

*Primer in Theory Construction Jul 08 2022 A Primer in Theory Construction is for those who have already studied one or more of the social, behavioral, or natural sciences, but have no formal introduction to the way theories are constructed, stated, tested, and connected together to form a scientific body of knowledge. The author discusses scientific theories in general terms, but also addresses the special challenges of developing scientific knowledge about social and human phenomena. This Allyn and Bacon Classics Edition contains the complete text of the original copyright 1971 version, with new typography and page design.*

*Critical Perspectives on Open Development Feb 03 2022 Theoretical and empirical analyses of whether open innovations in international development instrumentally advantages poor and marginalized populations. Over the last ten years, "open" innovations--the sharing of information without access restrictions or cost--have emerged within international development. But do these practices instrumentally advantage poor and marginalized populations? This book examines whether, for whom,*

*and under what circumstances the free, networked, public sharing of information and communication resources contributes (or not) towards a process of positive social transformation. The contributors offer both theoretical and empirical analyses that cover a broad range of applications, emphasizing the underlying aspects of open innovations that are shared across contexts and domains.*

*Conceptualisation and Exposition Jul 16 2020 While the concept of the fictional character has been widely discussed at interdisciplinary level, a foundational theory of character creation is yet to follow. As a result, creative writing students and beginner writers refer to post-construction analysis, as well as the step-by-step advice often suggested by popular writing manuals. Aiming to fill this gap and at the same time reconcile approaches in writing and criticism, this book proposes a theory of character creation based on the in-depth analysis of the concept, as well its place within the narrative. The approach suggested herein consists of two interrelated stages: conceptualisation and exposition. Conceptualisation entails the in-depth understanding of what constitutes the fictional character, as well as the dynamics of its correlation with the reader, the author and its real counterpart, the human person; Exposition refers to the conveyance of such understanding on paper. Viewing creative writing as an art and craft, the author builds her theory on the notion that comprehension of the world and the concept of character itself is an essential prerequisite in order to construct consistent and believable fictional persons. Varotsi also introduces her four stages of creation: Observation, Perception, Empathy and Imagination to inspire a method of work according to which personal craftsmanship and artistry can be successfully combined with pedagogic technique.*

*Strategies for Theory Construction in Nursing Aug 21 2023 For all masters or doctoral courses on nursing theory or related to framework development for practice or research. For beginning graduate students in nursing and related disciplines, this text offers the clearest, most useful introduction to methods of theory development. It places nursing theory development in context, with a rich historical view that traces the field from its from its mid-20th century beginnings through contemporary and emerging issues. Present-day coverage includes both domain- and population-focused theories designed to specifically address the needs of clients served by nurses. Important additions in this edition include short reflections and critical thinking projects, as well as a new chapter on using knowledge development and theory to inform practice.*

*Formal Theory in Sociology Nov 19 2020 A group of renowned sociological theorists analyze why the attempts to make sociological theory formal in the 1960s and early 1970s failed. This becomes not only an unusual and interesting analysis in the sociology of knowledge, but several of the articles move to the level of analyzing the entire*

*discipline, explaining why positivism did not take hold and what are the distinctive characteristics of sociology as a discipline. Anyone interested in sociology as a discipline and more specifically sociological theory will find interesting analytical models.*

*Theory and Practice of Piano Construction Apr 24 2021 DigiCat Publishing presents to you this special edition of "Theory and Practice of Piano Construction" (With a Detailed, Practical Method for Tuning) by William Braid White. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.*

*Retirement Portfolios Oct 11 2022 Retirement portfolio guidance for finance professionals Retirement is one of the most important parts of the financial planning process. Yet only two percent of financial advisors describe themselves as competent in retirement planning. Constructing a retirement portfolio is viewed as a difficult endeavor, and the demands facing financial advisors responsible for this task continue to grow. The pressures are particularly intense due to events such as the financial crisis and oncoming rush of retiring baby boomers. It is imperative that financial advisors be equipped and ready to create appropriate retirement portfolios. That's why Michael Zwecher-a leading expert on retirement income-has created Retirement Portfolios. Examines how portfolios should be prepped in advance so that the transition from "working" portfolio to retirement portfolio is smooth and seamless Outlines how to create a portfolio that will provide income, continue to generate growth, and protect assets from disaster Details the differences in managing a retirement portfolio versus managing portfolios during asset accumulation years The ability to create retirement portfolios and manage their risks are skills you must possess to be an effective financial advisor. Retirement Portfolios will help you develop these essential skills and gain a better understanding of the entire process.*

*Theory Construction in Nursing Feb 20 2021*

*Theory Construction in Second Language Acquisition Nov 12 2022 Recently, many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist, scientific endeavour. The resulting epistemological arguments, plus problems of theory proliferation, contradicting theories, and theory domain, hinder progress towards a unified theory of SLA. Theory Construction in SLA addresses these problems by returning to first principles; it asks whether there is such a thing as reliable knowledge, what is special about scientific method, and how we can best explain SLA. It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA. Part One explores the central issues in the philosophy of science, defends rationality against relativists, and offers Guidelines for theory assessment. Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines.*

*Theory Construction Series Mar 16 2023 To make a contribution we need to identify scholarly holes. This booklet provides recommendations to identify papers and to take advantage of reference and database software to both identify key authors and papers, and to elicit ideas for the purpose of theory construction. It also presents a coding mechanism for the review of the literature to subsequently construct a visual map, using open source software, which can more easily help us to identify holes in current research. The codes will help to determine the main disciplines and sub-disciplines, the methods most commonly used, the levels of analysis, as well as the types of studies that others have used to approach the subject under research.*
