Catching Ourselves in the Act Aug 20 2022 Catching Ourselves in the Act uses situated robotics, ethology, and developmental psychology to erect a new framework for explaining human behavior. Rejecting the cognitive science orthodoxy that formal task-descriptions and their implementation are fundamental to an explanation of mind, Horst Hendriks-Jansen argues for an alternative model based on

the notion of interactive emergence. Situated activity and interactive emergence are concepts that derive from the new discipline of autonomous agent research. Hendriks-Jansen puts these notions on a firm philosophical basis and uses them to anchor a "genetic" or "historical" explanation of mental phenomena in species-typical activity patterns that have been selected by a cultural environment of artifacts, language, and intentional scaffolding by adults. Situated robotics, allied with techniques and principles from ethology, allows the testing of hypotheses framed in terms of natural kinds that can be grounded through the theory of natural selection. This approach negotiates the "nature versus nurture" dispute in a radically new way. *Catching Ourselves in the Act* provides a thorough overview of autonomous agent research in America and Europe, focusing in particular on work by such eminent researchers as Rodney Brooks, Pattie Maes, Maja Mataric, and Rolf Pfeifer. It reassesses the basic principles of artificial life and explores the repercussions of autonomous agent research for human psychology and the philosophy of mind, as well as its affinities with the "contextual revolution" in sociology and anthropology. A Bradford Book. Complex Adaptive Systems

The Act of Creation Dec 12 2021 The Act of Creation begins where this view ceases to be true. Koestler affirms that all creatures have the capacity for creative activity, frequently suppressed by the automatic routines of thought and behavior that dominate their lives. The study of psychology has offered little in the way of an explanation of the creative process, and Koestler suggests that we are at our most creative when rational thought is suspended - for example in dreams and trance-like states. Then the mind is capable of receiving inspiration and insight. Taking humor as his starting point, Koestler examines what he terms 'bisociative' thinking - the creative leap made by the mind that gives rise to new and startling perceptions and glimpses of reality. From here he assesses the workings of the mind of the scientific or artistic genius. The general reader as well as the reader with a deeper knowledge of the topics covered will find this richly documented study of creativity both illuminating and compelling.

Stop, Think, Act Jul 27 2020 *Stop, Think, Act: Integrating Self-regulation in the Early Childhood Classroom* offers early childhood teachers the latest research and a wide variety of hands-on activities to help children learn and practice self-regulation techniques. Self-regulation in early childhood leads to strong academic performance, helps students form healthy friendships, and gives them the social and emotional resources they need to face high-stress situations throughout life. The book takes you through everything you need to know about using self-regulation principles during circle time, in literacy and math instruction, and during gross motor and outdoor play. Each chapter includes a solid research base as well as practical, developmentally-appropriate games, songs, and strategies that you can easily incorporate in your own classroom. With *Stop, Think, Act*, you'll be prepared to integrate self-regulation into every aspect of the school day.

A Practical Guide to Acceptance and Commitment Therapy Jan 01 2021 This book is the most practical clinical guide on Acceptance and Commitment Therapy (ACT said as one word, not as initials) yet available. It is designed to show how the ACT model and techniques apply to various disorders, settings, and delivery options. The authors of these chapters are experts in applying ACT in these various areas, and it is intriguing how the same core principles of ACT are given a nip here and a tuck there to fit it to so many issues. The purpose of this book, in part, is to embolden researchers and clinicians to begin to apply ACT wherever it seems to fit. The chapters in the book demonstrate that ACT may be a useful treatment approach for a very wide range of clinical problems. Already there are controlled data in many of these areas, and soon that database will be much larger. The theory underlying ACT (Relational Frame Theory or "RFT"-and yes, here you say the initials) makes a powerful claim: psychopathology is, to a significant degree, built into human language. Further, it suggests ways to diminish destructive language-based functions and ways of augmenting helpful ones.

To the extent that this model is correct, ACT should apply to a very wide variety of behavioral issues because of the centrality of language and cognition in human functioning.

The Acts of the Apostles Jun 29 2023 Acts is the sequel to Luke's gospel and tells the story of Jesus's followers during the 30 years after his death. It describes how the 12 apostles, formerly Jesus's disciples, spread the message of Christianity throughout the Mediterranean against a background of persecution. With an introduction by P.D. James

The Act of Musical Composition Jun 17 2022 The study of musical composition has been marked by a didactic, technique-based approach, focusing on the understanding of musical language and grammar -harmony, counterpoint, orchestration and arrangement - or on generic and stylistic categories. In the field of the psychology of music, the study of musical composition, even in the twenty-first century, remains a poor cousin to the literature which relates to musical perception, music performance, musical preferences, musical memory and so on. Our understanding of the compositional process has, in the main, been informed by anecdotal after-the-event accounts or post hoc analyses of composition. *The Act of Musical Composition: Studies in the Creative Process* presents the first coherent exploration around this unique aspect of human creative activity. The central threads, or key themes - compositional process, creative thinking and problem-solving - are integrated by the combination of theoretical understandings of creativity with innovative empirical work.

Caught in the Act Jan 25 2023 Boy, girl, artist, advocate. Courtney is more than the sum of her parts. Meet Shane Jenek. Raised in the Brisbane suburbs by loving parents, Shane realises from a young age that he's not like all the other boys. He finds his tribe at a performing arts agency, where he discovers his passion for song, dance and performance. Shane makes a promise to himself: to find a bigger stage. Meet Courtney Act. Born in Sydney around the turn of the millennium, Courtney makes her name in the gay bars of Oxford Street and then on Australian Idol. More than ten years later, she makes star turns on RuPaul's Drag Race and Celebrity Big Brother UK, bringing her unique take on drag and gender to the world. Behind this rise to national and global fame is a story of searching for and finding oneself. Told with Courtney's trademark candour and wit, *Caught in the Act* is about our journey towards understanding gender, sexuality and identity. It's an often hilarious and at times heartbreaking memoir from a beloved drag and entertainment icon. Most of all, it's a bloody good time.

Caught in the Act Sep 08 2021 In *Caught in the Act*, Joseph Litvak reveals not only the surprising wealth of theatrical themes in the canonical nineteenth-century English novel, but also the complex and over-determined politics of this theatricality. Nineteenth-century fiction is typically understood as enshrining the bourgeois values of privacy, domesticity, subjectivity, and sincerity. But Litvak demonstrates that private experience in the novels of Jane Austen, Charlotte Bronte, George Eliot, and Henry James is in fact a rigorous enactment of a public script that constructs normative gender and class identities. These novels also display extravagant theatrical forms like travesty, transvestism, charade, and carnival. The theatricality enforces social norms at the same time that it provides ways for novelists to resist them. Litvak thus challenges recent interpretations of the nineteenth-century novel as a disciplinary apparatus. His approach encourages a rethinking of the genre and its varied cultural contexts in all their instability and ambivalence. In addition to a new interpretation, this rethinking offers a new, more frankly theatrical approach to interpretation itself. Litvak argues that the theatricality of the nineteenth-century novel anticipates the late twentieth-century strategies of feminist and gay critical

performance.

Coached in the Act Apr 15 2022 Victoria Laurie, the New York Times bestselling author of the *Psychic Eye Mysteries* and the *Ghost Hunter Mysteries*, returns with her fourth Life Coach Mystery starring Cat Cooper, the best life coach in the Hamptons, when she's not busy solving murders. As East Hampton's go-to life coach, Cat Cooper and her BFF, Gilley, delve into the exclusive personal lives of the rich and infamous. But with local gossip growing vicious, knowing too much information can be a death sentence . . . Wild rumors are swirling in the Hamptons over "Twelve Angry Men," a ruthlessly revealing one-woman show written and performed by Yelena Galanis. The well-known socialite dated her way through some of the East End's most eligible bachelors, and now she's sparing few details spilling their humiliating secrets. It's a mean-spirited spectacle that urges Cat to make a beeline for the theater exit during the first act—only to later discover that Yelena was found stabbed to death during intermission. Believing eleven other barely anonymous men had reasons to kill the thespian for playing a cruel game of kiss and tell, Cat teams up with her sidekick, Gilley, to track down Yelena's list of rejected lovers and identify the vengeful culprit stalking around the seaside community, lingering frighteningly close to home . . .

The Act of Voting Mar 15 2022 Electoral behaviour is one of the most dynamic areas of study in the field of comparative politics today. A strongly emerging theme in recent years has been the need to set the study of voting behaviour in its wider context, that is to understand how the behaviour of the individual (non)voter is conditioned by the environment in which the election is occurring. The main motivation for this book is to respond to this need. *The Act of Voting* examines voting – both the question of whether to vote (ie. electoral turnout) and who to vote for – in context from a range of interdisciplinary perspectives. In addition to other topics and themes, chapters explore the national or social identities of individuals and how these contribute to complex social dynamics, discuss the institutions that determine who is able to vote and over what, and analyse the impact of the locale on the voting act. Offering chapters by up-and-coming scholars in the field of electoral behaviour, as well as reflections on how the act of voting should be viewed in the broadest context – normatively, institutionally and socially, this book will be of interest to students and scholars researching political behaviour, public opinion and politics more generally.

The Act of Living Nov 30 2020 *The Act of Living* explores the relation between development and marginality in Ethiopia, one of the fastest growing economies in Africa. Replete with richly depicted characters and multi-layered narratives on history, everyday life and visions of the future, Marco Di Nunzio's ethnography of hustling and street life is an investigation of what is to live, hope and act in the face of the failing promises of development and change. Di Nunzio follows the life trajectories of two men, "Haile" and "Ibrahim," as they grow up in the Ethiopian capital Addis Ababa, enter street life to get

by, and turn to the city's expanding economies of work and entrepreneurship to search for a better life. Apparently favourable circumstances of development have not helped them achieve social improvement. As their condition of marginality endures, the two men embark in restless attempts to transform living into a site for hope and possibility. By narrating Haile and Ibrahim's lives, *The Act of Living* explores how and why development continues to fail the poor, how marginality is understood and acted upon in a time of promise, and why poor people's claims for open-endedness can lead to better and more just alternative futures. Tying together anthropology, African studies, political science, and urban studies, Di Nunzio takes readers on a bold exploration of the meaning of existence, hope, marginality, and street life.

This highly accurate and smooth-reading version of the Bible in modern English has the largest library of printed and electronic support material of any modern translation.

Thought in the Act Mar 27 2023 “Every practice is a mode of thought, already in the act. To dance: a thinking in movement. To paint: a thinking through color. To perceive in the everyday: a thinking of the world’s varied ways of affording itself.” —from *Thought in the Act* Combining philosophy and aesthetics, *Thought in the Act* is a unique exploration of creative practice as a form of thinking. Challenging the common opposition between the conceptual and the aesthetic, Erin Manning and Brian Massumi “think through” a wide range of creative practices in the process of their making, revealing how thinking and artfulness are intimately, creatively, and inseparably intertwined. They rediscover this intertwining at the heart of everyday perception and investigate its potential for new forms of activism at the crossroads of politics and art. Emerging from active collaborations, the book analyzes the experiential work of the architects and conceptual artists Arakawa and Gins, the improvisational choreographic techniques of William Forsythe, the recent painting practice of Bracha Ettinger, as well as autistic writers’ self-descriptions of their perceptual world and the experimental event making of the SenseLab collective. Drawing from the idiosyncratic vocabularies of each creative practice, and building on the vocabulary of process philosophy, the book reactivates rather than merely describes the artistic processes it examines. The result is a thinking-with and a writing-in-collaboration-with these processes and a demonstration of how philosophy co-composes with the act in the making. *Thought in the Act* enacts a collaborative mode of thinking in the act at the intersection of art, philosophy, and politics.

[The ACT Matrix](#) Nov 10 2021 If you are an ACT practitioner or mental health professional, this eagerly awaited resource is an essential addition to your professional library. Acceptance and commitment therapy (ACT) is an evidence-based therapy that has been successful in treating a variety of psychological issues, such anxiety, depression, substance abuse, trauma, eating disorders, and more. In contrast to other treatment options, ACT has proven extremely effective in helping clients who are

“stuck” in unhealthy thought patterns by encouraging them align their values with their thoughts and actions. However, the ACT model is complex, and it’s not always easy to use. Traditionally, ACT is delivered with a focus around six core processes that are often referred to as the hexaflex: cognitive defusion, acceptance, contact with the present moment, observing the self, values, and committed action. Each of these core processes serves a specific function, but they are often made more complex than needed in both theory and in practice. So what if there was a way to simplify ACT in your sessions with clients? Edited by clinical psychologists and popular ACT workshop leaders Kevin L. Polk and Benjamin Schoendorff, *The ACT Matrix* fuses the six core principles of acceptance and commitment therapy (ACT) into a simplified, easy-to-apply approach that focuses on client actions and behavior as workable or unworkable, rather than good or bad. Most importantly, you’ll learn how this innovative approach can be used to deliver ACT more effectively in a variety of settings and contexts, even when clients are resistant or unmotivated to participate. This is the first book to utilize the ACT Matrix model, and it is a must-read for any ACT practitioner looking to streamline his or her therapeutic approach.

Ditch the Act: Reveal the Surprising Power of the Real You for Greater Success Oct 10 2021 Be human. It’s the only way to get ahead in business today. Competition today is fiercer than ever. It seems that every job candidate is flashing a world-class resume and every business competitor is the absolute best at what they do. Don’t be fooled. People exaggerate. And don’t be discouraged. By revealing stories of failures, setbacks, and personal flaws without shame or fear, you exhibit greater self-confidence than your competition. You cultivate connections with serious, smart people, and you build loyalty that lasts. *Ditch the Act* shows how to present your humanness—imperfect and flawed but honest, resilient, and willing to learn—in strategic ways to achieve clear, defined goals. It provides an actionable program for building an authentic, long-lasting personal brand, explaining why exposure is important and how it cultivates more durable connections than any polished persona can. By creating a personal brand that’s honest and authentic and that reveals personal struggles, you’ll build stronger, longer-lasting relationships—and achieve greater success. Careers and businesses based on authenticity and truth aren’t just more rewarding than those founded on hyperbole and the “hard sell.” Because they’re founded on durable, robust relationships, they’re rock-solid—and better withstand business uncertainty and tough times. *Ditch the act*, be real—and jump ahead of the competition before they even know you are there.

Moving Politics Mar 03 2021 In the late 1980s, after a decade spent engaged in more routine interest-group politics, thousands of lesbians and gay men responded to the AIDS crisis by defiantly and dramatically taking to the streets. But by the early 1990s, the organization they founded, ACT UP, was no more—even as the AIDS epidemic raged on. Weaving together interviews with activists, extensive research, and reflections on the author’s time as a member of the organization, *Moving Politics* is the first book to chronicle the rise and fall of ACT UP, highlighting a key factor in its trajectory: emotion. Surprisingly overlooked by many scholars of social movements, emotion, Gould argues, plays a fundamental role in political activism. From anger to hope, pride to shame, and solidarity to despair, feelings played a significant part in ACT UP’s provocative style of protest, which included raucous demonstrations, die-ins, and other kinds of street theater. Detailing the movement’s public triumphs and private setbacks, *Moving Politics* is the definitive account of ACT UP’s origin, development, and decline as well as a searching look at the role of emotion in contentious politics.

The Big Book of ACT Metaphors Sep 20 2022 Metaphors and exercises play an incredibly important part in the successful delivery of acceptance and commitment therapy (ACT). These powerful tools go far in helping clients connect with their values and give them the motivation needed to make a real, conscious commitment to change. Unfortunately, many of the metaphors that clinicians use have become stale and ineffective. That's why you need fresh, new resources for your professional library. In this breakthrough book, two ACT researchers provide an essential A-Z resource guide that includes tons of new metaphors and experiential exercises to help promote client acceptance, defusion from troubling thoughts, and values-based action. The book also includes scripts tailored to different client populations, and special metaphors and exercises that address unique problems that may sometimes arise in your therapy sessions. Several ACT texts and workbooks have been published for the treatment of a variety of psychological problems. However, no one resource exists where you can find an exhaustive list of metaphors and experiential exercises geared toward the six core elements of ACT. Whether you are treating a client with anxiety, depression, trauma, or an eating disorder, this book will provide you with the skills needed to improve lives, one exercise at a time. With a special foreword by ACT cofounder Steven C. Hayes, PhD, this book is a must-have for any ACT Practitioner.

Caught in the Act Apr 03 2021 Mick Dawson, undercover cop. He's got his hands full with a pushy broad who claims she's just in the wrong place at the wrong time. Except all the perps seem to know everything there is to know about her. Who're you going to believe? Only one way to find out. Get real close. Del Piper, mystery writer. She's as confused as he is, but mostly because he's got the sweetest smile, when he smiles. Still, he's sticking with her twenty-four/seven--is this love or duty? Is he her protector or her captor?
