The Wind Doesn't Need a Passport May 16 2022 "There are other

books dealing with life at the border, but none as intelligent, searching, objective or encompassing as Tyche Hendricks' vivid evocation of this region—its people, its landscape, its industry, its problems and its unique culture."—Peter Schrag, author of *Not Fit for Society: Immigration and Nativism in America* "This vivid, evocative book made me think of the Robert Frost line, 'Something there is that doesn't love a wall.' Tyche Hendricks' multilayered portrait of the human communities that transcend the U.S.-Mexico border should remind us all of what an artificial thing barriers, fences and checkpoints are. Maybe, just maybe, someday we, like so much of western Europe, can do without them."—Adam Hochschild, author of *Bury the Chains* "This is an ambitious undertaking and Hendricks excels, finding stories along the way that illustrate the clash between, within and along that nearly 2,000-mile stretch of territory. Her reporting illustrates that for many U.S.-Mexico border residents, the international bridge is something you cross on your way to visit family, shop for groceries, get to a doctor or work."—Macarena Del Rocio Hernandez, University of Houston "Dear President Obama, next time you are at Camp David spend a couple of hours reading *The Wind Doesn't Need a Passport*. While the Health Care overhaul may well come to define your presidency, immigration will define the future of our country. In this marvelous book—rigorously grounded, smartly argued, beautifully crafted, Tyche Hendricks captures, in stories of biblical proportion, the contours of the magical line that at once unites us and divides us as Americans and as neighbors of our indispensable partner in the South. Ms. Hendricks's book, Mr. President, will remind you just what is at stake in getting immigration reform right. All Californians, Texans, and Arizonians, who think they know the border, should read this book. It is essential reading for our times."—Marcelo M. The American Passport in Turkey Mar 14 2022 An ethnographic exploration of the meaning of national citizenship in the context of globalization *The American Passport in Turkey* explores the diverse meanings and values that people outside of the United States attribute to U.S. citizenship, specifically those who possess or seek to obtain U.S. citizenship while residing in Turkey. Özlem Altan-Olcay and Evren Balta interviewed more than one hundred individuals and families and, through their narratives, shed light on how U.S. citizenship is imagined, experienced, and practiced in a setting where everyday life is marked by numerous uncertainties and unequal opportunities. When a Turkish mother wants to protect her daughter's modern, secular upbringing through U.S. citizenship, U.S. citizenship, for her, is a form

of insurance for her daughter given Turkey's unknown political future. When a Turkish-American citizen describes how he can make a credible claim of national belonging because he returned to Turkey yet can also claim a cosmopolitan Western identity because of his U.S. citizenship, he represents the popular identification of the West with the United States. And when a natural-born U.S. citizen describes with enthusiasm the upward mobility she has experienced since moving to Turkey, she reveals how the status of U.S. citizenship and "Americanness" become valuable assets outside of the States. Offering a corrective to citizenship studies where discussions of inequality are largely limited to domestic frames, Altan-Olcay and Balta argue that the relationship between inequality and citizenship regimes can only be fully understood if considered transnationally. Additionally, *The American Passport in Turkey* demonstrates that U.S. global power not only reveals itself in terms of foreign policy but also manifests in the active desires people have for U.S. citizenship, even when they do not intend to live in the United States. These citizens, according to the authors, create a new kind of empire with borders and citizen-state relations that do not map onto recognizable political territories.

The Passport in America Apr 26 2023 In today's world of constant identification checks, it's difficult to recall that there was ever a time when "proof of identity" was not a part of everyday life. And as anyone knows who has ever lost a passport, or let one expire on the eve of international travel, the passport has become an indispensable document. But how and why did this form of identification take on such a crucial role? In the first history of the passport in the United States, Craig Robertson offers an illuminating account of how this document, above all others, came to be considered a reliable answer to the question: who are you? Historically, the passport originated as an official letter of introduction addressed to foreign governments on behalf of American travelers, but as Robertson shows, it became entangled in contemporary negotiations over citizenship and other forms of identity documentation. Prior to World War I, passports were not required to cross American borders, and while some people struggled to understand how a passport could accurately identify a person, others took advantage of this new document to advance claims for citizenship. From the strategic use of passport applications by freed slaves and a campaign to allow married women to get passports in their maiden names, to the "passport nuisance" of the 1920s and the contested addition of photographs and other identification technologies on the passport, Robertson sheds new light on issues of individual and national identity in modern U.S. history. In this age of heightened security, especially at international borders, Robertson's *The Passport in America* provides anyone interested in questions of identification and surveillance with a richly detailed, and often surprising, history of this uniquely important document.

Department of State Oct 21 2022 A genuine U.S. passport permits its owner to travel freely in and out of the U.S., prove U.S. citizenship, obtain further identification documents, and set up bank accounts, among other things. The auditor was asked to proactively test the effectiveness of State's passport issuance process to determine whether the process is vulnerable to fraud. The investigation shows that terrorists or criminals could steal an American citizen's identity, use basic counterfeiting skills to create fraudulent documentation for that identity, and obtain a genuine U.S. passport from the Dept. of State. The auditor conducted 4 tests simulating this approach and was successful in obtaining a genuine U.S. passport in each case.

Border Security Mar 02 2021 In 2005, the Department of State (State) began issuing electronic passports (e-passports) with embedded computer chips that store information identical to that printed in the passport. By agreement with State, the U.S. Government Printing Office (GPO) produces blank e-passport books. Two foreign companies are used by GPO to produce e-passport covers, including the computer chips embedded in them. At U.S. ports of entry, the Department of Homeland Security (DHS) inspects passports. GAO was asked to examine potential risks to national security posed by using foreign suppliers for U.S. e-passport computer chips. This report specifically examines the following two risks: (1) Can the computer chips used in U.S. e-passports be altered or forged to fraudulently enter the United States (2) What risk could malicious code on the U.S. e-passport computer chip pose to national security To conduct this work, GAO reviewed documents and interviewed officials at State, GPO, and DHS relating to the U.S. e-passport design and manufacturing and e-passport inspection systems and procedures.
