“ Science fiction has only produced a few works of actual genius, and this is one of them. ” —Joe Haldeman #5 in the Millennium SF Masterworks series, a library of the finest science fiction ever written. “ Science fiction has only produced a few works of actual genius, and this is one of them. ”

—Joe Haldeman "Bester at the peak of his powers is, quite simply, unbeatable " —James Lovegrove Marooned in outer space after an attack on his ship, Nomad, Gulliver Foyle lives to obsessively pursue the crew of a rescue vessel that had intended to leave him to die. When it comes to pop culture, Alfred Bester (1913-1987) is something of an unsung hero. He wrote radio scripts, screenplays, and comic books (in which capacity he created the original Green Lantern Oath). But Bester is best known for his science-fiction novels, and *The Stars My Destination* may be his finest creation. With its sly potshotting at corporate skullduggery, *The Stars My Destination* seems utterly contemporary, and has maintained its status as an underground classic for fifty years. (Bester fans should also note that iBooks has reprinted *ReDemolished*, which won the very first Hugo Award in 1953.)

When the Stars Begin to Fall Jul 21 2020 A “persuasive . . . heartfelt and vividly written” call to counter systemic racism and build national solidarity in America (Publishers Weekly). The American Promise enshrined in our Constitution states that all men and women are inherently equal. And yet racism continues to corrode our society. If we cannot overcome it, Theodore Johnson argues, the promise that made America unique on Earth will have died. In *When the Stars Begin to Fall*, Johnson presents a compelling blueprint for the kind of national solidarity necessary to mitigate racism. Weaving together history, personal memories, and his family’s multi-generational experiences with racism, Johnson posits that solutions can be found in the exceptional citizenship long practiced in Black America. Understanding that racism is a structural crime of the state, he argues that overcoming it requires us to recognize that a color-conscious society—not a color-blind one—is the true fulfillment of the American Promise. Fueled by Johnson’s ultimate faith in the American project, grounded in his family’s longstanding optimism and his own military service, *When the Stars Begin to Fall* is an urgent call to undertake the process of overcoming what has long seemed intractable.

Time for the Stars Jun 12 2022 For a telepathic twin on an exploratory space voyage only a few years pass, yet, when he returns to Earth his brother is ready to celebrate his ninetieth birthday.

The Witness of the Stars Mar 29 2021 Some years ago it was my privilege to enjoy the acquaintance of Miss Frances Rolleston, of Keswick, and to carry on a correspondence with her with respect to her work, *Mazzaroth: or, the Constellations*. She was the first to create an interest in this important subject. Since then Dr. Seiss, of Philadelphia, has endeavoured to popularize her work on the other side of the Atlantic; and brief references have been made to the subject in such books as *Moses and Geology*, by Dr.

Kinns, and in *Primeval Man*; but it was felt, for many reasons, that it was desirable to make another effort to set forth, in a more complete form, the witness of the stars to prophetic truth, so necessary in these last days. To the late Miss Rolleston, however, belongs the honour of collecting a mass of information bearing on this subject; but, published as it was, chiefly in the form of notes, unarranged and unindexed, it was suited only for, but was most valuable to, the student. She it was who performed the drudgery of collecting the facts presented by Albumazer, the Arab astronomer to the Caliphs of Grenada, 850 a.d.; and the Tables drawn up by Ulugh Beigh, the Tartar prince and astronomer, about 1650 a.d., who gives the *Arabian Astronomy* as it had come down from the earliest times. Modern astronomers have preserved, and still have in common use, the ancient names of over a hundred of the principal stars which have been handed down; but now these names are used merely as a convenience, and without any reference to their significance. This work is an attempt to popularize this ancient information, and to use it in the interests of truth. For the ancient astronomical facts and the names, with their signification, I am, from the very nature of the case, indebted, of course, to all who have preserved, collected, and handed them down; but for their interpretation I am alone responsible. It is for the readers to judge how far my conclusions are borne out by the evidence; and how far the foundation of our hopes of coming glory are strengthened by the prophecies which have been written in the stars of heaven, as well as in the Scriptures of truth.

Children of the Stars Nov 05 2021 From international bestselling author Mario Escobar comes a story of escape, sacrifice, and hope amid the perils of the Second World War. August 1942. The French gendarmes, under Nazi order, arrest the boys and take them to the Vélodrome d' Hiver—a massive, bleak structure in Paris where thousands of France's Jews are being forcibly detained. Return from the Stars Nov 24 2020 An astronaut returns to Earth after a 10-year mission and finds a society that he barely recognizes in science fiction novel by the Solaris author, whose works “ make our weary universe seem pale and undistinguished by comparison ” (The Washington Post). Stanisław Lem ’ s *Return from the Stars* recounts the experiences of Hal Bregg, an astronaut who returns from an exploratory mission that lasted ten years—although because of time dilation, 127 years have passed on Earth. Bregg finds a society that he hardly recognizes, in which danger has been eradicated. Children are “ betrizated ” to remove all aggression and violence—a process that also removes all impulse to take risks and explore. The people of Earth view Bregg and his crew as “ resuscitated Neanderthals, ” and pressure them to undergo betrization. Bregg has serious difficulty in navigating the new social mores. While Lem ’ s depiction of a risk-free society is bleak, he does not portray Bregg and his fellow astronauts as heroes. Indeed, faced with no opposition to his aggression, Bregg behaves abominably. He is faced with a choice: leave Earth again and hope to return to a different society in several hundred years, or stay on Earth and learn to be content. With *Return from the Stars*, Lem shows the shifting boundaries between utopia and dystopia.

Empire Of The Stars May 23 2023 In August 1930, on a boat trip from Bombay to England, the young Indian scientist Subrahmanyan Chandrasekhar calculated that certain stars could end their lives by collapsing indefinitely to a point - to nowhere. This idea brought Chandra

into conflict with Sir Arthur Eddington, the grand old man of British astrophysics, who publicly ridiculed the idea. *EMPIRE OF THE STARS* teases out the major implications of this infamous event, setting it against the backdrop of the turbulent growth of astrophysics, and provides a unique window on our unfolding view of the cosmos. In its clash of personalities, epochs and cultures, the story reveals the deep-seated psychological and philosophical prejudices at work in the acceptance and rejection of new scientific ideas. Beautifully written, artfully constructed, *EMPIRE OF THE STARS* is a serious book but one which also deals with classic themes -- a lone man struggling against the establishment, intellectual rivalry and the highs and lows of great individuals set against the broader sweep of history.

Little Boys Come from the Stars Jul 01 2021 Sardonic, subtle, and sweetly scathing, *Little Boys Come from the Stars* is satire at its best. Set in an unnamed country in equatorial Africa, it tells the story of Michel, a precocious teen dubbed Matapari (" trouble ") because of his extraordinary birth. Though his father is a reclusive scholar, his mother a pious though confused Catholic, and his uncle a shameless opportunist determined to gain power in the shifting politics of their post-colonial nation, Matapari remains an unsullied child who wears Reeboks, drinks Coke, reads Japanese comics, and watches Rambo. But when his family becomes the nucleus of the revolution for democracy, Matapari proves to be the ideal narrator for this story of violent upheaval and bloody corruption—a voice whose ironic innocence makes bearable and even humorous the awful realities of the world it describes.

Her stories remind us how precious and fragile life can be—and that we must risk our hearts every day to know happiness. *Follow the Stars Home* is just such a novel: a story of poignancy and heartbreak, grace and courage. Being a good mother is never simple: each day brings new choices and challenges. For Dianne Robbins, being a devoted single mother has resulted in her greatest joy and her darkest hours. Weeks before her daughter was born, she and her husband, Tim McIntosh, received the news every parent fears. Tim had not reckoned on

their child being anything less than perfect, and abruptly fled to a solitary existence on the sea, leaving Dianne with a newborn—almost alone. It was Tim's brother, Alan, the town pediatrician, who stood by Dianne and her exceptional daughter. Throughout years of waiting, watching, and caring, Alan hid his love for his brother's wife. But one of the many hard choices Dianne has made is to close her heart toward any man—especially one named McIntosh. It will take a very special twelve-year-old to remind them all that love comes in many forms and can be received with as much grace as it is given. As lyrical and moving as the poetry of nature, *Follow the Stars Home* is a miracle of storytelling that will take your breath away. If words alone can dare us to confront our fears and to choose joy over sorrow, then Luanne Rice's magnificent novel is a benediction and a call to celebrate our lives. says acclaimed author Luanne Rice. "I always say the same thing: love. It's an easy answer, but like love itself, far from simple." And her new novel, *FOLLOW THE STARS HOME*, demonstrates that on each finely wrought page. The Stuff of Stars Sep 22 2020 In an astonishing unfurling of our universe, Newbery Honor winner Marion Dane Bauer and Caldecott Honor winner Ekua Holmes celebrate the birth of every child. Before the universe was formed, before time and space existed, there was . . . nothing. But then . . . BANG! Stars caught fire and burned so long that they exploded, flinging stardust everywhere. And the ash of those stars turned into planets. Into our Earth. And into us. In a poetic text, Marion Dane Bauer takes readers from the trillionth of a second when our universe was born to the singularities that became each one of us, while vivid illustrations by Ekua Holmes capture the void before the Big Bang and the ensuing life that burst across galaxies. A seamless blend of science and art, this picture book reveals the composition of our world and beyond — and how we are all the stuff of stars.

Light of the Stars: Alien Worlds and the Fate of the Earth Apr 22 2023 Winner of the 2019 Phi Beta Kappa Award for Science "A valuable perspective on the most important problem of our time." —Adam Becker, NPR
Light of the Stars tells the story of humanity 's coming of age as we realize we might not be alone in this universe. Astrophysicist Adam Frank traces the question of alien life from the ancient Greeks to modern thinkers, and he demonstrates that recognizing the possibility of its existence might be the key to save us from climate change. With clarity and conviction, Light of the Stars asks the consequential question: What can the likely presence of life on other planets tell us about our own fate?

Spiral to the Stars Feb 20 2023 All communities are teeming with energy,

spirit, and knowledge, and *Spiral to the Stars* taps into and activates this dynamism to discuss Indigenous community planning from a Mvskoke perspective. This book poses questions about what community is, how to reclaim community, and how to embark on the process of envisioning what and where the community can be. Geographer Laura Harjo demonstrates that Mvskoke communities have what they need to dream, imagine, speculate, and activate the wishes of ancestors, contemporary kin, and future relatives—all in a present temporality—which is Indigenous futurity. Organized around four methodologies—radical sovereignty, community knowledge, collective power, and emergence geographies—*Spiral to the Stars* provides a path that departs from traditional community-making strategies, which are often extensions of the settler state. Readers are provided a set of methodologies to build genuine community relationships, knowledge, power, and spaces for themselves. Communities don't have to wait on experts because this book helps them activate their own possibilities and expertise. A detailed final chapter provides participatory tools that can be used in workshop settings or one on one. This book offers a critical and concrete map for community making that leverages Indigenous way-finding tools. Mvskoke narratives thread throughout the text, vividly demonstrating that theories come from lived and felt experiences. This is a must-have book for community organizers, radical pedagogists, and anyone wishing to empower and advocate for their community.

The Pull of the Stars Mar 21 2023 In Dublin, 1918, a maternity ward at the height of the Great Flu is a small world of work, risk, death, and unlooked-for love, in "Donoghue's best novel since *Room*" (Kirkus Reviews). In an Ireland doubly ravaged by war and disease, Nurse Julia Power works at an understaffed hospital in the city center, where expectant mothers who have come down with the terrible new Flu are quarantined together. Into Julia's regimented world step two outsiders—Doctor Kathleen Lynn, a rumoured Rebel on the run from the police, and a young volunteer helper, Bridie Sweeney. In the darkness and intensity of this tiny ward, over three days, these women change each other's lives in unexpected ways. They lose patients to this baffling pandemic, but they also shepherd new life into a fearful world. With tireless tenderness and humanity, carers and mothers alike somehow do their impossible work. In *The Pull of the Stars*, Emma Donoghue once again finds the light in the darkness in this new classic of

hope and survival against all odds.
