Should CEOs act as moral compasses for their companies? Leo Hindery thinks they should. If every CEO did so, then Enron, WorldCom, Adelphia, and Tyco would not have become poster children for greed. They would not have become corporate embarrassments -- living illustrations of all that can go wrong in the corner office. How did these once prestigious companies fall off the ethical cliff? How is it that reputations were destroyed, shareholders lost value, employees (in many cases) lost everything, and, in a few cases, entire companies disappeared? Everyone is pointing fingers, and the new widespread mistrust of public companies may turn out to be more damaging to America's economic future than the billions actually lost in the scandals. Now, one of America's most prominent corporate leaders illuminates the need for more integrity and less greed among executives. In a scathing examination of why leaders have lost their way, Leo Hindery speaks out on the role of the CEO. Does the corporate culture have to be driven by greed? Or can you do good and still make good in the big business world? Leo Hindery, the former CEO and President of companies such as AT&T Broadband, TCI, and the YES Network -- and currently Managing Partner of

InterMedia Partners -- forcefully advocates approaching a business career as life's meaningful work, and not merely as a way to accumulate personal wealth. Both fiery and optimistic, Hindery calls upon his fellow executives to conduct themselves with the kind of integrity that used to be commonplace, but now seems all too rare. Holding his moral yardstick up to some of the worst transgressions in recent memory, Hindery tackles the toughest issues of the day head-on: • Why should the ratio of average CEO pay to average employee pay today be 304:1 -- and in some cases, as high as 2,300:1? • What does it mean when 80 percent of all viewed media content is owned by just 5 companies? • If offshoring is good for the global economy, what needs to be done to make it fair? • What should the role of the board of directors be, and whose job is it to take care of employees? With passion, insight, and humor, Hindery reinvigorates the code of business conduct. *It Takes a CEO* is a corporate handbook for our times -- not for how to get ahead, but for how to lead with integrity, grace, and heart. We test whether CEOs working near their childhood homes (i.e., local CEOs) are less likely than nonlocal CEOs to make myopic investment decisions. Place attachment theories suggest that people develop mutual caretaking relationships with their birthplaces. In addition, executive labor markets face less information asymmetry about local CEOs, resulting lower pressure on local CEOs for quick profits. Consistent with the prediction, we find that local CEOs are less likely to cut R&D expenditures for beating analyst forecasts or avoiding earnings decreases. These results are corroborated by the finding that in their last year of office local CEOs are significantly less likely to cut R&D than nonlocal CEOs. The CEO locality effect is stronger when more local business interests are embedded in the firm, i.e., when the firm's business is more concentrated in the CEO's birth state and the residents of the CEO's birth state have a higher inclination to invest in local firms. The effect is also more significant when the residents of the CEO's birth state have stronger local social bond, i.e., when the state has lower population mobility and more social capital. Local CEOs' longer horizons are consistently manifested in their other decisions such as paying more state tax and being more socially responsible in business operation. In *Trust and Follow*, John Houston shares his journey of trusting God in all areas of his life and how that led to giving God his business. God said, "I want you to give Me the business." John Houston has spent two decades establishing his company's reputation as one of Dallas-Fort Worth's premier custom home builders. With God's guidance, John Houston Homes has been blessed with unprecedented success—even during the devastating economic downturn in the early 2000s that put many construction companies out of business. Based on this experience, as well as many others in his professional and personal life, John knew that God could be trusted. And he firmly believed that he'd grown and matured enough in his faith that he'd follow anywhere God wanted to lead him. But one day, John felt God asking him to give Him the business. And not just in his heart and mind—in reality. To step down as CEO of the company he'd built from the ground up and hand the reins to someone else. From that moment, his faith and trust would be tested in

ways he never could've imagined. In *Trust and Follow: Learning How to Be CEO of a God-Owned Business*, John takes you on a journey of the situations and events that have helped him develop a real relationship with God and learn to trust Him over the years. He shares the wisdom he's gained about what it means to say yes to God—even when the request makes no sense, and the path forward is unclear and uncertain. And he hopes that his story will encourage you to reflect on your own life, to see and appreciate the many ways God has proved to be faithful and trustworthy in your past, your present, and in the days to come.

"When asked about the qualities needed to be an effective CEO, the answers are, to me, quite basic: Respect for, and ability to get along with, many different kinds of people, including those that do not share your views; The will to honor promises that one makes to his family, and the understanding that work and home life must be balanced." -Gerard J. Arpey, CEO, American Airlines "Be positive about challenges you encounter, for no matter how successful you are, you will encounter them." -William Clay Ford, Chairman, and CEO, Ford Motor Company "In the real world, leaders are rarely faced with a simple choice between right and wrong. Leaders can't avoid ambiguity, but must learn to be decisive in spite of it." -Sy Sternberg, CEO, New York Life "I think anyone willing to work hard for their goals, learn from their mistakes, and care about others has the "markings" to become a wonderful Leader." -Gary Kelly, CEO, Southwest Airlines "Find the right people and the right information to help you get the job done." -Ronald A. Ivey, CEO, Reynolds American "Surround yourself with people smarter than you: People make it happen and great people are necessary to make any idea come alive." -Maggie Wilderotter, CEO, Frontier Communications "I believe hard work, dedication, and the willingness to take calculated risks, not only in my personal life, but in my career as well, have contributed to my success. LESSONS FOR EVERYONE IN BUSINESS FROM AN ALL-STAR TEAM

Every six months Dennis C. Carey and Marie-Caroline von Weichs run the CEO Academy, an immersion course for newly appointed CEOs of the world's leading companies—what Business Week called a “boot camp” for the next class of top executives. Those attending get a priceless range of unvarnished advice and invaluable lessons from an all-star team of veteran CEOs about how to get the results they were hired to achieve. What participants pay \$10,000 to hear is now contained in this book, the insights and secrets of some of the most influential business leaders of our time. Here is advice from high-caliber businesspeople such as Larry Bossidy, the recently retired CEO of Honeywell International; Ray Gilmartin, the CEO of Merck; John Smale, the former chairman of General Motors and retired chairman and CEO of Procter & Gamble; and John Dasburg, who has run Northwest Airlines, Burger King, and now DHL Airways. Successful CEOs aren't the only attraction. How to Run a Company also presents America's leading business observers and watchdogs: Nell Minow, the shareholder

rights activist; Ira Millstein, the legendary attorney and power broker; Matthew Bishop, business editor of *The Economist*; and Joseph Badaracco, Harvard Business School's top professor of ethics. The combined team offers original and revealing observations on how business leaders at the top of the corporate world tackle pressing challenges, such as:

- How an industrial goliath like DuPont dramatically shifted its business focus
- How The Home Depot changed from fast-growing, free-wheeling adolescence to the management discipline that will help it mature and continue to expand
- What Michael Armstrong, who oversaw the transformation of Hughes Electronics and AT&T, advises to companies whose core business begins to disappear
- How the CEO of Tyco moved quickly during his first 100 days to build a new senior management team and began to restore trust in a company battered by scandal and bad publicity
- The role of the board of directors and how corporate governance should be reformed
- What strategies Jack Welch's investor relations team at GE used to constantly probe who was buying the stock, who wasn't, and why

How to Run a Company is not just for CEOs, but anyone interested in the critical make-or-break factors in today's ever-challenging business environment. As the demands and expectations in business become ever greater and the competition tougher, here in one volume is the accumulated wisdom and experience of people who have been in the trenches during a remarkable time. *How to Run a Company* is the success manual for the twenty-first century. From Zero to CEO is the book Victoria Coster wished had been available to her when, as a struggling single mother with no business skills, she started her own business with zero funds from her housing commission home. It is a practical guide to starting a thriving business from home. The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Every year, companies spend billions of dollars in board time and headhunter fees on CEO searches. In fact, by many accounts, the selection of the next CEO is the single most important task of the board of directors. Yet, despite the huge amount of time, money, and attention given to the task, many CEO changes fail, with disastrous consequences for all concerned. With so much at stake, it is natural to ask what companies and their boards can do to increase the odds of success. Illustrated with an abundance of real-life examples from interviews with CEOs, C-suite members, members of the boards, and headhunters supporting CEO searches, The Next CEO explains how boards can improve the odds of success with CEO succession by identifying clear CEO mandates and associated CEO profiles and by selecting CEOs that are fit for purpose. It further explains how the CEOs of leading corporations effectively take charge and create results, providing a roadmap for incoming CEOs. These ideas are brought to life with case studies and interviews with well-known corporations such as ABB, Alibaba, Freudenberg, GE, Google, HNA, HP,

Microsoft, Nestle, Nike, Nokia, Novartis, Roche, Sony, Tata, and Zurich Insurance. The book is invaluable practical reading for board members of medium-to-large-size firms involved with CEO succession, and for those preparing for their first CEO position. It is also relevant to headhunters who are involved in the process of CEO succession as a working tool for them and their clients. In addition, the book will be relevant to courses on corporate governance and strategic transformation at the executive and MBA levels. to run your household using a step-by-step process that will help you free up time and increase your confidence. Apply the various techniques to your day-to-day and see how it changes your life! Being a CEO “Chief Executive Officer” takes a great deal more effort and energy than just giving orders. You can't just tell an employee something and move on. You have to understand where they are coming from and their individual strengths, weaknesses, fears, and motivations. During the recent global recession, much attention was devoted to the mistakes that sparked the financial and economic crisis, in hopes of not repeating them. Less was given to what was done well amid the turmoil to learn, for example, how best to lead a company through tough times. None of the CEOs we interviewed in this book claimed to have attempted anything revolutionary. What was evident, however, was their resolve in pursuing the principles they thought were right, often in the face of opposition. Leadership becomes increasingly important in tough times, when so much is at risk but it can be even harder to exercise. The leadership “musts” described in this book has made the greatest difference for CEOs on the front line. After many years of searching, John Houston found his way home—his true home. Now, he wants to help you do the same. John Houston has spent the past sixteen years building for others what he didn't always have for himself growing up: a family home. Today, John is one of the premier custom home builders in Texas. Throughout the Dallas-Fort Worth area, you see signs proudly presenting “John Houston Custom Homes” that paint a picture of the kind of home life John would have done anything to have as a child. From a young age, home was not a place where John wanted to be. After his parents divorced and his mother moved out, his father remarried and moved in with his new family. John and his older brother struggled to adjust and began living by themselves with little to no adult supervision at the ages of 11 and 15. They helped support themselves financially by working long hours running a lawncare business before and after school. The years that followed were challenging but also marked by God's protection, even when John didn't realize it, as he overcame hardships that could have permanently derailed his life. He met and married the woman of his dreams, completed his education and became a respected and successful business owner. And he isn't confused for one second about who's ultimately responsible for his success: God. In *Finding My Way Home*, John Houston reflects on a life of trials, hardships, and painful mistakes through the lens of gratitude for God's enduring faithfulness. He explains, “God created a story with my life that puts a spotlight on His mercy and grace—a story of my anger and His forgiveness; of the broken family I grew up in and His restoration; of my demanding ‘leadership’ as a husband and father and His model for me to lead with love.” Inspiring and insightful, *Our Better Angels: Seven Simple Virtues That Will Change Your Life and the World* celebrates the shared principles that unite and enable us to overcome life's challenges together. “When the waters rise, so do our better angels.”—President Jimmy Carter Jonathan Reckford, the CEO of Habitat for Humanity, has seen time and again the powerful benefits that arise when people from all walks of life work together to help one another. In this uplifting

book, he shares true stories of people involved with Habitat as volunteers and future homeowners who embody seven timeless virtues—kindness, community, empowerment, joy, respect, generosity, and service—and shows how we can all practice these to improve the quality of our own lives as well as those around us. A Vietnam veteran finds peace where he was once engaged in war. An impoverished single mother offers her family's time and energy to enrich their neighbors' lives. A Zambian family of nine living in a makeshift tent makes room to shelter even more. A teenager grieving for his mother honors her love and memory by ensuring other people have a place to call home. A former president of the United States leads by example with a determined work ethic that motivates everyone around him to be the best version of themselves. These stories, and many others, illustrate how virtues become values, how cooperation becomes connection, and how even the smallest act of compassion can encourage actions that transform the world around us. Here are tales that will make readers laugh and cry and embrace with passion the calling of our better angels to change the way we take care of ourselves, our families, our communities, and the world. Have you started your home business and don't know what to do next? Are you getting overwhelmed with all the information and the how to do's? In this book you will learn some tips and strategies that you can use to assist you with growth of your business operation. This book focus is on helping entrepreneurs start, run and grow a successful home based business. More to come. That makes his new book *The Redneck CEO: Faith, Hope & Hard Work* an extra timely dose of real-world inspiration about the possibilities in life that are within reach against the greatest of odds. Many people in the business community are left overwhelmed, burned out, and in search of solutions as a result of today's challenges, while Findley and his grassroots perspective sheds light on answers for the disenchanted and the secret to true happiness. In *The Redneck CEO*, he takes readers through his own business journey, from making millions to losing it all and starting over, all while staying true to his principles for success: integrity, faith, and hard work. Have you always known what you wanted to be in life? What are some “watershed moments” that made you who you are? When did you get on track to become a successful CEO? It started with three questions at Davos. The younger Peter Vanham looked to the answers from the elite leaders he asked to validate his own career choice, and the rich, private wisdom he received revealed more about building a career than he'd found anywhere else. He shares it all with you in *Before I Was CEO*. • We study real estate purchases by major company CEOs, compiling a database of the principal residences of nearly every top executive in the Standard & Poor's 500 index. When a CEO buys real estate, future company performance is inversely related to the CEO's liquidation of company shares and options for financing the transaction. We also find that, regardless

of the source of finance, future company performance deteriorates when CEOs acquire extremely large or costly mansions and estates. We therefore interpret large home acquisitions as signals of CEO entrenchment. Our research also provides useful insights for calibrating utility based models of executive compensation and for understanding patterns of Veblenian conspicuous consumption. One of the greatest entrepreneurial success stories of the past twenty years

When a friend told Bernie Marcus and Arthur Blank that "you've just been hit in the ass by a golden horseshoe," they thought he was crazy. After all, both had just been fired. What the friend, Ken Langone, meant was that they now had the opportunity to create the kind of wide-open warehouse store that would help spark a consumer revolution through low prices, excellent customer service, and wide availability of products. Built from Scratch is the story of how two incredibly determined and creative people--and their associates--built a business from nothing to 761 stores and \$30 billion in sales in a mere twenty years. Built from Scratch tells many colorful stories associated with The Home Depot's founding and meteoric rise; shows that a company can be a tough, growth-oriented competitor and still maintain a high sense of responsibility to the community; and provides great lessons useful to people in any business, from start-ups to the Fortune 500.

Great Stories "Ming the Merciless": The inside account of the man who fired Arthur Blank and Bernie Marcus "My people don't drive Cadillacs!" How Ross Perot almost got involved with The Home Depot "Take this job and shove it!" The banker who put his career on the line to get The Home Depot the loan that enabled it to survive "Folks, I tell ya, if these Atlanta stores were any bigger, we'd be paying Alabama sales tax." Home Depot's first good ol' southern advertising campaign A Company with a Conscience When disasters like the Oklahoma City bombing or Hurricane Andrew happen, Home Depot associates don't ask for permission to respond. They react from their hearts--whether that means keeping their store open all night or being on the scene with volunteers and relief supplies. The Home Depot doesn't just contribute money to organizations like Habitat for Humanity and Christmas in April, but also provides its people to help lead and grow these community efforts.

Great Lessons Know your customer: In The Home Depot's case, customers don't pay for wider aisles and a pretty store, but for a wide assortment and low prices Why everyday low prices mean more sales overall: The marketing philosophy The Home Depot learned from talking with Sam Walton Market leadership: Why The Home Depot never goes to a major new market with plans to open just a few stores The strategy for profitable growth: How The Home Depot redefined its U.S. market from its \$135 billion traditional "do-it-yourself" base to a much larger pond of \$365 billion How to change the rules of the game: How The Home Depot bypassed almost all middlemen, allowing it to pass on huge savings to customers Built from Scratch is the firsthand account of how two regular guys created one of the greatest entrepreneurial successes of the last twenty years. Opening the First Store "What the hell happened? Who screwed up the store? . . . Whatever time remained before the doors were scheduled to open for the first time, we

sped around in forklifts, stomping on the brakes, scuffing up the flooring so it would once more look like a warehouse." Customer Service "If ever I saw an associate point a customer toward what they needed three aisles over, I would threaten to bite their finger. I would say, 'Don't ever let me see you point. You take the customer by the hand, and you bring them right where they need to be and you help them.'" Giving Back "When The Home Depot went public we realized that we had the financial capacity and wherewithal to give back to the communities where we did business. There is a concept in Judaism called tzedaka, which means 'to give back.' It is considered a mitzvah, a good deed, to give to someone who doesn't have, and we believe strongly in giving back to the community." Selling the Vision "We had to be psychologists, lovers, romancers, and con artists to get vendors aboard. Our ability to paint a picture of how that would take place--lowest prices, widest selection, and great customer service--was what convinced skeptical manufacturers to sell merchandise to us during the early years." The Importance of Values "I have never had anybody work for me in retailing who didn't work for me out of love, as opposed to fear. We carried this approach into building The Home Depot. We care about each other and we care about the customer. The things that we do for customers inside and outside the stores demonstrate our commitment to them. And then when something happens within the company, we circle the wagons. We help each other."
