**Rebel Girls** Mar 20 2023 Visit the Unspun website which includes Table of Contents and the Introduction. The World Wide Web has cut a wide path through our daily lives. As claims of "the Web changes everything" suffuse print media, television, movies, and even presidential campaign speeches, just how thoroughly do the users immersed in this new technology understand it? What, exactly, is the Web changing? And how might we participate in or even direct Web-related change? Intended for readers new to studying the Internet, each chapter in Unspun addresses a different aspect of the "web revolution"--hypertext, multimedia, authorship, community, governance, identity, gender, race, cyberspace, political economy, and ideology--as it shapes and is shaped by economic, political, social, and cultural forces. The contributors particularly focus on the

language of the Web, exploring concepts that are still emerging and therefore unstable and in flux. Unspun demonstrates how the tacit assumptions behind this rhetoric must be examined if we want to really know what we are saying when we talk about the Web. Unspun will help readers more fully understand and become critically aware of the issues involved in living, as we do, in a wired society. Contributors include: Jay Bolter, Sean Cubitt, Jodi Dean, Dawn Dietrich, Cynthia Fuchs, Matthew Kirschenbaum, Timothy Luke, Vincent Mosco, Lisa Nakamura, Russell Potter, Rob Shields, John Sloop, and Joseph Tabbi.

**Innocent Weapons** Sep 14 2022 Innocent Weapons: The Soviet and American Politics of Childhood in the Cold War

[The Anthropology of Learning in Childhood](#) Dec 17 2022 The Anthropology of Learning in Childhood offers a portrait of childhood across time, culture, species, and environment. Anthropological research on learning in

childhood has been scarce, but this book will change that. It demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children's learning and its role in their development, socialization, and enculturation. Further, it shows the particular contribution that children's learning makes to the construction of society and culture as well as the role that culture-acquiring children play in human evolution. Book jacket.

Anthropology and Child Development Sep 02 2021 This unprecedented collection of articles is an introduction to the study of cultural variations in childhood across the world and to the theoretical frameworks for investigating and interpreting them. Presents a history of cross-cultural approaches to child-development Recent articles examine diverse contexts of childhood in ecological, semiotic, and sociolinguistic terms Includes ethnographic studies of childhood in the Pacific, Africa, Latin America, East Asia,

Europe and North America Illuminates the process through which people become the bearers of culturally/historically specific identities Serves as an ideal text for anthropology courses focusing on childhood, as well as classes on development psychology The Anthropology of Childhood Jul 24 2023 Enriched with anecdotes from ethnography and the daily media, this revised edition examines family structure, reproduction, profiles of children's caretakers, their treatment at different ages, their play, work, schooling, and transition to adulthood. The result is a nuanced and credible picture of childhood in different cultures, past and present.

*Philosophy for Children in Transition* Dec 25 2020 *Philosophy for Children in Transition* presents a diverse collection of perspectives on the worldwide educational movement of philosophy for children. Educators and philosophers establish the relationship between philosophy and the child, and clarify the

significance of that relationship for teaching and learning today. The papers present a diverse range of perspectives, problems and tentative prospects concerning the theory and practice of Philosophy for Children today. The collection familiarises an actual educational practice that is steadily gaining importance in the field of academic philosophy. Opens up discussion on the notion of the relationship between philosophy and the child.

We Don't Do Dots Jan 26 2021 Drawing on extensive fieldwork with Barkindji Aboriginal people in the small town of Wilcannia, New South Wales, this richly textured ethnographic analysis examines how notions of Aboriginal art and Aboriginal culture are wielded as weapons of power in everyday racism in Australia.

**Playing on the Mother-ground** May 22 2023 Theorists of child development, for the most part, have taken white, middle class, Euro-American children as the norm. These "typical" children, however, are exposed to two major

enculturating influences that are by no means common across cultures: formal schooling and parents who consciously attempt to serve as teachers at home. Providing an important contribution toward a more universal understanding of child development, this book concentrates on children of the Kpelle-speaking people of West Africa, who grow up neither spending thousands of hours in quiet study nor receiving a heavy dose of parent tutelage. Acknowledging the centrality of play in children's lives, the Kpelle expect their children to play "on the mother ground," or open spaces adjacent to the areas where adults are likely to be working. Here, children observe the work that adults do as they engage in voluntary activities or "routines" that serve a clear enculturating function. With photographs and vivid first-hand description, the author demonstrates the impact of games, folklore, and other routines on early development among the Kpelle and in other non-Western cultures. He

persuasively argues that such enduring routines for raising children as those observed in the Kpelle village are universal and not limited to rural societies, though they take a variety of forms depending on the society.

Ethnographically rich and theoretically sophisticated, the book provides a sound empirical foundation for a practice-based theory of child development.

**The Anthropology of Childhood** Aug 25 2023

Enriched with findings from anthropological scholarship, this book provides a guide to childhood in different cultures, past and present.

**No Two Alike: Human Nature and Human Individuality** Jul 20 2020

A groundbreaking theory of personality. The author of the controversial book *The Nurture Assumption* tackles the biggest mystery in all of psychology: What makes people differ so much in personality and behavior? It can't just be "nature and nurture," because even identical twins who grow up together—same genes, same parents—have

different personalities. And if psychologists can't explain why identical twins are different, they also can't explain why each of us differs from everyone else. Why no two people are alike. Harris turns out to be well suited for the role of detective—it isn't easy to pull the wool over her eyes. She rounds up the usual suspects and shows why none of the currently popular explanations for human differences—birth order effects, for example, or interactions between genes and environment—can be the perpetrator she is looking for. None of these theories can solve the mystery of human individuality. The search for clues carries Harris into some fascinating byways of science. The evidence she examines ranges from classic experiments in social psychology to cutting-edge research in neuroscience. She looks at studies of twins, research on autistic children, observations of chimpanzees, birds, and even ants. Her solution is a startlingly original one: the first completely new theory of personality since Freud's. Based

on a principle of evolutionary psychology—the idea that the human mind is a toolbox of special-purpose devices—Harris's theory explains how attributes we all have in common can make us different. This is the story of a scientific quest, but it is also the personal story of a courageous and innovative woman who refused to be satisfied with "what everyone knows is true."

### **The Palgrave Handbook of Positive**

**Education** Sep 21 2020 "The approaches outlined in this volume will help expand the narrow focus on academic success to include psychological well-being for students and educators alike. It is a must-read for anyone interested in how positive outcomes such as life satisfaction, positive emotion, and meaning and purpose can be optimized in the educational settings." -- Judith Moskowitz, PhD MPH, Northwestern University Feinberg School of Medicine, USA, IPPA President 2019-2021 This open access handbook provides a comprehensive overview of the growing field of positive

education, featuring a broad range of theoretical, applied, and practice-focused chapters from leading international experts. It demonstrates how positive education offers an approach to understanding learning that blends academic study with life skills such as self-awareness, emotion regulation, healthy mindsets, mindfulness, and positive habits, grounded in the science of wellbeing, to promote character development, optimal functioning, engagement in learning, and resilience. The handbook offers an in-depth understanding and critical consideration of the relevance of positive psychology to education, which encompasses its theoretical foundations, the empirical findings, and the existing educational applications and interventions. The contributors situate wellbeing science within the broader framework of education, considering its implications for teacher training, education and developmental psychology, school administration, policy making, pedagogy, and curriculum studies. This

landmark collection will appeal to researchers and practitioners working in positive psychology, educational and school psychology, developmental psychology, education, counselling, social work, and public policy.

Margaret (Peggy) L. Kern is Associate Professor at the Centre for Positive Psychology at the University of Melbourne's Graduate School of Education, Australia. Dr Kern is Founding Chair of the Education Division of the International Positive Psychology Association (IPPA). You can find out more about Dr Kern's work at [www.peggykern.org](http://www.peggykern.org). Michael L. Wehmeyer is Ross and Mariana Beach Distinguished Professor of Special Education; Chair of the Department of Special Education; and Director and Senior Scientist, Beach Center on Disability, at the University of Kansas, United States. Dr Wehmeyer is Publications Lead for the Education Division of the International Positive Psychology Association (IPPA). He has published more than 450 peer-reviewed journal articles

and book chapters and is an author or editor of 42 texts. .

**“I Love Learning; I Hate School”** Jan 06 2022  
Frustrated by her students' performance, her relationships with them, and her own daughter's problems in school, Susan D. Blum, a professor of anthropology, set out to understand why her students found their educational experience at a top-tier institution so profoundly difficult and unsatisfying. Through her research and in conversations with her students, she discovered a troubling mismatch between the goals of the university and the needs of students. In "I Love Learning; I Hate School," Blum tells two intertwined but inseparable stories: the results of her research into how students learn contrasted with the way conventional education works, and the personal narrative of how she herself was transformed by this understanding. Blum concludes that the dominant forms of higher education do not match the myriad forms of learning that help students—people in

general—master meaningful and worthwhile skills and knowledge. Students are capable of learning huge amounts, but the ways higher education is structured often leads them to fail to learn. More than that, it leads to ill effects. In this critique of higher education, infused with anthropological insights, Blum explains why so much is going wrong and offers suggestions for how to bring classroom learning more in line with appropriate forms of engagement. She challenges our system of education and argues for a “reintegration of learning with life.”

### **Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers**

Oct 15 2022 The study of childhood in academia has been dominated by a mono-cultural or WEIRD (Western, educated, industrialized, rich, and democratic) perspective. Within the field of anthropology, however, a contrasting and more varied view is emerging. While the phenomenon of children as workers is ephemeral in WEIRD society and in the literature on child

development, there is ample cross-cultural and historical evidence of children making vital contributions to the family economy. Children’s “labor” is of great interest to researchers, but widely treated as extra-cultural—an aberration that must be controlled. Work as a central component in children’s lives, development, and identity goes unappreciated. Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers aims to rectify that omission by surveying and synthesizing a robust corpus of material, with particular emphasis on two prominent themes: the processes involved in learning to work and the interaction between ontogeny and children’s roles as workers.

*Recess Battles* Jul 12 2022 Winner of the Opie Prize from the Children's Folklore Section of the American Folklore Society As children wrestle with culture through their games, recess itself has become a battleground for the control of children's time. Based on dozens of interviews and the observation of over a thousand children

in a racially integrated, working-class public school, *Recess Battles* is a moving reflection of urban childhood at the turn of the millennium. The book debunks myths about recess violence and challenges the notion that schoolyard play is a waste of time. The author videotaped and recorded children of the Mill School in Philadelphia from 1991 to 2004 and asked them to offer comments as they watched themselves at play. These sessions in *Recess Battles* raise questions about adult power and the changing frames of class, race, ethnicity, and gender. The grown-ups' clear misunderstanding of the complexity of children's play is contrasted with the richness of the children's folk traditions. *Recess Battles* is an ethnographic study of lighthearted games, a celebratory presentation of children's folklore and its conflicts, and a philosophical text concerning the ironies of everyday childhood. Rooted in video micro-ethnography and the traditions of theorists such as Bourdieu, Willis, and Bateson, *Recess Battles*

is written for a lay audience with extensive academic footnotes. International scholar Dr. Brian Sutton-Smith contributes a foreword, and the children themselves illustrate the text with black and white paintings.

*The Evolution of Childhood* Oct 23 2020 A comprehensive Darwinian interpretation of human development which examines both the cross-cultural and universal characteristics of our growth from infancy to adolescence.

***The First 1,000 Days*** Nov 04 2021 "Your child can achieve great things." A few years ago, pregnant women in four corners of the world heard those words and hoped they could be true. Among them were Esther Okwir in rural Uganda, where the infant mortality rate is among the highest in the world; Jessica Saldana, a high school student in a violence-scarred Chicago neighborhood; Shyamkali, the mother of four girls in a low-caste village in India; and Maria Estella, in Guatemala's western highlands, where most people are riddled with parasites

and moms can rarely afford the fresh vegetables they farm. Greatness? It was an audacious thought, given their circumstances. But they had new cause to be hopeful: they were participating in an unprecedented international initiative designed to transform their lives, the lives of their children, and ultimately the world. The 1,000 Days movement, a response to recent, devastating food crises and new research on the economic and social costs of childhood hunger and stunting, is focused on providing proper nutrition during the first 1,000 days of children's lives, beginning with their mother's pregnancy. Proper nutrition during these days can profoundly influence an individual's ability to grow, learn, and work-and determine a society's long-term health and prosperity. In this inspiring, sometimes heartbreaking book, Roger Thurow takes us into the lives of families on the forefront of the movement to illuminate the science, economics, and politics of malnutrition, charting the exciting progress of this global

effort and the formidable challenges it still faces: economic injustice, disease, lack of education and sanitation, misogyny, and corruption. *The City at Eye Level* May 10 2022 Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for

anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

**Reverse Anthropology** May 18 2020 Stuart Kirsch is Assistant Professor of Anthropology at the University of Michigan. He has consulted widely on environmental issues and land rights in the Pacific, and was actively involved in the political campaign and legal case against the environmental impact of the Ok Tedi mine in Papua New Guinea.

*Dream Babies* Feb 07 2022

**An Introduction to Childhood** Aug 13 2022 In *An Introduction to Childhood*, Heather Montgomery examines the role children have played within anthropology, how they have been studied by anthropologists and how they have been portrayed and analyzed in ethnographic monographs over the last one hundred and fifty years. Offers a comprehensive overview of childhood from an anthropological perspective

Draws upon a wide range of examples and evidence from different geographical areas and belief systems Synthesizes existing literature on the anthropology of childhood, while providing a fresh perspective Engages students with illustrative ethnographies to illuminate key topics and themes

**Kinship, Law and the Unexpected** Apr 09 2022 Examines Euro-American kinship as the kinship of a specifically knowledge-based society.

*Schooling as Uncertainty* Oct 03 2021 In today's uncertain world, few beliefs remain as firmly entrenched as the optimistic view that more schooling will lead to a better life. Though this may be true in the aggregate, how do we explain the circumstances when schooling fails to produce certainty or even does us harm? *Schooling as Uncertainty* addresses this question by combining ethnography and memoir as it guides readers on a 30-year journey through fieldwork and familyhood in Tanzania

and academic life in the USA. Using reflexive, longitudinal ethnographic research, the book examines how African youth, particularly young women, employ schooling in an attempt to counter the uncertainties of marriage, child rearing, employment, and HIV/AIDS. Adopting a narrative approach, Vavrus tells the story of how her life became entangled with a community on Mount Kilimanjaro and how she and they sought greater security through schooling and, to varying degrees, succeeded.

The Art of Play Nov 23 2020 What can the art of play teach us about the art of play? Showcasing the paintings of more than one hundred Philadelphia public elementary school children, folklorist Anna Beresin's innovative book, *The Art of Play*, presents images and stories that illustrate what children do at recess, and how it makes them feel. Beresin provides a nuanced, child-centered discussion of the intersections of play, art, and learning. She describes a widespread institutionalized fear of play and

expressive art, and the transformative power of simple materials like chalk and paint. Featuring more than 150 paintings and a dozen surreal photographs of masked children enjoying recess, *The Art of Play* weaves together the diverse voices of kids and working artists with play scholarship. This book emerged from Recess Access, a service-learning project that donated chalk, ropes, balls, and hoops to nine schools in different sections of Philadelphia. A portion of the proceeds of *The Art of Play* will support recess advocacy.

The Atlas of Food Aug 01 2021 What we eat, where we eat, and how we eat: these questions are explored in this remarkable book, now with a new introduction contextualizing the atlas for 2013 and beyond. By providing an up-to-date and visually appealing understanding of important issues around global food and agriculture, *The Atlas of Food* maps out broad areas of investigation—contamination of food and water, overnutrition, micronutrient

deficiency, processing, farming, and trade—to offer a concise overview of today's food and farming concerns. Buttressed by engaging prose and vivid graphics, Erik Millstone and Tim Lang convincingly argue that human progress depends on resolving global inequality and creating a more sustainable food production system.

*A World of Babies* Jun 18 2020 'Manuals' for new parents illustrating many models of babyhood, shaped by different values and cultures.

Child Helpers Jan 18 2023 In most of the worlds' distinct cultures, children - from toddlerhood - eagerly volunteer to help others with their chores. Laboratory research in child psychology supports the claim that the helper "stage" is biologically based. This Element examines the development of helping in varied cultural contexts, in particular, reviewing evidence for supportive environments in the ethnographic record versus an environment that extinguishes the drive to be helpful in WEIRD children. In the

last section, the benefits of the helper stage are discussed, specifically the development of an ability to work and learn collaboratively.

**Child Migration in Africa** May 30 2021 Child Migration in Africa explores the mobility of children without their parents within West Africa. Drawing on the experiences of children from rural Burkina Faso and Ghana, the book provides rich material on the circumstances of children's voluntary migration and their experiences of it. Their accounts challenge the normative ideals of what a 'good' childhood is, which often underlie public debates about children's migration, education and work in developing countries. The comparative study of Burkina Faso and Ghana highlights that social networks operate in ways that can be both enabling and constraining for young migrants, as can cultural views on age- and gender-appropriate behaviour. The book questions easily made assumptions regarding children's experiences when migrating independently of

their parents and contributes to analytical and cross-cultural understandings of childhood. Part of the groundbreaking Africa Now series, *Child Migration in Africa* is an important and timely contribution to an under-researched area.

[The Language Gap](#) Apr 28 2021 *The Language Gap* provides an accessible review of the language gap research, illuminating what we know and what we do not know about the language development of youth from working and lower socioeconomic classes. Written to offer a balanced look at existing literature, this text analyzes how language gap research is portrayed in the media and how debatable research findings have been portrayed as common sense facts. This text additionally analyzes how language gap research has impacted educational policies, and will be the first book-length overview addressing this area of rapidly growing interest.

**Studying Children and Schools** Apr 16 2020  
**Cross-cultural Studies in Cognition and**

**Mathematics** Mar 28 2021

**The Oxford Handbook of Moral**

**Development** Dec 05 2021 The nature of people's moral lives, the similarities and differences in the moral concepts of individuals and groups, and how these concepts emerge in the course of human development are topics of perennial interest. In recent years, the field of moral development has turned from a focus on a limited set of theories to a refreshingly vast array of research questions and methods. This handbook offers a comprehensive, international, and up-to-date review of this research on moral development. Drawing together the work of over 90 authors, hailing from diverse disciplines such as anthropology, education, human development, psychology and sociology, the handbook reflects the dynamic nature of the field. Across more than 40 chapters, this handbook opens the door to a broad view of moral motives and behaviors, ontogeny and developmental pathways, and contexts that

children, adolescents, and adults experience with respect to morality. It offers a comprehensive and timely tour of the field of moral development.

Child Soldiers Aug 21 2020 Compelling and humane, this book reveals the lives of the 300,000 child soldiers around the world, challenging stereotypes of them as predators or a lost generation. Kidnapped or lured by the promise of food, protection, revenge, or a better life, children serve not only as combatants but as porters, spies, human land mine detectors, and sexual slaves. Nearly one-third are girls, and Michael Wessells movingly reveals the particular dangers they face from pregnancy, childbirth complications, and the rejection they and their babies encounter in their local contexts. Based mainly on participatory research and interviews with hundreds of former child soldiers worldwide, Wessells allows these ex-soldiers to speak for themselves and reveal the enormous complexity of their experiences and situations.

The author argues that despite the social, moral, and psychological wounds of war, a surprising number of former child soldiers enter civilian life, and he describes the healing, livelihood, education, reconciliation, family integration, protection, and cultural supports that make it possible. A passionate call for action, Child Soldiers pushes readers to go beyond the horror stories to develop local and global strategies to stop this theft of childhood.

**Different Faces of Attachment** Jun 30 2021

This groundbreaking reconceptualization of attachment theory brings together leading scholars from psychology, anthropology and related fields to reformulate the theory to fit the cultural realities of our world. It will be of particular interest to scholars and graduate students interested in developmental psychology, developmental anthropology, evolutionary biology and cross-cultural psychology.

**Child Psychology and Psychiatry** Nov 16 2022

Written by leading clinicians and research experts in the fields of child development and psychopathology, this book is an authoritative and up to date guide for psychologists, psychiatrists, paediatricians and other professionals working with vulnerable children. The opening chapters outline neurobiological, genetic, familial and cultural influences upon child development, especially those fostering children's resilience and emotional wellbeing. Discussion of the acquisition of social and emotional developmental competencies leads on to reviews of child psychopathology, clinical diagnoses, assessment and intervention. Developed with busy professionals and trainees in mind, it is comprehensively yet concisely written, using visual aids to help the reader absorb information rapidly and easily. This book is an essential purchase for those working or training in all clinical and community child settings.

**The Cultural Nature of Attachment** Jun 11

2022 Multidisciplinary perspectives on the cultural and evolutionary foundations of children's attachment relationships and on the consequences for education, counseling, and policy. It is generally acknowledged that attachment relationships are important for infants and young children, but there is little clarity on what exactly constitutes such a relationship. Does it occur between two individuals (infant-mother or infant-father) or in an extended network? In the West, monotropic attachment appears to function as a secure foundation for infants, but is this true in other cultures? This volume offers perspectives from a range of disciplines on these questions. Contributors from psychology, biology, anthropology, evolution, social policy, neuroscience, information systems, and practice describe the latest research on the cultural and evolutionary foundations on children's attachment relationships as well as the implications for education, counseling, and

policy. The contributors discuss such issues as the possible functions of attachment, including trust and biopsychological regulation; the evolutionary foundations, if any, of attachment; ways to model attachment using the tools of information science; the neural foundations of attachment; and the influence of cultural attitudes on attachment. Taking an integrative approach, the book embraces the wide cultural variations in attachment relationships in humans and their diversity across nonhuman primates. It proposes research methods for the culturally sensitive study of attachment networks that will lead to culturally sensitive assessments, practices, and social policies. Contributors Kim Bard, Marjorie Beeghly, Allyson J. Bennett, Yvonne Bohr, David L. Butler, Nandita Chaudhary, Stephen H. Chen, James B. Chisholm, Lynn A. Fairbanks, Ruth Feldman, Barbara L. Finlay, Suzanne Gaskins, Valeria Gazzola, Ariane Gernhardt, Jay Giedd, Alma Gottlieb, Kristen Hawkes, William D. Hopkins,

Johannes Johow, Elfriede Kalcher-Sommersguter, Heidi Keller, Michael Lamb, Katja Liebal, Cindy H. Liu, Gilda A. Morelli, Marjorie Murray, Masako Myowa-Yamakoshi, Naomi Quinn, Mariano Rosabal-Coto, Dirk Scheele, Gabriel Scheidecker, Margaret A. Sheridan, Volker Sommer, Stephen J. Suomi, Akira Takada, Douglas M. Teti, Bernard Thierry, Ross A. Thompson, Akemi Tomoda, Nim Tottenham, Ed Tronick, Marga Vicedo, Leslie Wang, Thomas S. Weisner, Relindis D. Yovsi

**Why Youth is Not Wasted on the Young** Mar 08 2022 Why Youth is Not Wasted on the Young examines the nature of childhood through an evolutionary lens and argues that childhood is an essential stage of development with its own unique purposes, separate from those of adulthood; a time of growth and discovery that should not be rushed. Written by a renowned developmental psychologist Examines the role that our period of immaturity plays on the social, emotional, and educational needs of today's

children Challenges common perceptions of children as simply “adults in training”

The Swedish Room Feb 24 2021 Beautiful images reveal the Swedish room as a work of art that has a place in every home.

**At Home in the Street** Feb 19 2023 This book lays bare the received truths about the lives of Brazilian street children.

*Raising Children* Jun 23 2023 An intriguing, sometimes shocking, journey across the world to show how children are raised in different cultures.

**Anthropology of Pregnancy Loss** Apr 21 2023 How much influence does culture have on a mother's reactions to pregnancy loss? At what stage is a fetus attributed with human status? How does this affect the mother's reactions to the loss of a baby? Contemporary, historical and oral-history accounts from regions as diverse as rural North India, urban America, South Africa and Northern Ireland, provide a fascinating insight into the experience and management of

miscarriage across a number of different cultures. The authors explore how the social, technological and medical context in which miscarriages occur can affect the ways in which women experience such an event. In the West, advances in medical technology, a low infant-mortality rate and a low birth rate have raised expectations as to the successful outcome of each pregnancy. In addition, the early confirmation of pregnancy makes consequent pregnancy loss -- which might have gone unnoticed or unconfirmed in the past -- all the more difficult for mothers in the West. Yet, mourning rituals and behaviour at a pregnancy loss, which may be elaborate in some societies, are generally considered to be inappropriate in many Western societies. Differing social beliefs regarding the causes of miscarriage, preventative measures and curative treatments are also examined. Medical anthropologists, sociologists and health professionals will all find this book fascinating reading.
