Parse Galaxy Books 1-3 Jan 17 2023 From Book 1:
Space travel is so overrated. Bounty hunting isn't any better, but it's what Sloane Tarnish needs to do if she wants to fix the rundown spaceship her uncle dumped on her. So she can find him and dump it right back. Problem A: Her uncle also ditched his motley crew—made up of a cranky ace pilot and an extraneous mad scientist—and they don't exactly see her as the captain. Problem B: Her ship's too broken to leave the most dangerous system in the galaxy, where a recent power vacuum is turning the place into one orbiting cluster of fugitives, thugs, and swindlers. When Sloane sets her sights on a bounty with a reward that will solve all her problems, the Commander of the Galactic Fleet himself shows up in pursuit of the same man. The last thing Sloane needs is to get tangled in a web of galactic politics—but she won't let her prize go, either. The payoff is just too big to give up. But as dangers close in on all sides, she can't help wondering if

she'll live to claim her prize... Space Opera Aug 12 2022 2019 HUGO AWARD FINALIST, BEST NOVEL The Hitchhiker's Guide to the Galaxy meets the joy and glamour of Eurovision in bestselling author Catherynne M. Valente's science fiction spectacle, where sentient races compete for glory in a galactic musical contest...and the stakes are as high as the fate of planet Earth. A century ago, the Sentience Wars tore the galaxy apart and nearly ended the entire concept of intelligent space-faring life. In the aftermath, a curious tradition was invented—something to cheer up everyone who was left and bring the shattered worlds together in the spirit of peace, unity, and understanding. Once every cycle, the great galactic civilizations gather for the Metagalactic Grand Prix—part gladiatorial contest, part beauty pageant, part concert extravaganza, and part continuation of the wars of the past. Species far and wide compete in feats of song, dance and/or whatever facsimile of

these can be performed by various creatures who may or may not possess, in the traditional sense, feet, mouths, larynxes, or faces. And if a new species should wish to be counted among the high and the mighty, if a new planet has produced some savage group of animals, machines, or algae that claim to be, against all odds, sentient? Well, then they will have to compete. And if they fail? Sudden extermination for their entire species. This year, though, humankind has discovered the enormous universe. And while they expected to discover a grand drama of diplomacy, gunships, wormholes, and stoic councils of aliens, they have instead found glitter, lipstick, and electric guitars. Mankind will not get to fight for its destiny—they must sing. Decibel Jones and the Absolute Zeroes have been chosen to represent their planet on the greatest stage in the galaxy. And the fate of Earth lies in their ability to rock.

Legacy Code is a suspenseful and dark genetic engineering science fiction series that has earned five star reviews from fans of some of the best sci-fi and fantasy books like Hunger Games, Divergent, and Red Rising, and has been compared favorably to Wool, 1984, and the new Battlestar Galactica. What readers are saying: If you like mysteries and/or sci-fi you will love this book!!!

"This is a very good story that has your heart pounding as you turn the pages. Intrigue, nefarious plots, twists and turns around every corner - great series, even if you're not a fan of science fiction."

"From the moment I read the first paragraph of Paragon, up until the last sentence, I was enthralled. Non-stop, on edge, exciting action. I honestly couldn't put a fault on this one, I loved all of it, including the song! The Fractured Era series is still up there amongst my favourite novels of the year."

"Full of questions, traitors galore, secrets & suspicions. You can't even trust your own family in this world!" Phenomenal...that's the best word to describe it. Autumn Kalquist manages to weave a

tale that is jam packed with suspense and whodunit plots. Just loved it with it many twists and turns that keeps you on your toes. The characters were great and you just didn't know who to trust in the conspiracy that was going on. ...Highly recommended series and anxious to read the next book. I love all of this author's books. I have read many post-apocalyptic and dystopian tales and this is different from all the rest. She always keeps me guessing. My only complaint is she doesn't write them fast enough!! I believe this is the first 5 star rating I've ever given. LOVED IT! Such a great follow up to Legacy Code (which ended up on my Top Ten 2014 list) I love Autumn's writing style, she is so talented and takes you right there alongside the characters. This is a beautiful and unique story and I can't wait to read more!! "In a story where I fell in love with the characters, it is easy to have your heart broken, have a smile on your face, or cry over a simple scene in the book. This is one series I would never stop reading, and admittedly, have read on more than one occasion!" "This series has me intrigued, it feels realistic, real and frightening at the same time. Humanity is alone in space in their fleet of ships and they have nowhere to go, they try to find a better earth, a new home. I want to know if they ever find it." keywords: science fiction best

When he is given the chance to take on a dangerous yet lucrative mission to find and capture the mysterious Starcrazer device, rumoured to have the power to move the stars themselves, it seems like his luck is about to turn. He gathers a motley crew: an ex-navy pilot suffering from random black-outs; a Jindalar groupie hiding a shocking secret; a strapping Andron mechanic unable to step foot on any planet; and an eccentric doctor. Together, they take their battered Rutger-class cargo ship on a journey to uncharted star systems, luxurious space stations, and, against all odds, up against the unyielding Dawn Alliance Navy. But Tredd is hiding a superhuman secret: the ability to stop time. It is both a blessing that has kept him alive through many a suicide mission, and a curse that has dragged him down. As he travels across the universe, he finds that he can no longer ignore his past, and must face his lost childhood sweetheart and the men who betrayed him years ago. As he begins to close in on the Starcrazer, so do other,

Soldier's Duty (Return of the Aghyrians Book 3) Apr 20 2023 Izramith Ezmi is many things: a member of the feared, all-female Hedron guards, a war veteran recently returned from a pointless and bloody mission, and impatient, angry and above all, lonely. With her contract about to run out, she may be on her way to becoming a ruthless mercenary, since what she really wants--becoming a mother--is out of the question. Her family carries a gene that causes deeply malicious madness. Her nephew was born with it and her useless sister has left him in the care of an institute. A baby. Two days old. She wants to ask her uncle, himself born with the condition, if he can do anything for the boy. But her uncle and his band of mad outcasts have gone missing, rumoured to be on the world of Ceren. So Izramith takes another hired-gun contract in Barresh which is a city-state on Ceren. The job is to provide security at a high-profile wedding. Simple and straight-forward, right? No crawling in mud, no shoot-outs, no

mangled bodies and blood-drenched soil. And meanwhile, she can try to find her uncle. Except he isn't there, and the job isn't simple. Izramith and her team discover evidence of an extensive spying ring. Who is spying and why? The dictatorship of the neighbouring nation of Miran has plenty of reasons to dislike Barresh, and the city has a large group of people disgruntled with the pace of recent reforms. But most importantly, people have gone missing from the streets of Barresh for years. No one has cared much, because they were from disenfranchised groups, but Izramith sees the link with her uncle's disappearance, and with the spying ring, and knows that the security of the entire city is severely compromised. Postponing the wedding would be an admission of defeat, so it's time for desperate measures. Izramith leads a small team in what has to go down as the most hare-brained mission to ever be undertaken in the universe. Much is at stake: peace, the lives of her uncle and her nephew, and her own.

The Travelers Book 3 a Space Opera Jul 11 2022
This is departure from the first two books. It is a space opera but unlike other space operas, it is not about some evil alien race from some planet with an unpronounceable name trying to take over the Earth. An ancient, mysterious civilization, called the Creators, seed humans on hundreds of Earth like planets in a distant galaxy. Some of these planets are very similar to Earth and others vary slightly to drastically different to Earth in climate, atmosphere and gravity. Over tens of thousands of years, the humans have evolved into different races to survive in their new homes. In one vast section of these planets two dominate empires rose and fought a war that lasted hundreds of years. Abruptly the war stopped and the humans of the two factions disappeared. Ten thousand years later the Creators selected a few humans from earth and gave them little to no guidance or direction as to why they were brought into this experiment. The supposition was they were to try and get this vast collection of humans on hundreds of planets to stop their petty wars and work together towards a common good.

This of course is an impossible task full adventure and fun times.

But the old powers could not allow them to thrive and have now set in motion new plots to destroy all that they've built. In the fire to come they will face down their greatest struggle yet. Amachi Adisa and other young leaders will contend with each other for the power to galvanize their people and chart the

The Cruel Stars Nov 22 2020 In this epic sci-fi

adventure for fans of *The Expanse* and *Battlestar Galactica*, five intrepid heroes must unite to save civilization after a long-dormant enemy awakens and strikes a devastating blow “This jarring, engrossing story of a species-wide fight for survival is recommended for all science fiction readers.”—*Publishers Weekly* (starred review) The galaxy was once terrorized by the Sturm, a group of “species purists” intent on destroying any human with genetic or cybernetic enhancements. Fashioning themselves as the one true “Human Republic,” the Sturm cut a bloody swath across the stars, killing billions before finally being defeated and driven into the far reaches of Dark Space. Centuries of peace bred complacency. Everyone believed the Sturm had died out in the Dark. They were wrong. The enemy has returned and, with a brutal and decisive attack, knocks out almost all of humanity’s defenses. Now on the brink of annihilation, humankind’s only hope is a few brave souls who survived the initial attack: Commander Lucinda Hardy, thrust into uncertain command of the Royal Armadalen Navy’s only surviving warship. Booker3, a soldier of Earth, sentenced to die for treason, whose time on death row is cut short when the Sturm attack his prison compound. Princess Alessia, a young royal of the Montanblanc

Corporation, forced to flee when her home planet is overrun and her entire family executed. Sephina L'trel, the leader of an outlaw band who must call on all of her criminal skills to resist the invasion. And, finally, Admiral Frazer McLennan, the infamous hero of the first war with the Sturm hundreds of years ago, who hopes to rout his old foes once and for all—or die trying. These five flawed, reluctant heroes must band together to prevail against a relentless enemy and near-impossible odds. For if they fail, the future itself is doomed. "Frenetic action viewed in a black fun-house mirror."—Kirkus Reviews
