DigiCat Publishing presents to you this special edition of "The New English Canaan of Thomas Morton with Introductory Matter and Notes" by Thomas Morton. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. A pioneer of artificial intelligence shows how the study of causality revolutionized science and the world 'Correlation does not imply causation.' This mantra was invoked by scientists for

decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we can think better. Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, *Terminus Est*. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*. The Learning Church series offers a range of brief and accessible introductions to the key themes of Christian discipleship and theology. *Conversations with the New Testament* introduces

the major themes and critical issues of the New Testament in a way that relates them to current experience, context and culture. The starting point is the reader's own experience and engagement with Scripture in a variety of different contexts.

The fundamental guide to the most effective treatments for Parkinson's Disease, from a Mayo Clinic doctor with thirty years of clinical and research experience. In this second edition follow-up to the extremely successful first edition, Dr. Ahlskog draws on thirty years of clinical experience to present the definitive guide to dealing with all aspects of Parkinson's Disease, from treatment options and side effects to the impact of the disease on caregivers and family. Dr. Ahlskog's goal is to educate patients so that they can better team up with their doctors to do battle with the disease, streamlining the decision-making process and enhancing their treatment. To do this, Dr. Ahlskog offers a gold mine of information, distilled from his years of experience treating people with Parkinson's at the Mayo Clinic. In addition to providing a comprehensive account of Parkinson's medications, this book also examines additional aspects of treatment, such as the role of nutrition, exercise, and physical therapy. Although many commendable texts have been written on the subject of Parkinson's Disease, their discussions of treatment have not been in depth. Dr. Ahlskog sifts through aspects of the disease in order to give the reader a comprehensive sense of Parkinson's and the best available treatment options. With a broader understanding of the disease and the available options, patients are able to make

more informed choices, and doctors are able to provide more tailored care. This book delivers hopeful, helpful, and extensive information to all parties concerned: patients, caregivers, and doctors. The ultimate guide to symptoms and treatment, this thoroughly updated second edition is the first place patients should turn for reliable, easy-to-grasp information on Parkinson's Disease. First there was downtown. Then there were suburbs. Then there were malls. Then Americans launched the most sweeping change in 100 years in how they live, work, and play. *The Edge City*. “A well-told, powerful story. Backderf is quite skilled in using comics to tell this tale of a truly weird and sinister 1970s adolescent world.” —R. Crumb NATIONAL BESTSELLER Named a BEST OF 2012 by Time, The Village Voice, A.V. Club, comiXology, Boing Boing, Publishers Weekly, MTV Geek, and more! “ASTOUNDING.” —Lev Grossman, Time You only think you know this story. In 1991, Jeffrey Dahmer—the most notorious serial killer since Jack the Ripper—seared himself into the American consciousness. To the public, Dahmer was a monster who committed unthinkable atrocities. To Derf Backderf, Dahmer was a much more complex figure: a high school friend with whom he had shared classrooms, hallways, and car rides. In *My Friend Dahmer*, a haunting and original graphic novel, writer-artist Backderf creates a surprisingly sympathetic portrait of a disturbed young man struggling against the morbid urges emanating from the deep recesses of his psyche—a shy kid, a teenage

alcoholic, and a goofball who never quite fit in with his classmates. With profound insight, what emerges is a Jeffrey Dahmer that few ever really knew, and readers will never forget. This new paperback edition will coincide with the release of the movie adaptation of *My Friend Dahmer* and will include additional bonus content from the author archives.

Fighting with French : A Tale of the New Army At six o'clock next morning sergeant-majors and corporals went round the hall stirring up the sleepers. There were groans and grumbles, but the men turned out, and there was a general dash for the washing basins--one among twenty men--and a free fight for the razors. Our two friends had brought their own safeties and pocket mirrors, and when they had finished operating upon their downy cheeks there was a competition among their new messmates for the loan of those indispensable articles. "Your bristles will ruin a blade in no time, Ginger," said Harry, as he handed over the razor, somewhat ruefully. "Perseverance, that's all you want," replied Ginger, through the lather. "Yours 'll be as hard as mine in time." At half-past six each man seized a mug and rushed off to the cook-house across the yard for cocoa. They sat about the hall, swilling the morning beverage, grumbling at the blankets, asking one another who'd be a soldier; then they rubbed up their boots and made their beds, and were ready for the seven o'clock parade. Dressed only in their shirts and slacks they formed up in the drill-hall. There was a good deal of disorder, and the N.C.O.'s, in early-morning temper, roared above the din. It happened that Dick

Kennedy was orderly officer for the week. When the men were at last ranged in ranks, dressed, and numbered by the sergeants, he posted himself in front and, with a nervous twitching of the lips, said gently— "Battalion, 'shun!" "Louder, louder!" whispered a fellow-officer who had come up behind him. "This isn't a mothers' meeting." The second lieutenant tried again. "Battalion, 'shun! Advance in fours from the right. Form fours!" Some of the men knew what to do, but many of the new recruits looked about them blankly. "You don't know the movements?" said the lieutenant. "Well, when I say 'form fours,' even numbers take one pace to the left with the left foot and one pace to the right with the right. Now, form fours!" The result was disorder--jostling in the ranks, cries of "Who're you a-shoving of!" "Sorry! My mistake!" said Kennedy, with a smile. "We'll try again. I should have said, 'one pace to the rear with the left foot.' Now then, form fours!" His cheerfulness won the men's sympathy, and the order being now correctly carried out, one or two of them cheered. "Silence in the ranks!" roared Kennedy. "Right! Quick march!" and the battalion marched off. The day's work began with a run for three-quarters of an hour, to the bank of a river some two miles away. A "run" so called, for it consisted of slow and quick march and doubling in turn. At eight o'clock they were back in the hall for breakfast: tea, bread and bacon, sausage or cheese. The provisions were good, the men had healthy appetites, and at 9.15, when the battalion orders of the day were read, they were contented and cheerful. Written by a

parent, for parents, this opinionated, personal, and easy-to-use guide has hundreds of ideas to keep the kids entertained for an hour, a day, or a weekend! Fun with the Family Upstate New York leads the way to amusement parks, historical attractions, children's museums, wildlife habitats, festivals, parks, and many other exciting places to go. The whole family will enjoy . . . Flume zooming at the Catskills' largest water park, fly-fishing on the Willowemoc, or hiking to Huckleberry Point Immersing themselves in the wonderful world of America's pastime at the National Baseball Hall of Fame & Museum in Cooperstown Exploring Ithaca's nationally acclaimed Sciencenter, or traveling through a huge heart and brain at the Rubenstein Museum in Syracuse Standing in awe before Taughannock Falls or Niagara Falls Despite popular belief to the contrary, entrepreneurship in the United States is dying. It has been since before the Great Recession of 2008, and the negative trend in American entrepreneurship has been accelerated by the Covid pandemic. New firms are being started at a slower rate, are employing fewer workers, and are being formed disproportionately in just a few major cities in the U.S. At the same time, large chains are opening more locations. Companies such as Amazon with their "deliver everything and anything" are rapidly displacing Main Street businesses. In *The New Builders*, we tell the stories of the next generation of entrepreneurs -- and argue for the future of American entrepreneurship. That future lies in surprising places -- and will in particular rely on the success of women,

black and brown entrepreneurs. Our country hasn't yet even recognized the identities of the New Builders, let alone developed strategies to support them. Our misunderstanding is driven by a core misperception. Consider a "typical" American entrepreneur. Think about the entrepreneur who appears on TV, the business leader making headlines during the pandemic. Think of the type of businesses she or he is building, the college or business school they attended, the place they grew up. The image you probably conjured is that of a young, white male starting a technology business. He's likely in Silicon Valley. Possibly New York or Boston. He's self-confident, versed in the ins and outs of business funding and has an extensive (Ivy League?) network of peers and mentors eager to help his business thrive, grow and make millions, if not billions. You'd think entrepreneurship is thriving, and helping the United States maintain its economic power. You'd be almost completely wrong. The dominant image of an entrepreneur as a young white man starting a tech business on the coasts isn't correct at all. Today's American entrepreneurs, the people who drive critical parts of our economy, are more likely to be female and non-white. In fact, the number of women-owned businesses has increased 31 times between 1972 and 2018 according to the Kauffman Foundation (in 1972, women-owned businesses accounted for just 4.6% of all firms; in 2018 that figure was 40%). The fastest-growing group of female entrepreneurs are women of color, who are responsible for 64% of new women-owned

businesses being created. In a few years, we believe women will make up more than half of the entrepreneurs in America. The age of the average American entrepreneur also belies conventional wisdom: It's 42. The average age of the most successful entrepreneurs -- those in the top .01% in terms of their company's growth in the first five years -- is 45. These are the New Builders. Women, people of color, immigrants and people over 40. We're failing them. And by doing so, we are failing ourselves. In this book, you'll learn: How the definition of business success in America today has grown corporate and around the concepts of growth, size, and consumption. Why and how our collective understanding of "entrepreneurship" has dangerously narrowed. Once a broad term including people starting businesses of all types, entrepreneurship has come to describe only the brash technology founders on the way to becoming big. Who are the fastest growing groups of entrepreneurs? What are they working on? What drives them? The real engine that drove Silicon Valley's entrepreneurs. The government had a much bigger role than is widely known The extent to which entrepreneurs and small businesses are woven through our history, and the ways we have forgotten women and people of color who owned small businesses in the past. How we're increasingly afraid to fail The role small businesses are playing saving the wilderness, small
