Alternative Goals in Religion Jul 27 2020

"Religions", Mahatma Gandhi once said, "are different roads converging to the same point".

But in this stimulating assessment of Christianity, Buddhism, and Vedanta, Professor Burch develops the revolutionary theory that religions, starting from the same point, take divergent roads to different goals incompatible one with the other. Whereas Gandhi asks, "What does it matter that we take different roads so long as we reach the same goal?" Dr. Burch asks, "What does it matter that in taking different roads we reach different goals?"

Religions, he maintains, do not have to fight each other because of their differences, or abolish their differences to avoid fighting. He is a firm believer in coexistence for religions.

Ecumenicity is good "in so far as it means, on the one hand, cooperation with other faiths in their common concerns of social activities and resistance to irreligion, and on the other hand mutual respect for the other faiths themselves". Dr. Burch argues for the coexistence of three alternative Absolutes: Truth (or Absolute Self as ultimate reality) which corresponds to the religion of Hindu Advaita Vedanta, Absolute Freedom which corresponds to Buddhism, and love (or Absolute Feeling) which corresponds to

Christianity. The religious quest requires absolute commitment to one or other of these irreducible alternatives; not to truth and freedom and love, but to truth or freedom or love. In his Foreword, Professor W. Norris Clarke, S.J., of Fordham University, subjects Dr. Burch's theory to the most rigorous critical analysis, but in the end invites each reader to make the effort himself of coming to grips with the author's profound and original challenge. What and where is Religious Truth Today? May 17 2022 What is our human existence on planet earth all about? What is the explanation of & solution to the ever increasing problems plaguing our world? What lies behind the deep-seated differences of religious belief? A challenged scientist gives the answer indicated by all facts & evidences after thirty years of contacts, observations & analysis. An all-inclusive, all-consistent framework brings meaning to historical & current developments - to Israel & the Jews; to the Christian church; to the United States & its world leadership. Where does each stand now, & what lies ahead? In 1963 Belknap, a physicist, founder of SERFI, & author of the book, received a Decoration for Exceptional Civilian Service, the highest award given by the U.S. Army to civilian employees. His achievement was included in the HALL OF FAME "commemorating the 80th anniversary of the Civil Service Act... illustrating the creative abilities of Department of the Army civilians." Expressions which have been used to describe the book & things presented in it - depending on the point of view - are: "Astounding!", "Devastating!", "Fantastically enlightening!", "Tremendously reassuring!", "Most revealing book of the century!".

The Question of Theological Truth Apr 15 2022 In today's world, the boundaries within which Christian theologians operate are becoming ever more permeable, and Christian theology is increasingly influenced and challenged by multiple 'outside' factors. In Western Europe, two such factors stand out in particular: the so-called 'turn to religion' in continental philosophy and religious diversity. Theologians working with contemporary continental philosophers and theologians engaging the multireligious world tend to work quite separately from one another. The aim of the

present book is therefore to initiate a conversation between these two groups of theologians. The question of truth was chosen because it is both a key issue in contemporary-philosophical debates (in the continental and analytic traditions) and one that arises in complex and problematic ways in the praxis of, and theoretical reflection on, interreligious dialogue. Some of the pressing questions that are addressed by the contributors to this volume are: What is truth? What is theological truth? How does the issue of truth arise from interreligious encounter? To what extent can or should the nature of truth be discussed explicitly during interreligious dialogue? Or should the question of truth be rather postponed in the interest of successful interreligious encounter? Is there a hermeneutical concept of truth and, if so, how can it be of help for theological reflection on the question of truth and on the role and place of truth in the context of dialogue between religions?

Prayer and Its Remarkable Answers Sep 20 2022 Excerpt from *Prayer and Its Remarkable Answers: Being a Statement of Facts in the Light of Reason and Revelation* And is there room for another book on Prayer, after the treatises upon this fruitful theme, from the time of the Christian Fathers to the present day? In answering this inquiry, one must remember, that each age of the world must have its own literature. There must then be books to meet present phases of religious experience, even if the truths discussed made part of the most ancient faith. Prayer has had its interest, as a doctrine and as a practice, in all the centuries, and it is still the strength of the believer, and the scofi' of the infidel. An attempt is made in this volume to give, in a popular form, the facts and the philosophy of the subject. It is written for the people yet it assumes that they are neither chil dren nor fools, and will welcome an intelligent discussion of a fundamental question. The first seven chapters aim, therefore, to elucidate the nature, characteristics, methods and conditions of Prayer to show its true place in the system of the universe and to answer the specious objections of the sceptics. The argument is designed to be thorough, without being dry and abstruse. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The Truth Mar 03 2021 *The Truth* is the award-winning first book in The Oracle Institute foundational trilogy. It presents a summary of the divine messages sent to us by God through the Prophets. When studied successively, these spiritual lessons form a "Tower of Truth" that should not be broken or interpreted along sectarian lines. Instead, these Truths should be

assimilated into a contemporary spiritual and scientific database and shared by everyone, regardless of religious affiliation. *The Truth* explores the five primary religions that evolved after the Prophets died: Hinduism, Judaism, Buddhism, Christianity, and Islam, to determine whether these manmade religions have remained faithful to the Truth, including the primordial Truth that God is half masculine and half feminine energy. The Truth reveals that mankind has built a "Tower of Babel" with God's messages. Moreover, these now ancient religions have polarized humanity and brought us to the brink of World War III. The book also includes an objective template for measuring the adequacy of any religion, and an Appendix that shows the nexus between politics and religion and politics thought human history.

The Changing Global Religious Landscape Jun 05 2021

Faith Versus Fact Jul 31 2023 The New York Times bestselling author of *Why Evolution Is True* explains why religion has no place in science In his provocative new book, evolutionary biologist Jerry A. Coyne lays out in clear, dispassionate detail why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne sees a national climate in which over half of Americans don't believe in evolution (and Congressmen deny global warming), and warns that religious prejudices and strictures in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable "truth" by subjecting those claims to the same tests we use to establish truth in science. Any attempt to make religion compatible with science is doomed to fail. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in.

Science and Religion in Quest of Truth Aug 08 2021 From the vantage point of eighty years, a highly regarded scientist and theologian surveys the full spectrum of critical issues between science and theology John Polkinghorne, an international figure known both for his contributions to the field of theoretical elementary particle physics and for his work as a theologian, has over the years filled a bookshelf with writings devoted to specific topics in science and religion. In this new book, he undertakes for the first time a survey of all the major issues at the intersection of science and religion, concentrating on what he considers the essential insights for each. Clearly and without assuming prior knowledge, he addresses causality, cosmology, evolution, consciousness, natural theology, divine providence, revelation, and scripture. Each chapter also provides references to his other books in which more detailed treatments of specific issues can be found. For those who are new to what Polkinghorne calls "one of the most significant interdisciplinary interactions of our time," this volume serves as an excellent introduction. For readers already familiar with John Polkinghorne's books, this latest is a welcome reminder of the breadth of his thought and the subtlety of his approach in the quest for truthful understanding.
