*Contested Knowledge* Aug 15 2022 In the sixth edition of *Contested Knowledge*, social theorist Steven Seidman presents the latest topics in social theory and addresses the current shift of 'universalist theorists' to networks of clustered debates. Responds to current issues, debates, and new social movements Reviews sociological theory from a contemporary perspective Reveals how the universal theorist and the era of rival schools has been replaced by networks of clustered debates that are relatively 'autonomous' and interdisciplinary Features updates and in-depth discussions of the newest clustered debates in social theory—intimacy, postcolonial nationalism, and the concept of 'the other' Challenges social scientists to renew their commitment to the important moral and political role social knowledge plays in public life

**The Laws of the Knowledge Workplace** Dec 27 2020 In *The Laws of the Knowledge Workplace*, Dr Jemielniak has collected research-based chapters providing deep, interdisciplinary insight into knowledge professions, addressing issues of professional identity, emotion, power and authority, trust and indoctrination, and management behaviour. The accounts and studies in this book come from management, organization studies, sociology, and anthropology of work perspectives and are fully international in scope. They highlight the scale of the serious changes in occupational roles and to the meaning of work that is taking place in knowledge-intensive environments and give a pointer to what might constitute good and bad management practice in knowledge-intensive companies.

**How Knowledge Grows** Jul 26 2023 An argument that the development of scientific practice and growth of scientific knowledge are governed by Darwin's evolutionary model of descent with modification. Although scientific investigation is influenced by our cognitive and moral failings as well as all of the factors impinging on human life, the historical development of scientific knowledge has trended toward an increasingly accurate picture of an increasing number of phenomena. Taking a fresh look at Thomas Kuhn's 1962 work, *The Structure of Scientific Revolutions*, in *How Knowledge Grows* Chris Haufe uses evolutionary theory to explain both why scientific practice develops the way it does and how scientific knowledge expands. This evolutionary model, claims Haufe, helps to explain what is epistemically special about scientific knowledge: its tendency to grow in both depth and breadth. Kuhn showed how intellectual communities achieve consensus in part by discriminating against ideas that differ from their own and isolating themselves intellectually from other fields of inquiry and broader social concerns. These same characteristics, says Haufe, determine a biological population's degree of susceptibility to modification by natural selection. He argues that scientific knowledge grows, even across generations of variable groups of scientists, precisely because its development is governed by Darwinian evolution. Indeed, he supports the claim that this susceptibility to modification through natural selection helps to explain the epistemic power of certain branches of modern science. In updating and expanding the evolutionary approach to scientific knowledge, Haufe provides a model for thinking about science that acknowledges the historical contingency of scientific thought while showing why we nevertheless should trust the results of scientific research when it is the product of certain kinds of scientific communities.

*Practical Knowledge and Information Management* Jul 14 2022 *Practical Knowledge and Information Management (KIM)* is a guide written by and for knowledge and information management practitioners. As well as offering an introduction to the field, it provides advice and expertise that can be applied to real-life workplace situations. It offers an antidote to hype and best practice you can actually use. Content covered includes: - introducing KIM to organizations - information management and governance - communities of practice, knowledge sharing and learning - knowledge bases, know-how and wikis - after-action reviews, project learning and legacy This book will be useful for existing knowledge and information practitioners as well as information professionals increasing their skills in the area. It offers insight for experienced professionals and a good introduction to students and professionals wanting to increase their knowledge.

**What is Knowledge?** Oct 05 2021 Appearing in English for the first time, this book comprises two of Ortega's most important works, *¿Qué es conocimiento?* and the essay "Ideas y creencias." This is Ortega's attempt to systematically present the foundations of his metaphysics of human life and, on that basis, to provide a radical philosophical account of knowledge. In so doing, he criticizes idealism and overcomes it. Accordingly, this book goes well beyond a treatise on epistemology; in fact, as understood in modern philosophy, this discipline and its questions are shown to be derivative and, in that sense, they are transcended here by Ortega's systematic effort. Written during the time of his maturity, these works are representative of his fruitful and radical period. Both *¿Qué es conocimiento?* and "Ideas y creencias" are equally decisive not only for the understanding and radical completion of

Ortega's work, but also for their relevance to the work of continental philosophers during the same period and for years to come (e.g., Husserl, Jaspers, Heidegger, Sartre, and others).

**Expert Knowledge and Its Application in Landscape Ecology** Oct 17 2022 Typically, landscape ecologists use empirical observations to conduct research and devise solutions for applied problems in conservation and management. In some instances, they rely on advice and input of experienced professionals in both developing and applying knowledge. Given the wealth of expert knowledge and the risks of its informal and implicit applications in landscape ecology, it is necessary to formally recognize and characterize expert knowledge and bring rigor to methods for its applications. In this context, the broad goal of this book is to introduce the concept of expert knowledge and examine its role in landscape ecological applications. We plan to do so in three steps: First we introduce the topic to landscape ecologists, explore salient characteristics of experts and expert knowledge, and describe methods used in capturing and formalizing that knowledge. Second, we present examples of research in landscape ecology from a variety of ecosystems and geographic locations that formally incorporate expert knowledge. These case studies address a range of topics that will interest landscape ecologists and other resource management and conservation professionals including the specific roles of expert knowledge in developing, testing, parameterizing, and applying models; estimating the uncertainty in expert knowledge; developing methods of formalizing and incorporating expert knowledge; and using expert knowledge as competing models and a source of alternate hypotheses. Third, we synthesize the state of knowledge on this topic and critically examine the advantages and disadvantages of incorporating expert knowledge in landscape ecological applications. The disciplinary subject areas we address are broad and cover much of the scope of contemporary landscape ecology, including broad-scale forest management and conservation, quantifying forest disturbances and succession, conservation of habitats for a range of avian and mammal species, vulnerability and conservation of marine ecosystems, and the spread and impacts of invasive plants. This text incorporates the collective experience and knowledge of over 35 researchers in landscape ecology representing a diverse range of disciplinary subject areas and geographic locations. Through this text, we will catalyze further thought and investigations on expert knowledge among the target readership of researchers, practitioners, and graduate students in landscape ecology.

*Lao Tzu and the Bible* Jun 01 2021 Lao Tzu and The Bible: A Meeting Transcending Time and Space Yuan Zhiming Translated by Chen Shangyu Has God's light ever shone on the vast land of China-"Land of God, ' so named by her ancient ancestors? This book vividly recaptures God's universal light shown to the Chinese sage Lao Tzu 600 years before Jesus was born. By comparing Lao Tzu's Tao Te Ching with the Bible, Yuan Zhiming offers a ground-breaking interpretation of Lao Tzu's Tao in light of the Word, or Logos. Yuan Zhiming juxtaposes Lao Tzu's "Holy One" with Jesus Christ, systematically and thoroughly unveiling the nature and characteristics of the mysterious Tao in a concrete and understandable manner, resolving a riddle of 2,600 years. "The text speaks to our time, because so many people believe that mere secular teaching of "morality," such as Confucius taught, is sufficient, and because what we really need is a deep spiritual awakening, such as Lao Tzu announced. The profound teaching in Lao Tzu and the Bible enriches the spirit of not only the Chinese people but also the people of the West." -Dr. Paul de Vries, president of New York Divinity School and author of The Taming of the Shrewd Lao Tzu and the Bible offers not only a spiritual feast to the analytical minds about Tao/Word/Logos, illustrating Tao in a tangible form, the Holy One/Jesus Christ, but also provides helpful advice about how to follow and be united with Tao. A work of great erudition and wisdom, it contains deep insight, opening up the secrets of the Tao while also illuminating the Bible. This book will surely delight the hearts and minds of seekers of Tao.

Understanding May 24 2023 The book reveals the Reality of Life. Life's origin, life's reason for existence is answered. The personal choice for the self, self-creation, is shown. Life's eternity, life's indestructible nature is proven. The immortality of the soul is proven. The book proves God's existence. Unlimited power is disproven. The philosophy of the book is titled the one philosophy. The One Philosophy includes all opposites, the Middle Ground between which is taken and confirmed. All that is lacking of the good is exposed. Philosophy is the answer to knowledge of the good, not religion, not democracy. The philosopher-king is advocated. The three main human objectives are put forth: understanding of life's laws, the creating of the good society, the need to live in peace. Only philosophy has the answers. This book marks the new human beginning. It is groundbreaking. The phony, not-so-peaceful-and-loving the real Jesus Christ is exposed. The destruction of Jesus Christ is complete. The greatest human questions are answered. The basis of future humanity will be the One Philosophy.

**Indigenous Knowledge and Its Uses in Southern Africa** Nov 18 2022 This is a publication of the Institute for Indigenous Theory and Practice and the HSRC Co-operative Programme: Affordable Social Provision. It consists mainly of the edited contributions to an indaba on indigenous knowledge and practice organized by the Institute for Indigenous Theory and Practice at the South African Museum, Cape Town, on 24 November 1994. While the HSRC values the opportunity to disseminate information on the very important research and services referred to in this publication, it does not necessarily agree with all the views expressed and the conclusions reached in the publication.

**Case of Appeals of the State of New York** May 12 2022

*Nico Stehr: Pioneer in the Theory of Society and Knowledge* Mar 30 2021 This unique volume brings together a selection of the most important texts of Nico Stehr for the first time and puts them in dialogue with original research that draws on his prolific work. Covering five decades of pioneering sociological research on the theory of society and knowledge, the book introduces the reader to Stehr's seminal inquiries into the economic, political and social role of knowledge. Original concepts, such as his groundbreaking studies on the Knowledge Society, are introduced as the volume traces Stehr's pursuit of social scientific research as a source of practical knowledge for modern society. The book comprises three parts devoted to the many facets and the remarkable range of Nico Stehr's oeuvre. Part 1 provides an introduction to the significance of his pioneering work and career. Part 2 demonstrates the practical application of Nico Stehr's research as seen through the eyes of eminent scholars. Part 3 presents a selection of the milestones of his publications.

**17th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning** Feb 21 2023 ?These proceedings represent the work of contributors to the 17th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning (ICICKM 2020), hosted by ACI and the University of Toronto, Canada on 15-16 October 2020. The Conference Chairs are Dr. Anthony Wensley, from the University of Toronto and Dr. Max Evans, from McGill University. The Programme Chair is Dr. Ilja Frissen from McGill University.

**Externalism about Knowledge** Apr 18 2020 Externalism about knowledge is thriving in contemporary epistemology. Nonetheless, externalism is too often caricatured as merely reliabilism, too often reduced to simply externalism about justification, and rarely considered as a cohesive family of related but importantly different views. Externalism About Knowledge addresses all of these issues by bringing new essays from leading externalist epistemologists working on seven different branches of this tradition: process reliabilism, tracking views, safety views, virtue epistemology, proper functionalism, naturalized epistemology, and knowledge first epistemology. This collection highlights their unity, their differences, their interconnections, and their most recent challenges, developments, and extensions.

**Attitude Strength** Dec 19 2022 Social psychologists have long recognized the possibility that attitudes might differ from one another in terms of their strength, but only recently had the profound implications of this view been explored. Yet because investigators in the area were pursuing interesting but independent programs of research exploring different aspects of strength, there was little articulation of assumptions underlying the work, and little effort to establish a common research agenda. The goals of this book are to highlight these assumptions, to review the discoveries this work has produced, and to suggest directions for future work in the area. The chapter authors include individuals who have made significant contributions to the published literature and represent a diversity of perspectives on the topic. In addition to providing an overview of the broad area of attitude strength, particular chapters deal in depth with specific features of attitudes related to strength and integrate the diverse bodies of relevant theory and empirical evidence. The book will be of interest to graduate students initiating work on attitudes as well as to longstanding scholars in the field. Because of the many potential directions for application of work on attitude strength to amelioration of social problems, the book will be valuable to scholars in various applied disciplines such as political science, marketing, sociology, public opinion, and others studying attitudinal phenomena.

*Little Effort, Big Rewards* Mar 22 2023 Ready to take your career to the next level? Find out everything you need to know about maximising your time with this practical guide. Do you have the feeling that you work for hours on end with very little to show for it? Or that you do not get much done because you are too busy taking care of little everyday tasks? This guide will give you all the tools you need to get out of this rut and show you how you can work less for greater rewards. In 50 minutes you will be able to: • Understand how doing more with less effort is good for both your health and your career • Use various tools in order to organise your life • Minimise distractions and maximise your available time ABOUT 50MINUTES.COM | COACHING The Coaching series from the 50Minutes collection is aimed at all those who, at any stage in their careers, are looking to acquire personal or professional skills, adapt to new situations or simply re-evaluate their work-life balance. The concise and effective style of our guides enables you to gain an in-depth understanding of a broad range of concepts, combining theory, constructive examples and practical exercises to enhance your learning.

**Capacity for Development** Sep 16 2022 If capacity development initiatives are to have a pivotal role in helping developing countries meet the challenges of the 21st century, it is necessary to take a closer look at the underlying assumptions about the nature of development as a process of societal transformation, of capacity and capacity development, of knowledge and of aid-donor-recipient relationship. This book contains a range of views from practitioners, academics and policy-makers about what has gone right with technical cooperation, what has gone wrong, and how to do it better.

*The Principles of Knowledge, with Remarks on the Nature of Reality* Jan 08 2022

*The Lazy Intellectual* Aug 27 2023 It's a small attention span world out there, and not everyone's interested in paging through lengthy tomes to deepen their intellect. They want their information. And they want it now. This book fills that void next to the recliner as the go-to reference whenever work conversations or bar trivia have you feeling stupid. The top ten academic subjects are broken into digestible pieces such as: Fast Facts: One-liners that delivers important information Repeatable Quotables: Smart words by smart people to make readers look smart by repeating Visual Aids: Graphs, charts, and tables for when even a few words are way too much Cheat Sheets: Chapter-ending recaps that reinforce the major points to take away Whether they want an answer to a biology question, or to brush up on their Spanish during a commercial break, this book is perfect for people who couldn't bother paying attention the first time.
