Histories of Health in Southeast Asia Jun 06 2022 Health patterns in Southeast Asia have changed profoundly over the past century. In that period, epidemic and chronic diseases, environmental transformations, and international health institutions have created new connections within the region and the increased interdependence of Southeast Asia with China and India.

In this volume leading scholars provide a new approach to the history of health in Southeast Asia. Framed by a series of synoptic pieces on the "Landscapes of Health" in Southeast Asia in 1914, 1950, and 2014 the essays interweave local, national, and regional perspectives. They range from studies of long-term processes such as changing epidemics, mortality and aging, and environmental history to detailed accounts of particular episodes: the global cholera epidemic and the hajj, the influenza epidemic of 1918, WWII, and natural disasters. The writers also examine state policy on healthcare and the influence of organizations, from NGOs such as the China Medical Board and the Rockefeller Foundation to grassroots organizations in Thailand, Indonesia, and the Philippines.

Africa in Europe Apr 23 2021 Africa in Europe goes beyond the still-dominant American and transatlantic focus of diaspora studies, examining the experiences of black and white Africans, Afro-Caribbeans, and African Americans in Western Europe, Britain, and the former Soviet Union from the end of the nineteenth century to the beginning of the twenty-first. Exploring a huge range of border-crossing experiences across and within Africa and Europe, it examines topics such as ethnic and cultural boundaries, working across the color line, and the limits of solidarity. With contributions from scholars in social history, art history, anthropology, cultural studies, and literary studies, as well from a novelist and a filmmaker, it offers a broad look at the intersection of Africa and Europe at all levels, from family and community to culture and politics.

Slouching Towards Utopia Oct 10 2022 An instant New York Times and Wall Street Journal bestseller from one of the world's leading economists, offering a grand narrative of the century that made us richer than ever, but left us unsatisfied "A magisterial history."—Paul Krugman Named a Best Book of 2022 by Financial Times *

Economist * Fast Company Before 1870, humanity lived in dire poverty, with a slow crawl of invention offset by a growing population. Then came a great shift: invention sprinted forward, doubling our technological capabilities each generation and utterly transforming the economy again and again. Our ancestors would have presumed we would have used such powers to build utopia. But it was not so. When 1870-2010 ended, the world instead saw global warming; economic depression, uncertainty, and inequality; and broad rejection of the status quo. Economist Brad DeLong's *Slouching Towards Utopia* tells the story of how this unprecedented explosion of material wealth occurred, how it transformed the globe, and why it failed to deliver us to utopia. Of remarkable breadth and ambition, it reveals the last century to have been less a march of progress than a slouch in the right direction.

Musicking in Twentieth-Century Europe Nov 18 2020 Music has gained the increasing attention of historians. Research has branched out to explore music-related topics, including creative labor, economic histories of music production, the social and political uses of music, and musical globalization. This handbook both covers the history of music in Europe and probes its role for the making of Europe during a "long" twentieth century. It offers concise guidance to key historical trends as well as the most important research on central topics within the field.

The Rest Is Noise Aug 16 2020 Winner of the 2007 National Book Critics Circle Award for Criticism A New York Times Book Review Top Ten Book of the Year Time magazine Top Ten Nonfiction Book of 2007 Newsweek Favorite Books of 2007 A Washington Post Book World Best Book of 2007 In this sweeping and dramatic narrative, Alex Ross, music critic for *The New Yorker*, weaves together the histories of the twentieth century and its music, from Vienna before the First World War to Paris

in the twenties; from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies up to the present. Taking readers into the labyrinth of modern style, Ross draws revelatory connections between the century's most influential composers and the wider culture. *The Rest Is Noise* is an astonishing history of the twentieth century as told through its music.

The Practical Turn Jul 27 2021 American pragmatism, born in the 1870s in Cambridge, Massachusetts, has as its central insight the idea that our philosophical concepts of truth, knowledge, probability, and so on must start with, and remain linked to, human experience and inquiry. This book traces and assesses the strong influence of American pragmatism on British philosophy, with particular emphasis on Cambridge during the inter-war period, on post-war Oxford, and on recent developments. Most philosophers would say that American pragmatism received only a hostile reception in England when the ideas first travelled across the Atlantic. But this volume argues that the movement of pragmatist ideas in Britain was a strong and important current, cutting new channels to fruitful ways of thinking about philosophy's most profound problems. Its ideas have found a home in the work of Wittgenstein, Ramsey, Anscombe and, more recently, Simon Blackburn and Huw Price.

Law, History, and Justice Sep 09 2022 Since the nineteenth century, the development of international humanitarian law has been marked by complex entanglements of legal theory, historical trauma, criminal prosecution, historiography, and politics. All of these factors have played a role in changing views on the applicability of international law and human-rights ideas to state-organized violence, which in turn have been largely driven by transnational responses to German state crimes. Here, Annette Weinke gives a groundbreaking long-term history of the political, legal and academic debates concerning German state and mass violence in the First World War, during the National Socialist era and the Holocaust, and under the GDR.

Pivotal Tuesdays May 13 2020 From the era of the industrial factory to the age of the microchip, Pivotal Tuesdays explores four twentieth-century elections—1912, 1932, 1968, and 1992—using the election of the American president as a lens through which to explore the broader sweep of the nation's social, economic, and political history.

The Defining Moment Apr 11 2020 In contemporary American political discourse, issues related to the scope, authority, and the cost of the federal government are perennially at the center of discussion. Any historical analysis of this topic points directly to the Great Depression, the "moment" to which most historians and economists connect the origins of the fiscal, monetary, and social policies that have characterized American government in the second half of the twentieth

century. In the most comprehensive collection of essays available on these topics, *The Defining Moment* poses the question directly: to what extent, if any, was the Depression a watershed period in the history of the American economy? This volume organizes twelve scholars' responses into four categories: fiscal and monetary policies, the economic expansion of government, the innovation and extension of social programs, and the changing international economy. The central focus across the chapters is the well-known alternations to national government during the 1930s. *The Defining Moment* attempts to evaluate the significance of the past half-century to the American economy, while not omitting reference to the 1930s. The essays consider whether New Deal-style legislation continues to operate today as originally envisioned, whether it altered government and the economy as substantially as did policies inaugurated during World War II, the 1950s, and the 1960s, and whether the legislation had important precedents before the Depression, specifically during World War I. Some chapters find that, surprisingly, in certain areas such as labor organization, the 1930s responses to the Depression contributed less to lasting change in the economy than a traditional view of the time would suggest. On the whole, however, these essays offer testimony to the Depression's legacy as a "defining moment." The large role of today's government and its methods of intervention—from the pursuit of a more active monetary policy to the maintenance and extension of a wide range of insurance for labor and business—derive from the crisis years of the 1930s.

Global Capitalism Aug 08 2022 "One of the most comprehensive histories of modern capitalism yet written." —Michael Hirsh, *New York Times* An authoritative, insightful, and highly readable history of the twentieth-century global economy, updated with a new chapter on the early decades of the new century.

Global Capitalism guides the reader from the globalization of the early twentieth century and its swift collapse in the crises of 1914-45, to the return to global integration at the end of the century, and the subsequent retreat in the wake of the financial crisis of 2008.

The Japanese Family System Jan 21 2021 This book offers a new perspective and empirical evidence that are relevant for understanding changes in family structures, intergenerational relationships, and female labor force participation in the “strong family” societies and that also shed light on those in the “weak family” societies. Focusing on the stem family and the gender division of labor, presenting detailed quantitative evidence, and testing the theories on family change and gender revolution, the book provides a comprehensive examination of change, continuity, and regionality in the Japanese family system over the twentieth century. By analyzing data from a nationally representative life course survey with event history techniques, it investigates factors affecting post-marital intergenerational co-residence and proximate residence along with those influencing continuous and/or discontinuous employment of married women across the life course. In this way, it reveals the mechanisms underlying the stem family formation and those behind married women’s M-shaped employment pattern. It further explores regionality in the Japanese family system, applying a demographic mapping method to data from a nationally representative community survey and official statistics. The mapping analyses demonstrate persistent geographical contrasts between two types of living arrangements (single-household versus multi-household) in the stem family accompanied by two types of maternal employment (full-time versus part-time). They also reveal a historical correlation between traditional communal parenting systems and modern childcare

services, linking past to present from the late nineteenth to the early twenty-first century.

Reproduction on the Reservation Feb 14 2023 This pathbreaking book documents the transformation of reproductive practices and politics on Indian reservations from the late nineteenth century to the present, integrating a localized history of childbearing, motherhood, and activism on the Crow Reservation in Montana with an analysis of trends affecting Indigenous women more broadly. As Brianna Theobald illustrates, the federal government and local authorities have long sought to control Indigenous families and women's reproduction, using tactics such as coercive sterilization and removal of Indigenous children into the white foster care system. But Theobald examines women's resistance, showing how they have worked within families, tribal networks, and activist groups to confront these issues. Blending local and intimate family histories with the histories of broader movements such as WARN (Women of All Red Nations), Theobald links the federal government's intrusion into Indigenous women's reproductive and familial decisions to the wider history of eugenics and the reproductive rights movement. She argues convincingly that colonial politics have always been--and remain--reproductive politics. By looking deeply at one tribal nation over more than a century, Theobald offers an especially rich analysis of how Indigenous women experienced pregnancy and motherhood under evolving federal Indian policy. At the heart of this history are the Crow women who displayed creativity and fortitude in struggling for reproductive self-determination.

Thinking the Twentieth Century Feb 02 2022 "An intellectual feast, learned, lucid, challenging and accessible." -San Francisco Chronicle "Ideas crackle" in this triumphant final book of Tony Judt, taking readers on "a wild ride through the ideological currents and

shoals of 20th century thought.” (Los Angeles Times) The final book of the brilliant historian and indomitable public critic Tony Judt, *Thinking the Twentieth Century* maps the issues and concerns of a turbulent age on to a life of intellectual conflict and engagement. The twentieth century comes to life as an age of ideas—a time when, for good and for ill, the thoughts of the few reigned over the lives of the many. Judt presents the triumphs and the failures of prominent intellectuals, adeptly explaining both their ideas and the risks of their political commitments. Spanning an era with unprecedented clarity and insight, *Thinking the Twentieth Century* is a tour-de-force, a classic engagement of modern thought by one of the century’s most incisive thinkers. The exceptional nature of this work is evident in its very structure—a series of intimate conversations between Judt and his friend and fellow historian Timothy Snyder, grounded in the texts of the time and focused by the intensity of their vision. Judt’s astounding eloquence and range are here on display as never before. Traversing the complexities of modern life with ease, he and Snyder revive both thoughts and thinkers, guiding us through the debates that made our world. As forgotten ideas are revisited and fashionable trends scrutinized, the shape of a century emerges. Judt and Snyder draw us deep into their analysis, making us feel that we too are part of the conversation. We become aware of the obligations of the present to the past, and the force of historical perspective and moral considerations in the critique and reform of society, then and now. In restoring and indeed exemplifying the best of intellectual life in the twentieth century, *Thinking the Twentieth Century* opens pathways to a moral life for the twenty-first. This is a book about the past, but it is also an argument for the kind of future we should strive for: *Thinking the Twentieth Century* is about the life of the mind—and the

mindful life. Judt's book, *Ill Fares the Land*, republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer*, Ta-Nehisi Coates.

The Long Twentieth Century Aug 20 2023 Winner of the American Sociological Association PEWS Award (1995) for Distinguished Scholarship *The Long Twentieth Century* traces the epochal shifts in the relationship between capital accumulation and state formation over a 700-year period. Giovanni Arrighi masterfully synthesizes social theory, comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium. Borrowing from Braudel, Arrighi argues that the history of capitalism has unfolded as a succession of "long centuries"—ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world-economic space. The modest beginnings, rise and violent unraveling of the links forged between capital, state power, and geopolitics by hegemonic classes and states are explored with dramatic intensity. From this perspective, Arrighi explains the changing fortunes of Florentine, Venetian, Genoese, Dutch, English, and finally American capitalism. The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power.

Business as Usual Mar 15 2023 Situates the current crisis in the historical trajectory of the capitalist world-system, showing how the crisis was made possible not only by neoliberal financial reforms but by a massive turn away from manufacturing things of value towards seeking profit from financial exchange and credit. Much more basic than the result of a few financial traders cheating the system, this is a potential historical turning point. In original essays, the contributors establish why the system was ripe for

crisis of the past, and yet why this meltdown was different. The volume concludes by asking whether as deep as the crisis is, it may contain seeds of a new global economy, what role the US will play, and whether China or other countries will rise to global leadership. Contributors include: Immanuel Wallerstein, David Harvey, Saskia Sassen, James Kenneth Galbraith, Manuel Castells, Nancy Fraser, Rogers Brubaker, David Held, Mary Kaldor, Vadim Volkov, Giovanni Arrighi, Beverly Silver, and Fernando Coronil. The three volumes can be purchased individually or as a set.

A New India? May 05 2022 This volume critically examines the notion of a 'new' India by acknowledging that India is changing remarkably and by indicating that in the overzealous enthusiasm about the new India, there is collective amnesia about the other, older India. The book argues that the increasing consolidation of capitalist markets of commodity production and consumption has unleashed not only economic growth and social change, but has also introduced new contradictions associated with market dynamics in the material and social as well as intellectual spheres.

The Big Red Book of Modern Chinese Literature: Writings from the Mainland in the Long Twentieth Century Oct 30 2021 A panoramic vision of the Chinese literary landscape across the twentieth century. Transforming the Twentieth Century Jul 15 2020 This inquiry into the technical advances that shaped the 20th century follows the evolutions of all the principal innovations introduced before 1913 (as detailed in the first volume) as well as the origins and elaborations of all fundamental 20th century advances. The history of the 20th century is rooted in amazing technical advances of 1871-1913, but the century differs so remarkably from the preceding 100 years because of several unprecedented combinations. The 20th century had followed on the path defined during the half century preceding the beginning of World War I, but it has traveled along that path at a very different pace, with different ambitions and intents. The new century's developments elevated both the magnitudes of output and the spatial distribution of mass industrial production and to new and, in many ways, virtually incomparable levels. Twentieth century science and engineering conquered and perfected a number of fundamental challenges which remained unresolved before 1913, and which to many critics appeared insoluble. This book is organized in topical chapters dealing with electricity, engines, materials and syntheses, and information techniques. It concludes with an extended examination of contradictory consequences of our

admirable technical progress by confronting the accomplishments and perils of systems that brought liberating simplicity as well as overwhelming complexity, that created unprecedented affluence and equally unprecedented economic gaps, that greatly increased both our security and fears as well as our understanding and ignorance, and that provided the means for greater protection of the biosphere while concurrently undermining some of the key biophysical foundations of life on Earth. Transforming the Twentieth Century will offer a wide-ranging interdisciplinary appreciation of the undeniable technical foundations of the modern world as well as a multitude of welcome and worrisome consequences of these developments. It will combine scientific rigor with accessible writing, thoroughly illustrated by a large number of appropriate images that will include historical photographs and revealing charts of long-term trends.

Dark Continent Jan 01 2022 "A useful, important book that reminds us, at the right time, how hard [European unity] has been, and how much care must be taken to avoid the terrible old temptations." --Los Angeles Times Dark Continent provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next. Unflinching, intelligent, Dark Continent provides a provocative vision of Europe's

past, present, and future—and confirms Mark Mazower as a historian of valuable gifts.

The Economic History of The Netherlands 1914–1995 Oct 18 2020 Jan L. van Zanden in *The Economic History of the Netherlands 1914–1995* answers these questions. In the first four chapters the long development of the economy is analysed in detail. Central to this part of the book are the rise (and decline) of managerial enterprise; the growth (and fall) of trade unions; and the expansion (and crisis) of the welfare state. The particular Dutch features of these institutional changes are highlighted. The second part of the book deals with different periods of growth (from 1914–1929, and 1950–1973), and relative stagnation (1929–1950, and 1973–1995). Moreover, van Zanden examines the role the Netherlands played in the process of European integration, and gives an explanation of the success of the 'Dutch job machine' in the 1980s and 1990s.

A History of Big Recessions in the Long Twentieth Century Jan 13 2023 Examines the array of financial crises, slumps, depressions and recessions that happened around the globe during the twentieth century.

The Economic Development of Latin America in the Twentieth Century Sep 16 2020 Hofman, a researcher with the Chile-based Economic Commission for Latin America and the Caribbean, uses growth accounting methods and previously unavailable long-term series data to assess the economic performance of the region during the century from a comparative and historical perspective. In particular he compares Latin American economies to those of advanced capitalist economies, to newly industrialized economies, and to Spain and Portugal because of the historical ties. He looks at the reasons for the poor or negative growth during the 1980s and the apparent recovery in the 1990s and at such problems as debt, income inequality, high inflation, cyclical instability, and political and policy instability.

Media U Mar 03 2022 Are homecoming games and freshman composition, Twitter feeds and scholarly monographs really mortal enemies? *Media U* presents a provocative rethinking of the development of American higher education centered on the insight that universities are media institutions. Tracing over a century of media history and the academy, Mark Garrett Cooper and John Marx argue that the fundamental goal of the American research university has been to cultivate audiences and convince them of its value. *Media U* shows how universities have appropriated new media technologies to convey their message about higher education, the aims of research, and campus life. The need to create an audience stamps each of the university's steadily proliferating disciplines, shapes its structure, and determines its division of labor. Cooper and Marx examine how the research university has sought to inform publics and convince them of its value to American society, from the rise of football and Great Books programs in the early twentieth century through a midcentury communications complex linking big science, New Criticism, and design, from the co-option of 1960s student activist media through the early-twenty-first-century reception of MOOCs and the latest promises of technological disruption. The book considers the ways in which universities have used media platforms to reconcile national commitments to equal opportunity with corporate capitalism as well as the vexed relationship of democracy and hierarchy. By exploring how media engagement brought the American university into being and continues to shape academic labor, *Media U* presents essential questions and resources for reimagining the

university and confronting its future.

Greening Europe Apr 04 2022 Today, the environment seems omnipresent in European policy within and beyond the European Union. The idea of a shared European environment, however, has come a long way and is still being contested. Greening Europe focuses on the many ways people have interacted with nature and made it an issue of European concern. The authors ask how notions of Europe mattered in these activities and they expose the many entanglements of activists across the subcontinent who set out to connect and network, and to exchange knowledge, worldviews, and strategies that exceeded their national horizons. Moving beyond human agency, the handbook also highlights the eminent role nature played in both "greening" Europe and making Europe a shared environment.

Internationalisms Feb 19 2021 This book offers a new view of the twentieth century, placing international ideas and institutions at its heart.

An Economic History of Twentieth-Century Europe Mar 23 2021 A major history of economic regimes and economic performance throughout the twentieth century. Ivan T. Berend looks at the historic development of the twentieth-century European economy, examining both its failures and its successes in responding to the challenges of this crisis-ridden and troubled but highly successful age. The book surveys the European economy's chronological development, the main factors of economic growth, and the various economic regimes that were invented and introduced in Europe during the twentieth century. Professor Berend shows how the vast disparity between the European regions that had characterized earlier periods gradually began to disappear during the course of the twentieth century as more and more countries reached a more or less similar level of economic development. This accessible book will be

required reading for students in European economic history, economics, and modern European history.

Scott Fitzgerald captured the Jazz Age. The hero, Gnostus Pappadopoulis, weaves his way through the psychedelic landscape, encountering—among other things—mescaline, women, art, gluttony, falsehood, science, prayer, and, occasionally, truth. Dangerous Pleasures Jun 13 2020 In the past decade, as prostitution once again has become a recognized feature of Chinese society, it has been incorporated into a larger public discussion about what kind of modernity China should seek and what kind of sex and gender arrangements should characterize that modernity. Prostitutes, like every other non-elite group, did not record their own lives.

Russia's Long Twentieth Century Nov 11 2022 Covering the sweep of Russian history from empire to Soviet Union to post-Soviet state, *Russia's Long Twentieth Century* is a comprehensive yet accessible textbook that situates modern Russia in the context of world history and encourages students to analyse the ways in which citizens learnt to live within its system and create distinctly Soviet identities from its structures and ideologies. Chronologically organised but moving beyond the traditional Cold War framework, this book covers topics such as the accelerating social, economic and political shifts in the Russian empire before the Revolution of 1905, the construction of the socialist order under Bolshevik government, and the development of a new state structure, political ideology and foreign policy in the decades since the collapse of the Soviet Union. The authors highlight the polemics and disagreements that energize the field, discussing interpretations from Russian, émigré, and Western historiographies and showing how scholars diverge sharply in their understanding of key events, historical processes, and personalities. Each chapter contains a selection of primary sources and discussion questions, engaging with the voices and experiences of ordinary Soviet citizens and familiarizing students with the techniques of source criticism. Illustrated with images and maps throughout, this book is an essential introduction to twentieth-century Russian history.

The War and Its Shadow May 25 2021 Across the continent, Hitler's war of territorial expansion after 1938 detonated myriad "irregular wars, of culture as well as of politics, which took on a "cleansing" intransigence as those driving them sought to make "homogeneous" communities, whether ethnic, political, or religious. So much of this was prefigured with primal intensity in Spain in 1936, where, on 17-18 July, a group of army officers rebelled against the socially reforming Republic. Saved from almost certain failure by Nazi and Fascist military intervention, and by a British inaction amounting to complicity, these army rebels unleashed a conflict in which civilians became the targets of mass killing. The new military authorities authorized and presided over an extermination of those sectors associated with Republican change--especially those who symbolized cultural change and thus posed a threat to old ways of being and thinking: progressive teachers, self-educated workers, "new" women.

The Cambridge Economic History of the United States Dec 20 2020 This three volume work offers a comprehensive survey of the history of economic activity and economic change in the United States, and in those regions whose economies have at certain times been closely allied to that of the US.

The Long Shadow Jul 07 2022 In Britain we have lost touch with the Great War. Our overriding sense now is of a meaningless, futile bloodbath in the mud of Flanders -- of young men whose lives were cut off in their prime for no evident purpose. But by reducing the conflict to personal tragedies, however moving, we have lost the big picture: the history has been distilled into poetry. In The Long Shadow, critically acclaimed author David Reynolds seeks to redress the balance by exploring the true impact of 1914-18 on the 20th century. Some of the Great War's legacies were negative and pernicious but others proved transformative in a positive sense.

Exploring big themes such as democracy and empire, nationalism and capitalism and re-examining the differing impacts of the War on Britain, Ireland and the United States, *The Long Shadow* throws light on the whole of the last century and demonstrates that 1914–18 is a conflict that Britain, more than any other nation, is still struggling to comprehend. Stunningly broad in its historical perspective, *The Long Shadow* is a magisterial and seismic re-presentation of the Great War.

Women and the Periodical Press in China's Long Twentieth Century Dec 12 2022 In this major new collection, an international team of scholars examine the relationship between the Chinese women's periodical press and global modernity in the late nineteenth and twentieth centuries. The essays in this richly illustrated volume probe the ramifications for women of two monumental developments in this period: the intensification of China's encounters with foreign powers and a media transformation comparable in its impact to the current internet age. The book offers a distinctive methodology for studying the periodical press, which is supported by the development of a bilingual database of early Chinese periodicals. Throughout the study, essays on China are punctuated by transdisciplinary reflections from scholars working on periodicals outside of the Chinese context, encouraging readers to rethink common stereotypes about lived womanhood in modern China, and to reconsider the nature of Chinese modernity in a global context.
