And it is to wit, that in the said court of Shepway, nor in any other court of all the ports, within all the franchise, shall there be any plea but in English, the which hath been peaceably used time out of mind. Causes and articles moved within the franchises, that be not determined within the usage of the Cinque Ports, they claim to use and determine after good faith and equity, and natural law of the land. 37. Of the Coronation. Aho they used, that when any King of England, or Queen, shall he crowned, the Barons of the Cinque Ports be wont, by the summons of the King's writ to them directed, to come to the said coronation, and do their due service; to receive their summons in the King's court, by 40 days warning, viz.--the day of coronation the two cloths shall be borne by the said barons over the King and the Queen, viz. by 32 barons of the five ports, and by no other. And these 32 barons shall come in a suit of clothing of their own cost, but their expences for the time they shall be in the court, shall be upon the barons. And when they have done their office, the said barons be wont, and of right they claim

of both cloths, with all the apparel, as hath been aforesaid. And thereof the barons of Hastings, and their members, shall have one cloth; and the barons of Romney, Hithe, Dover, and Sandwich, the other cloth, and all their apparel. And the barons of the ports that come there, are wont to have the table in the great hall, on the King's right hand, of common right, in the same manner the Barons of the Cinque Ports were wont to have at every consecration of any archbishop the table on the right hand. And all the other points and liberties they claim, that be comprehended in their charters of grants of divers Kings. Thus ends the...

Puckle's book is a historical examination of Dover Castle, one of the most important fortifications in England. The book includes detailed descriptions of the castle's architecture and its strategic importance throughout history, as well as insights into the daily life of those who lived and worked within its walls. Detailed drawings of 31 world-famous castles: Windsor, Edinburgh, Caernarvon, Krak des Chevaliers, Neuschwanstein, Pierrefonds, and more. Captions. From the author of *The Norman Conquest* and *A Great and Terrible King* comes a sweeping and stunning history of the most magnificent castles in Britain. Beginning with their introduction in the eleventh century, and ending with their widespread abandonment in the seventeenth, Marc Morris explores many of the country's most famous castles, as well as some spectacular lesser-known examples. At times this is an epic tale, driven by characters like William the Conqueror, King John and Edward I, full of sieges and conquest on an awesome scale. But it is also by turns an intimate story of less eminent individuals, whose adventures, struggles and ambitions were reflected in the fortified residences they constructed. Be it ever so grand or ever so humble, a castle was first and foremost a home. To understand castles—who built them, who lived in them, and why—is to understand the forces that shaped medieval Britain. This is a reproduction of a book published before 1923. In a groundbreaking study — the first to shed light on the purpose, construction techniques, and effectiveness of medieval fortifications, noted nineteenth-century architect and writer Eugene-Emmanuel Viollet-le-Duc discusses such architectural elements as dungeons, keeps, battlements, and drawbridges. In addition to

describing a vast number of European structures — among them fortifications at Carcassonne, Paris, Avignon, Vincennes, Lubeck, Milan, and Nuremberg — he examines the use of artillery and trenches, as well as such weapons as battering rams, mines, and the long-bow. A concise, scholarly reference for architectural historians, this absorbing history will appeal as well to medievalists, military buffs, and anyone interested in the evolution and development of the castle. Concise, scholarly survey traces castle development from ancient roots. Nearly 200 photographs and drawings illustrate moats, keeps, baileys, and many other features. Caernarvon Castle, Dover Castle, Hadrian's Wall, Tower of London, and more. 199 black-and-white illustrations. Full-color model of Caernarvon Castle in Wales. Excerpt from *The History of the Castle, Town, and Port of Dover* The materials at the disposal of a writer on Dover are fairly abundant. The British Museum possesses a quantity of very valuable documents, the town accounts exist from the year 1365, and the minutes of the Common Assemblies from 1506. In addition to these important records numerous other manu scripts, many oi them of the greatest value, have been consulted personally, and Professor Burrows very kindly placed his notes of others at my disposal. Depicts 44 historic armed soldiers from 1286 B.C. to 1945, pairing adversaries on facing pages. Provides brief historical backgrounds for depictions. Dover Castle has undoubtedly played a major role in the defence of Britain since its earliest times, and here, Roy Humphreys describes the key role in this highly readable and well-illustrated book. Fourteen centuries of Celtic life and culture are depicted in over 40 well-researched, excellently rendered illustrations. Intriguing scenes of an Iron-Age village, Glastonbury fishermen, farmers harvesting grain, Celtic warriors on horseback, St. Patrick driving the snakes out of Ireland, and much more are featured. Descriptive captions. Illustrations depicting everyday life in the Middle Ages are accompanied by brief text. Dover Castle is one of England's greatest fortresses. At its heart lies the Great Tower, a huge Anglo-Norman keep that has dominated the White Cliffs since the 1180s, remaining in continuous use thereafter. This book explores the history and development of the Great Tower in detail, beginning with its construction in the reign of Henry II and ending when the Ministry of Works took it over in 1930, to

conserve and open it as a monument for public visits. The book is comprised of several chapters by thirteen contributors, and looks at three main themes. The first examines the making of the Great Tower as the centrepiece of Henry II's rebuilding of the whole castle on an immense scale in the 1180s, pointing to its English and Continental ancestry as well as the people and political circumstances which brought about its creation. The second theme is concerned with the subsequent history of the building as an occasional royal residence, the end of royal interest in the 17th century and its later use as a prison, barracks and ordnance store between the 18th and 20th centuries. A final theme examines trends in how the building has been interpreted as a public monument since 1930 and especially its most recent presentation, in 2009, to evoke appreciation of its use as envisaged when first built in the late 12th century. This collection of 30 detailed illustrations focuses on activities within the castle and how the heavily fortified structure functioned. Included are views of the castle's moat, drawbridge, and other features, plus the Great Hall and dungeons. Also here are ready-to-color scenes of a lady doing needlework, a castle under siege, and more. Excerpt from Annals of Dover: Including Histories of the Castle, Port, Passage, Religion, the Corporation, Mayors Their Times, Corporation Officials, Representation in Parliament, and Social History Port and Fortress as fully as the limits of one volume will permit. In considering the order in which these Annals should be recorded, it had to be remembered that Dover presents many phases, and that, for centuries, many of its institutions have had their special spheres of operation; therefore, I have arranged the Annals in nine sections, under which the histories of the Castle, the Port, the Passage, Religion, the Corporation, the Mayors and their Times, Officers of the Corporation, Dover in Parliament, and Social Life are given. In gathering my materials I have been aided by the many manuscripts stored in the Dover Corporation's Muni ment Cabinet, and other records of Dover which are preserved in the British Museum and the Record Office. In writing of the Castle, however, I had to follow the track of earlier historians, for the original records of that ancient fortress have been scattered or destroyed. It is known, for instance, that an original

copy of Magna Charta, deposited at this Castle by Hubert de Burgh, soon after King John signed it, was, in the Reign of Charles I., handed by one of the Constable's Lieutenants to Sir Robert Cotton, who added it to his library, which is now in the British Museum. The same official dealt in like manner with some Saxon Charters and the famous Domesday Book of the Cinque Ports. The scattering of the Castle Records had begun much earlier and was continued later, therefore it is not a matter of surprise that there is little left at Dover Castle to encourage original research.
