Description: Building Wealth Slowly is really not so much a book about investing strategies in personal finance as it is a book about strategies for coping with the psychology of situations when events turn against you, in part because of variables that turned against you that were outside your personal control. However, this book also provides a series of keys for building wealth. Here are some of the ideas contained in this book. 1. Most people spend far too great a percentage of their incomes on things that will likely depreciate not appreciate over time. By not allocating some of their income to assets that may appreciate, a lot of people rule out the possibility of ever becoming wealthy. It is impossible to become wealthy without giving up some current consumption. 2. No one has ever built wealth by buying a motor vehicle. Virtually none of the new motor vehicles being sold today will ever become valuable collectibles. Cutting expenditures for motor vehicles is a most important way to get money that can be invested to build wealth. 3. Gold coins are not likely the best place to store and build wealth, in spite of the TV ads. If the economy is bad, people will not have enough money to eat let alone bid up the price of gold to record levels. Gold just sits there, and does not provide any useful service. Even stores of value can decline in price. 4. Any item sold by a private company with the word "Mint" in its name will never become a valuable collectible. Nearly all items sold by companies as collectibles will not even hold their value, let alone increase in value. It is a fool's game to try and become wealthy by buying items from companies that sell these things. The company that sells you the item might do well, but not you. 5. Diamonds increase in value. The problem is that jewelry stores sell them at huge markups, so it may be the 20th anniversary before the diamond is worth more than it cost just before the wedding. The people who make money investing in diamonds have specialized knowledge and skills. 6. Residential real estate can be a wealth builder, but is as not risk-free as people thought before 2007. Houses can and do go down as well as up in value, and making money on a house can be difficult. To make money, you need to know not only about general trends in

your town or city, but also what is happening in your subdivision and even street 7. Farmers can build wealth in farmland over long periods of times, but the value of farmland sometimes drops substantially and for long periods of time too. In the 1980s, a lot of farmers lost a lot of money in farmland. Owning farmland is no quick route to become wealthy. 8. A simple S&P 500 index fund is usually not the best way to invest in the stock market. If you want to invest in an index fund, for the reasons outlined in the book there are better indices than the S&P 500, options which will give you greater returns with less long-term volatility. 9. A terrible idea to buy stocks when prices are soaring, and then turn around and sell stocks just when share prices fall off a cliff. The opposite is a far better wealth-creation strategy, but most people have great difficulty doing that. It is psychologically tough to buy stocks when prices have fallen a lot, but a rising market can be really tough to resist. 10. The undesirable effects of price fluctuations in the stock market can be minimized with careful and thoughtful diversification. The book contains many ideas with respect to how to diversify and reduce your downside risks while maintaining a good rate-of-return. "Successfully building wealth requires discipline to spend money on things that can appreciate not depreciate over time, courage to follow your own ideas, patience to see your investments through, as well as a stubborn determination to become far wealthier ten years from now than you are today." This may be of the most important little investment book you'll ever read! Our mission is to help "One Million Families" become an example to their community of how powerful it is to be a wealth builder and live by CASH ONLY. Despite the current condition of your finances, this book will assist you in creating a wealthy mindset and lifestyle with a greater sense of ease and well-being. In this book you will learn how to:

- * Develop the wealth builders mindset
- * Create a financial plan that will lead you to financial success
- * Save to invest in income earning opportunities
- * Avoid the ten causes of financial failure
- * Get your financial house in order

The book discusses three immutable principles that successful wealth builders have used. The principles are implemented with simple, practical, and effective strategies for an average person to achieve financial success at any level that he/she truly desires. Principle one shows a simple way to help one achieve financial independence by retirement. Principle two identifies the root cause for earning money and shows how one can use it to earn financial abundance. Principle three reveals how greatly successful people use leverage to earn virtually unlimited income. Also discussed is a critical ingredient that empowers any simple business principle and any ordinary person. What is your number one investment priority? Beating the market averages? Finding the next "hot" stock? Making a modest ten percent a year on your money? If you found yourself nodding in agreement to any of those suggestions, you need to rethink your whole approach to money management. The number one goal of every investor should actually be to sleep comfortably at night. Personal finance expert Gordon Pape explains that if you adopt the sleep-easy philosophy as your basic credo and judge all your investment decisions on how well they meet this down-to-earth test, both your health and wealth will benefit.
