From the PREFACE of the edition of 1904. Many books have been written on Stairs and Hand-Railing, but so far as my experience extends, one of two objections has prevented them from being universally adopted by the operative workman. First, the books have been written by men who did not seem to think it necessary to begin at the beginning and first teach the young workman how to build a stair of the humblest sort, and thus lead him, step by step, until he became able, by gradual and natural acquirement, to erect and complete stairs of a better description. This objection I have found, by close observation and a knowledge of the wants of young workmen, to be fatal to the large sale of work published on the subject; and though I am fully aware that to the workman who has, from practical experience in the workshop or in the building, obtained a fair knowledge of stair-building and hand-railing, someone or other of the many excellent works now obtainable is a necessity, and it is not intended that this work will replace the more advanced ones. Yet, I think, that even the advanced stair-builder will be able to find something here that will more than repay for the cost. The second objection I have met with to the books on this subject now in the market, is their high price. Young and struggling workmen cannot afford to pay fancy prices for books they do not understand. GOULD'S AMERICAN STAIR-BUILDER, which is the lowest priced book on the subject published in this country, costs \$3.00; while MONCKTON'S NATIONAL STAIR-BUILDER costs \$5.00, and RIDELL'S UNIVERSAL STAIR-BUILDER costs \$7.50; and so it is with CUPPER, DEGRAFF, LOTH and other works. Doubtless, these books, every one of them, are worth the money asked for them, and the advanced workman would not be without a copy of any one of them if he had to pay double the market price; but while these books may be invaluable to the advanced stair-builder, they are not at all adapted to the wants of the uninitiated; and are as much out of place on the shelves of the young apprentice as a learned treatise on the lost tribes of Israel would be in the hands of a child struggling with alphabetical word-making. I have tried to avoid both the objections mentioned; first, by presuming that the reader knows nothing about the art of stair-building when he buys this book, and must necessarily commence at the beginning, and work his way up; second, by keeping the cost of the book down to such a price that the poorest apprentice boy may be able to procure it. This book will be followed by another on the same subject, one that will begin where this leaves off, thus enabling the student to pursue the subject to its highest domain. Of course, it is not intended that each work will be complete in itself, and that both works will cover the whole ground of Stair-Building and Hand-Railing. This book tells you easy steps about building a Positive Attitude. It explains all your queries like how, when, where, what, and who. This book will not only explain benefits and advantages of building positive attitude but detail step by step information about how to build positive attitude. Leading Young is a book aimed at refining the mindset of young people that they are capable of leading, that they are capable of taking up leadership positions, and that they are capable of excelling at such leadership positions. This practical guide is for anyone contemplating coaching as a career: coaches in training, coaches already trained and hoping to build a thriving coaching business. This totally revised second edition offers step by step guidance on what to do: · What does it take to be successful as a coach? · How long does it take? · Why it matters to get practice clients and where to find them · Why is it so important to think like a buyer rather than like a seller? · What can you charge? · How do you make yourself distinctive in a crowded market? · What do you need to do to attract clients? Which marketing materials and methods will pay off and which are a waste of time? · How can you exploit social media? · Overcoming your fear of selling: how to sell with integrity · Going for growth: what is involved in building an even bigger business? "Jenny Rogers has the rare ability to offer the lessons of decades of experience in ways which are practical to implement and easy to understand. This book is comprehensive – offering both high level concept and lots of important details on the kinds of things that differentiate the successful coaching professional from the crowd. Perhaps most importantly she offers proven, thorough answers to critical questions that many people would not even think to ask in setting up or developing a coaching business." Phil Hayes, Chairman, Management Futures, UK "Another great book from Jenny Rogers. I remember using the first edition of her book very early on in my career and remain hugely grateful for the informed insights and sensible suggestions. As always with Jenny's books, a new edition does not simply mean a few typos corrected and a couple of new references. In addition to the really helpful sections I remember from the first edition (e.g. on how to manage networking and selling whilst remaining authentic), Jenny has drawn on her experience and the courage

address some of the other really difficult issues that concern new coaches. How much should I charge? How will I find my clients? What training should I do? Even Where should I coach and What should I wear? I train new coaches every year and these are the questions they ask. I will certainly be recommending Jenny's book - and drawing on myself to help the coaches on my courses have the best possible start to their careers." Jane Cook, Managing Director, Linden Learning, UK "In a marketplace crowded with quick fixes and unrealistic promises, this book is a breath of fresh air! Drawing on the author's extensive experience, this book lays out a sober, practical approach, while also offering encouragement and inspiration. In her warm, compelling style, Jenny Rogers explores the essential steps towards building a sustainable coaching business—from improving your own coaching skills, to developing your brand, to marketing your services with integrity." Leni Wildflower, PhD, PCC, Knowledge Based Coaching in the Workplace, Fielding Graduate University, USA "This book is a must read for anyone who wants to earn a living through coaching. Jenny combines natural enthusiasm and positivity with a good dose of realism by applying a pragmatic and sometimes humorous lens to the business of coaching. No matter how experienced you are in running a coaching business, there is something in this book for everyone - from pragmatic hints and tips at start up stage through to some insightful checks and balances to ensure a consistently high service from established businesses. Jenny demonstrates a real depth of understanding about the questions that will/should be at the forefront of the minds of many new coaches about to set up in business. She has generated in depth answers, pragmatic lists of best practice and sound advice. Her sound advice will help pave the way to your success as a coach." Susan Binnersley, MD, Human Resources Limited, UK "I must admit when I picked up this book I wondered how Jenny could improve on her original book *Developing a Coaching Business*, however *Building a Coaching Business* is the essential guide for starting, growing and sustaining a business. Tailored to coaching, it provides a step-by-step guide full of tested methods, insight, ideas and practical information, and written in Jenny's engaging style. Her facilitative approach to selling is a gift. Having come from the public sector selling was one of my biggest challenges but when I use the facilitative approach I feel confident and professional. This is a book that challenges and inspires, and you will find yourself recommending it to other people, who may not even be coaches." Margaret Kelly, Executive Coach, Margaret Kelly Consulting, UK & Ireland "If those of my colleagues who decided to change their careers and set up a coaching business had got the right time access to this book, it would have been so much easier for them. To take into consideration all the practical issues as well as read about the newest trends and most effective approaches to such areas as selling. To have a different perspective and yet remember that the devil is the detail. Knowing all this can shorten the route to success, at the same time making the expectations more realistic. It is an obvious must for anybody who wants to build a coaching business. But I would also recommend this inspiring and comprehensive book to anybody who thinks of different options in their professional life." Dorota Porańska, Vice-President of the Board, DORADCA Consultants Ltd, Poland "I strongly recommend this book. Jenny Rogers addresses what one needs to know and be aware of for building and developing a coaching business. It is written in a down-to-earth, straight to the point, yet insightful and comprehensive way. Jenny doesn't avoid the uncomfortable questions, either mitigates what needs to be said or asks you to ponder. If you are serious about your coaching business and your coaching practice then this book is a must-read (and to pursue!!)." Ana Oliveira Pinto, Executive Coach, Portugal "This book is a must for coaches wanting business success. It gives executive coaches like me business savvy solutions to overcome things like the dread of networking. The best bit is the section on facilitative selling because it gives me a new and more authentic way to sell my services. The book is written in a warm, wise style with a wealth of practical advice and insights. It feels like Jenny is in your room coaching you - just without the coffee!" Jacqui Harper, INSEAD lecturer, Communication Coach, Author, Speaker "This beautifully written book is a must-read for anyone wanting to build a coaching business. It's chock-full of wisdom from someone who's been at the top of her profession for the last two decades. I read it when starting my business and remain indebted to it but now it's been substantially updated to reflect changes in the market and developments such as social media. If you feel daunted by the prospects of setting up a company, developing a brand, selling, networking or any of the myriad skills you need to be successful then I suggest you buy this book." Mark Wakefield, Director, Vogel Wakefield, the counter-consultancy, UK "A clear, systematic and down-to-earth primer on how to start, build and maintain a professional coaching business. After many years as a coach, I still find myself inspired by many of the ideas in this book. And she commendably grasps the nettle of coaching fees, for which many coaches should be very grateful!" Clare Brigstocke, Executive Coach, Lateralshift "Jenny Rogers' earlier *Developing a Coaching Business* has been a mainstay for Meyler Campbell Graduates for years, but this new version is even better. It has all the crucial basics, plus vital new material on quality, brand differentiation, integrity, and being future-ready. Warm, practical and honest, the book's wealth of tips, useful checklists, and an excellent section on how to should accelerate your business growth. From the lessons of a simple sandwich, to Enron, to coaching businesses, all stages of growth, it's all here - invaluable." Daniel Burke, Chairman, Meyler Campbell Excerpt from *Stair-Building Made Easy: Being a Full and Clear Description of the Art of Building the Bodies, Carriages and Cases for All Kinds*

No other resource—not even the building code—presents the exact code information you need, when you're at design stage The International Building Code (IBC) is a model building code developed by the International Code Council (ICC). The IBC and its complementary codes provide design and construction professionals with a complete set of comprehensive, coordinated building safety and fire prevention regulations in order to safeguard the public health and general welfare of the occupants of new and existing buildings and structures. Adopted throughout most of the United States and its territories, it is referenced by federal agencies, such as the General Services Administration, National Park Service, Department of State, U.S. Forest Service, and the Department of Defense. For architects and other design and construction professionals, it is particularly important that they understand how to apply the code and how code officials view buildings, so that they integrate code-required provisions in the earliest design stages of any project. Applying the IBC, as well as its companion codes, to building design is a process that is uniquely different from that of applying the building code during a planning review. Whereas other guide books explain the IBC in sequential order, from cover to cover, chapter by chapter, and section by section, Applying the Building Code explains the requirements of the IBC as they would apply during the common phases of design: from schematic design through to the preparation of construction documents. This effectively highlights applicable requirements of the building code at the appropriate stage of design based on available information. The book provides a 28-step process that is organized according to the three phases of architectural design: schematic design, design development, and construction documents Each step explains the application of the IBC, as well as other codes and standards referenced by the IBC (i.e. International Fire Code, International Energy Conservation Code, and ANSI A117.1) based on available project information Illustrations and examples are provided throughout that explain the code fundamentals associated with each step A single example project is used throughout the step-by-step process to illustrate how each step is applied and builds upon code and project information obtained through previous steps Guidance is also provided on the International Existing Building Code and how the step-by-step process is applied to projects involving existing buildings The role of the building department and its staff in regard to plan reviews and code enforcement
