*The Chicago Guide to Your Career in Science* Dec 23 2020 Embarking upon research as a graduate student or postdoc can be exciting and enriching—the start of a rewarding career. But the world of scientific research is also a competitive one, with grants and good jobs increasingly hard to find. *The Chicago Guide to Your Career in Science* is intended to help scientists not just cope but excel at this critical phase in their careers. Victor A. Bloomfield and Esam E. El-Fakahany, both well-known scientists with extensive experience as teachers, mentors, and administrators, have combined their knowledge to create a guidebook that addresses all of the challenges that today's scientists-in-training face. They begin by considering the early stages of a career in science: deciding whether or not to pursue a PhD, choosing advisors and mentors, and learning how to teach effectively. Bloomfield and El-Fakahany then explore the skills essential to conducting and presenting research. *The Chicago Guide to Your Career in Science* offers detailed advice on how to pursue research ethically, manage time, and communicate effectively, especially at academic conferences and with students and peers. Bloomfield and El-Fakahany write in accessible, straightforward language and include a synopsis of key points at the end of each chapter, so that readers can dip into relevant sections with ease. From students prepping for the GRE to postdocs developing professional contacts to faculty advisors and managers of corporate labs, scientists at every level will find *The Chicago Guide to Your Career in Science* an unparalleled resource. “*The Chicago Guide to Your Career in Science* is a roadmap to the beginning stages of a scientific career. I will encourage my own students to purchase it.”—Dov F. Sax, assistant professor of ecology and evolutionary biology, Brown University “Step-by-step, Victor Bloomfield and Esam El-Fakahany provide sound, thorough, yet succinct advice on every issue a scientist in training is likely to encounter. Young readers will welcome the authors’ advice on choosing a graduate school, for example, while senior scientists will probably wish that a book like this had been around when they were starting out. With down-to-earth and occasionally humorous advice, *The Chicago Guide to your Career in Academic Biology* belongs on the bookshelf of every graduate student and advisor.”—Norma Allewell, Dean, College of Chemical and Life Sciences, University of Maryland

*Work Your Career* Jun 09 2022 "The supposed extinction of the Indigenous Beothuk people of Newfoundland in the early nineteenth century is a foundational moment in Canadian history. Increasingly under scrutiny, non-Indigenous perceptions of the Beothuk have had especially dire and far-reaching ramifications for contemporary Indigenous people in Newfoundland and Labrador. *Tracing Ochre* reassesses popular beliefs about the Beothuk. Placing the group in global context, Fiona Polack and a diverse collection of contributors juxtapose the history of the Beothuk with the experiences of other Indigenous peoples outside of Canada, including those living in former British colonies as diverse as Tasmania, South Africa, and the islands of the Caribbean. Featuring contributions of Indigenous and non-Indigenous thinkers from a wide range of scholarly and community backgrounds, *Tracing Ochre* aims to definitively shift established perceptions of a people who were among the first to confront European colonialism in North America."--

Expensive college degrees are seen by our society as a requirement to enter the American workforce. Yet, many students fail to graduate with the skills and knowledge necessary to embark on a satisfying career path. The result is an unprepared individual, saddled with debt, and frustrated with a system that has left them hanging with respect to making good career decisions. . The concept of work-life balance continues to elude our society as thousands of workers complain of 'living to work' instead of 'working to live.' Her methods, encouragement and continued support have led me to find the right career path.- Helen D. I hated my job, wanted out, and didn't know where to begin. I had a decision to make: I could continue on the track to working my 9-5 job in front of a desk and let it define me and make me miserable, or look for something different. J.T.showed me that it's not your job that defines you at all;it's you who defines your job. She worked with me to figure out my strengths and work on my weaknesses. J.T.helped me learn that who I am is far more than the paycheck I bring in. Through that exploration of my own real desires, J.T.helped me to realize that I needed a far more creative outlet to be successful in. I can truly say that without J.T.'s help, I certainly would not be where I am today. I'm more aware of my life and the people in it...I absolutely love my job and really feel successful. I owe an immense amount of gratitude to J.T. for getting me to this place in my life. - Danielle H. Some readers were shocked, but millions more were electrified when they saw themselves reflected in its story of five young employees of a New York publishing company. Almost sixty years later, *The Best of Everything* remains touchingly—and sometimes hilariously—true to the personal and professional struggles women face in the city. There's Ivy League Caroline, who dreams of graduating from the typing pool to an editor's office; naïve country girl April, who within months of hitting town reinvents herself as the woman every man wants on his arm; and Gregg, the free-spirited actress with a secret yearning for domesticity. Jaffe follows their adventures with intelligence, sympathy, and prose as sharp as a paper cut.

We are in continuous momentum. What we are trying to do with this journal is to help people make sense of their careers through series of curated and well thought questions - we call it 55 socratic questions. It allows people to peel the layers of their career. The questions are very gentle. We also provide a context of why are we asking the questions and how you can answer it. We have also provided useful resources to help you answer it. This interactive workbook offers practical exercises, prompts, and insights to help individuals navigate their career paths, set goals, and make meaningful progress. The book also has an action planner section; where people can create and track their actions for career development.

*Advance Aug 23 2023 The how-to guide for your career In his previous book, Lose the Resume, Land the Job, author Gary Burnison exposed the myths and the ineffective thinking around how to land the job you really want. Now, in Advance, he takes readers through the next stage—advancing in their careers. Advance is extremely timely and topical in today's do-it-yourself career development world. Average job tenure has fallen to about four years on average and often only one or two years for younger professionals. These "career nomads" simply aren't around long enough to access career development from their employers. On the other end of the workplace spectrum, many employees find themselves stuck in one job without a promotion, without any raise to speak of, and with no opportunities to learn and grow. In Advance, Burnison lays out a mosaic of "how-to" advice that applies every day and at every level—the skills and behaviors that help people navigate their careers and stand out among the crowd. He takes on a "Top 20" of career must-haves: managing for the first time, engaging in the "money conversation" with your boss, dealing with difficult bosses (without quitting), coping with coworkers (without losing your mind), making presentations (that don't put people to sleep), mastering digital communication (and avoiding emails that will get you fired), thinking globally (without leaving your office), taking an overseas assignment, meeting senior leaders for the first time (without putting your foot in your mouth), navigating political waters (without sinking your career), reading and fitting in with the culture, and more. • Wisdom on taking your*

career to the next level • Career development tips • Guidance on being seen and heard • Written by the CEO of one of the world's largest management consulting firms Whether you're just starting your career, high up on the ladder, or "stuck" anywhere in between, Advance gives you the know-how to get on a path to where you want to go.

Miles teach readers to manage the interdependencies and interconnectedness among coworkers, managers, and others in a manner that supports personal career efforts. Then, they show how readers can become better players. The key to learning how to play the career game is "career agility"—in short, nimble individuals are better game players. This book includes conversations with a wide range of successful professionals such as Ursula Burns (Xerox), Stephen Elop (Microsoft), Marius Kloppers (BHP Billiton), Ken Frazier (Merck), and Liz McCartney (The St. Bernard Project), and discusses how their career moves demonstrate elements of a game theory approach to career management.
