A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers A Mind for Numbers and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: Why sometimes letting your mind wander is an important part of the learning process How to avoid "rut think" in order to think outside the box Why having a poor memory can be a good thing The value of

metaphors in developing understanding A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun. While online learning continues to be a rapidly expanding field of research, analyzing data allows educational institutions to fine tune their curriculum and teaching methods. Properly utilizing the data, however, becomes difficult when taking into account how socio-technical systems are used, the administration of those systems, default settings, how data is described and captured, and other factors. *Methods for Analyzing and Leveraging Online Learning Data* is a pivotal reference source that provides vital research on the application of data in online education for improving a system's capabilities and optimizing it for teaching and learning. This publication explores data handling, cleaning, analysis, management, and representation, as well as the methods of effectively and ethically applying data research. Tying together education and information science with special attention paid to informal learning, online assessment, and social media, this book is ideally designed for educational administrators, system developers, curriculum designers, data analysts, researchers, instructors, and graduate-level students seeking current research on capturing, analyzing, storing, and sharing data-analytic insights regarding online learning environments. "This book provides practitioners in the field of distance

education a case book that is a valuable reference of best practices in the field"--  
Provided by publisher. This new, extended workbook provides state-of-the-art practical tips for situational training and teaching, and it serves as a source of information and companion for those trainers and teachers who want to make their mark. It is also designed as accompanying material for seminars on the subject of "Train the Trainer in Business (AHK)" concluded by a certification by the German Chamber of Commerce. The guide is part of the first module of your "Train the Trainer in Business (AHK)" - (AHK = "Auslandshandelskammer": German Chamber of Commerce). Recoge: 1. Executive summary - 2. Introduction - 3. Volume one is the first of a series of historical documents designed to provide information on instructional improvement projects that have received grants and loans from the California Community College Fund for Instructional Improvement. This introduction to Business Functions delivers the knowledge and skills required to understand the key characteristics of business organisations and the core functions that contribute to their operations. This textbook introduces readers to digital business from a management

standpoint. It provides an overview of the foundations of digital business with basics, activities and success factors, and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing and connecting technologies, with a focus on industry 4.0, smart business services, smart homes and digital consumer applications, as well as artificial intelligence. The book then turns to digital business models in the B2C (business-to-consumer) and B2B (business-to-business) sectors. Building on the business model concepts, the book addresses digital business strategy, discussing the strategic digital business environment and digital business value activity systems (dVASs), as well as strategy development in the context of digital business. Special chapters explore the implications of strategy for digital marketing and digital procurement. Lastly, the book discusses the fundamentals of digital business technologies and security, and provides an outline of digital business implementation. A comprehensive case study on Google/Alphabet, explaining Google's organizational history, its integrated business model and its market environment, rounds out the book. Many global companies have been focused upon strategic executive development within a competitive environment. Often this has resulted in

complex theoretical models which have had little or no practical application or impact. Leading-edge companies worldwide have established best practice in this area. This book shows how action learning can result in the effective and successful implementation of strategic executive development. [Administration (référence électronique)]. Business Decision Analysis is part of a major new national programme of texts and modules designed for undergraduate students on Business Studies degree courses. It provides 150 hours of high quality study to be used in a supported learning environment. The module provides a comprehensive introduction to the quantitative analysis and solution of business problems and covers some of the key topics in the field, including an introduction to model building for business decision analysis, linear programming, regression analysis, time-series analysis and simulation techniques. Business Decision Analysis contains numerous activities and exercises to develop an understanding of the subject, including many utilizing Microsoft Excel in version 5.0 or later (not supplied with this publication). The module provides the most effective teaching and learning resource available at this level. Business and Company Law brings together two Wiley law titles into a single volume, designed to suit the typical combined unit taught in the Master of Professional Accounting program. The complimentary code for the interactive Wiley E-Text: Powered by VitalSource

provides an engaging learning experience, with author videos, animations and interactives embedded at the point of learning. Focused on the application of commercial and corporate law to business, the problem-based learning modules connect course concepts with real-world legal scenarios, requiring you to apply higher-order thinking skills to solve problems. Business Studies is a course of four modules to prepare students for the HIGCSE or similar examinations. The modules have been developed for the Cambridge Open Learning Project (COLP) to provide access to quality education for students in Southern Africa. • The outcomes-based approach encourages students to give their own ideas • Modules are divided into units • Self-mark activities reinforce learning • Exercises help learners measure progress • Summaries reinforce what students have learnt • Answers to questions are provided • Real-life case studies from Southern Africa are included Games, Simulations and Playful Learning in Business Education takes a fresh, insightful look at original and innovative ways of incorporating games, simulations and play to enhance the quality of higher education learning and assessment across business and law disciplines. Chapters cover wide-ranging business areas such as marketing, accounting and strategy and include practical advice, tips and thoughts on how to strengthen existing learning techniques to include a fun element. Lloyd Lim, who operated a small family business

for more than ten years, knows that not everyone is a business genius. But anyone-- even first-time entrepreneurs--can learn basic concepts that will help them spot issues, ask the right questions, and operate a successful enterprise. In this business guidebook, you'll get guidance on launching a business that fits your natural strengths. Learn how to: - maintain a competitive advantage over time; - observe the difference between upside risk and downside risk; - value customers giving you meaningful feedback; and - develop a strategic plan to help you succeed. Lim also touches on key concepts such as cultivating relationships, slashing costs prudently, and developing the right mindset. The appendix contains a series of staff training modules that any organization can adapt for its own use.
