Excerpt from *The Gods of the Egyptians, Vol. 1: Old and New Kingdoms*. Egyptian Mythology. Hundreds of gods are mentioned. If to these be added the names of all the mythological beings which occur in the various Books of the Underworld, we shall find that the number of the gods who were recognized by the theologians of the sixth Dynasty at Thebes was about twelve hundred. If all the religious texts of this period from all the religious centres of Egypt were available for study, we should certainly find the names of hundreds of additional local gods, goddesses, and mythological beings could be collected from them. With such a number of gods to consider, it was impossible for confusion not to arise in the mind of the theologian when dealing with them, and the texts prove that he found the gods as difficult to group and classify as the investigator. The attributes of hundreds of them were vague and shadowy, and the greater number of them were merely provincial gods, to whom circumstances had given some transient importance, which resulted in their names being recorded in writing. In fact, the theologian of ancient Egypt found it impossible to form a system of gods which should be consistent in all its parts, and should assign to earth gods, water gods, air gods, fire gods, city gods, nome gods, national gods, and foreign gods, the exact position and attributes which were due in it. From one point of view the modern investigator is more fortunate than the Egyptian theologian. He has more materials upon which to work, and, as a rule, he is better equipped for his inquiry. The Egyptian theologian knew nothing about the study of comparative religion, and he was sadly hampered by his own methods. The Search for God in Ancient Egypt is a distillation of Jan Assmann's views on ancient Egyptian religion, with special emphasis on theology and the search for the divine. Deeply rooted in the texts of ancient Egypt and thoroughly informed by comparative religion, theology, anthropology, and semiotic analysis, Assmann's interpretations reveal the complexity of Egyptian thought in a new way. Assmann takes special care to distinguish between the "implicit" theology of Egyptian polytheism and the "explicit" theology that is concerned with exploring the problem of the divine. His discussion of polytheism and mythology addresses aspects of ritual, the universe, and myth; his consideration of explicit theology includes theodicy and the specifics of Amarna religion.
