He and his friends begin to notice the intense colors and the true form of animals and nature alike. They start to notice the variances in their skin tone and hair color and become excited by the fact that everyone is so unique. Although they love how their classmates look different on the outside, they are happy that they are still the same on the inside. Made for young readers, five to eight years old, this book features portraits that celebrate the diverse beauty of human skin. By depicting people from all over the world against a background that matches their skin tone, Angélica Dass challenges the racially charged colors we use to describe race. What does it mean to be seen as "white," "black," "yellow," "red," or "brown"? The pictures show how people and humanity are much richer and more complex than these categories, rendering the labels we use absurd. This book also reveals how every conceivable skin color in the world can be recreated from a mix of only three colors, which we all share. Through Dass's words and pictures, the book celebrates diversity as humankind's most powerful resource and inspires readers to rethink how we see each other. ?Is the first of a series of coloring books that were created to celebrated the joy, influence, pride and imagination of the Black experience.
