Critical thinking is the key to solve real world problems. Children must be taught how to think, not what to think. A great teacher will be creating students to do new things through critical thinking, not simply repeating what other generations have done before. We do not need another Albert Einstein or Isaac Newton.... we need a person better than them.

100 Questions (and Answers) About Statistics May 15 2020 In an increasingly data-
driven world, it is more important than ever for students as well as professionals to
better understand basic statistical concepts. **100 Questions (and Answers) About
Statistics** addresses the essential questions that students ask about statistics in a concise
and accessible way. It is perfect for instructors, students, and practitioners as a
supplement to more comprehensive materials, or as a desk reference with quick
answers to the most frequently asked questions. “The key strength of this book is the
straightforward approach. I love the to-the-point question-and-answer format. . . . This

book would be useful in both statistics and research methods courses . . . [and] in math tutoring labs. I love the tone the author uses, as it is not condescending. Students will be encouraged.” —Jamie Brown, Mercer University “The sequencing of the questions works very well—from the most basic to the more intimidating questions often asked by students in an intro class. . . . If Dr. Salkind is the author, I know it will be well-written, and both entertaining and easy to understand.” —Linda Martinez, California State University, Long Beach “Practical examples from all types of work: showing the steps to do each analysis and then the ways to use the results responsibly.” —Jennifer R. Salmon, Eckerd College
