This book examines on an international basis how small and medium-sized enterprises (SMEs) cope with the changing economic and social challenges, which are also reflected in financial and non-financial reporting. To this end, it presents six case studies from Germany, Hungary, Romania, Poland, Italy, and the United Kingdom, with a particular focus on integrated reporting (IR). The cases presented are drawn from collaborative research within the international network of INTEREST, an international project on integrated reporting for SME transparency. The book will be of interest to researchers and practitioners. This book presents the Proceedings of the 54th Winter School of Theoretical Physics on Simplicity of Complexity in Economic and Social Systems, held in Łądek Zdrój, Poland, from 18 to 24 February 2018. The purpose of the book is to introduce the new interdisciplinary research that links statistical physics, and particular attention is given to link physics of complex systems, with financial analysis and sociology. The main tools used in these areas are numerical simulation of agents behavior and the interpretation of results with the help of complexity methods, therefore a background in statistical physics and in physics of phase transition is necessary to take the first steps towards these research fields called econophysics and sociophysics. In this perspective, the book is intended to graduated students and young researchers who want to begin the study of this established new area, which connects physicists, economists, sociologists and IT professionals, to better understand complexity phenomena existing not only in physics but also in complex systems being seemingly far from traditional view at physics. From the moment of its launch in 1998, the Rover 75 caught the public's imagination. Here, at last, was a car that felt like traditional Rovers and had been designed in Britain. Rover 75 and MG ZT charts the evolution of the models from the early 1990s onwards including full production histories and comprehensive specification details. Contents include: the development and production of the Rover 75 under BMW in the 1990s; becoming the MG Rover Group - from BMW to Phoenix Venture Holdings; expanding the Rover 75 with Longbridge Rover Saloons and Tourers; the MG models of the new millennium - the ZT and ZT-T; monogram 75, the five-millionth Rover; a facelift for the cars with the new V8 engines; moving production to China and the end of the MG Rover Group. Illustrated with 267 colour photographs, this is essential reading for motoring enthusiasts and fans of the Rover brand. An examination of the greening of the automotive industry by the path dependence of countries and carmakers' trajectories. Three sources of

path dependency can be detected: business models, consumer attitudes, and policy regulations. The automobile is changing and the race towards alternative driving systems has started! This volume brings together selected papers from the 17th EBES Conference, organized in Venice in winter 2015. The theoretical and empirical papers present the latest research in diverse areas of business, economics, and finance from many different regions. They chiefly focus on the interactions between economic development, entrepreneurship and financial institutions, especially putting the spotlight on cross-country evidence. Topics range from women's entrepreneurship and economic regulation, to sustainability and climate change. This book provides researchers, professionals, and students a great opportunity to catch up on the latest studies in different fields and empirical findings on many countries and regions. Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry. Proceedings of the FISITA 2012 World Automotive Congress are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by Society of Automotive Engineers of China (SAE-China ) and the International Federation of Automotive Engineering Societies (FISITA). This proceedings focus on solutions for sustainable mobility in all areas of passenger car, truck and bus transportation. Volume 3: Future Automotive Powertrains (I) focuses on: •Alternative Fuel and New Engine •Advanced Hybrid Electric Vehicle •Plug-in Electric Vehicle Above all researchers, professional engineers and graduates in fields of automotive engineering, mechanical engineering and electronic engineering will benefit from this book. SAE-China is a national academic organization composed of enterprises and professionals who focus on research, design and education in the fields of automotive and related industries. FISITA is the umbrella organization for the national automotive societies in 37 countries around the world. It was founded in Paris in 1948 with the purpose of bringing engineers from around the world together in a spirit of cooperation to share ideas and advance the technological development of the automobile.
