Focus: Music of Northeast Brazil examines the historical and contemporary manifestations of the music of Brazil, a country with a musical landscape that is layered with complexity and diversity. Based on the author's field research during the past twenty years, the book describes and analyzes the social/historical contexts and contemporary musical practices of Afro-Brazilian religion, selected Carnival traditions, Bahia's black cultural renaissance, the traditions of rural migrants, and currents in new popular music. Part One, Understanding Music in Brazil, presents important issues and

topics that encompass all of Brazil, and provides a general survey of Brazil's diverse musical landscape. Part Two, Creating Music in Brazil, presents historical trajectories and contemporary examples of Afro-Brazilian traditions, Carnival music, and northeastern popular music. Part Three, Focusing In, presents two case studies that explore the ground-level activities of contemporary musicians in Northeast Brazil and the ways in which they move between local, national, and international realms. The accompanying downloadable resources offer vivid musical examples that are discussed in the text Explores how modern folklore, through its preservation of ballads and folktales, supplements our understanding of the oral tradition and enhances our knowledge of early literature. Bantu Contribution in Brazilian Popular Music:

Ethnomusicological Perspectives is a seminal work that spearheaded the new trend in ethnomusicology, when this discipline shifted the focus of its objective from music in human history to music in culture contact, and from the comparative method of analysis to ethnographic description. This study addresses a long overdue concern among students of Africanisms in the Americas in general and in Brazil in particular. The concern is that cultural practices and musical instruments have been indiscriminately attributed to Africa without identifying their actual "ethnic" or cultural group, or revealing the traditional function these musical elements fulfilled in their respective societies of origin. Although the author is fully aware of cultural similarities among cultural groups in Africa, he also recognizes peculiarities that characterize groups and regions. To demonstrate this, he has applied a holistic method to answer why is

Brazilian (popular) music the way it is, and for the first time, to address the crucial concern of culture contact, especially that of the transfer and transformation of African musical materials in Brazil. The author relied heavily on functional structuralism, collective memory, reinterpretation, contextual analysis, and hermeneutic theories to formulate the comprehensive explanation of the transfer and adaptation of Africanisms in the African diaspora of the Americas. He argues that the rupture resulting from transatlantic slavery affected the way Africans thought about their musical elements in the Americas by keeping its African structure and adopting European functions. "First published in 2000 by Pluto Press, London, England"--T.p. verso. This book is a comparative analysis of the history of popular music and folk studies in Chile, Argentina, and Brazil as it relates to society, culture, and representations of national

identity. When droughts hit northeastern Brazil, thousands of rural workers are forced to abandon their homes for the cities in search of work. The double impact of drought and corruption—with politicians taking advantage of drought to buy votes and pilfer government accounts—contributes to an endless cycle of human suffering. In order to understand the impact of drought and the phenomenon of drought politics, Nicholas Gabriel Arons goes beyond traditional social-science scholarship to sources such as novels, poetry, popular art, and oral history. For many people in the region, these artistic renditions of life are, ironically, a better reflection of reality than political rhetoric, government archives, and newspaper accounts—even though they are infused with myth or hyperbole. Drawing on interviews with artists and poets and on his own experiences in the Brazilian Northeast, Arons has written a poignant account of how

drought has impacted the region's culture. He intertwines ecological, social, and political issues with the words of some of Brazil's most prominent authors and folk poets to show how themes surrounding drought—hunger, migration, endurance, nostalgia for the land—have become deeply embedded in Nordeste identity. Through this tapestry of sources, Arons shows that what is often thought of as a natural phenomenon is actually the result of centuries of social inequality, political corruption, and unsustainable land use. *Waiting for Rain* dramatically depicts a region still suffering from austere social and political realities, where drought—even during rainy seasons—is ubiquitous in the hearts and minds of its residents. A book of hope and resistance, myth and reality, and suffering and salvation, it is also a personal narrative of self-discovery, tracing a young man's struggle to understand how human tragedy on a grand scale can exist alongside

natural beauty. Brazilian music is more than a soundtrack for the streets and dancehalls of Rio, more than the cool bossas ans sambas of the late-night jazz clubs. It is a music of the people. Musica Brasileira takes the rader through the dense and intricate landscapes of Brazilian popular music. English version of *Aconteceu no Brasil: Crônica de um Pesquisador Norte-Americano II*. The book is a continuation of the first volume in the series published in 2012 in both Portuguese and English: *Adventures of a Gringo Researcher in Brazil in the 1960s*. It continues Curran's love affair with Brazil and the Brazilians and work in Brazil from 1969 to 1985; a third volume to be published in coming years will bring everything to the present. This volume deals with various researches and travel trips to Brazil, the author now professor at Arizona State University. Themes will be continued research on the *Literatura de Cordel*, conferences, important moments with authors of *cordel* and Brazilian Literature, the odyssey of publishing in Brazil, journeys to new parts of Brazil, and fine moments of tourism with wife, Keah. Brazilian Philology in Rio de Janeiro where the author is introduced to the Luso-Brazilian Academic World and especially in 1981 when Curran took part in the 50 Years of Literature of Jorge Amado Commemoration in Salvador da Bahia. Among other memorable moments over the years was the trip with wife Keah to Brazil in 1985. The occasion was to receive a literary prize combined with new tourism to various parts of the country. Written in the spirit and style of the genre of short chronicles in Brazil, the book will comment as well on the political, economic and social scene over the years and will note the many changes in the dynamic Brazil of the late twentieth century. Anthropologists widely agree that identities--even ethnic and racial ones--are

socially constructed. Less understood are the processes by which social identities are conceived and developed. Legalizing Identities shows how law can successfully serve as the impetus for the transformation of cultural practices and collective identity. Through ethnographic, historical, and legal analysis of successful claims to land by two neighboring black communities in the backlands of northeastern Brazil, Jan Hoffman French demonstrates how these two communities have come to distinguish themselves from each other while revising and retelling their histories and present-day stories. French argues that the invocation of laws by these related communities led to the emergence of two different identities: one indigenous (Xoco Indian) and the other quilombo (descendants of a fugitive African slave community). With the help of the Catholic Church, government officials, lawyers, anthropologists, and activists,

each community won government recognition and land rights, and displaced elite landowners. This was accomplished even though anthropologists called upon to assess the validity of their claims recognized that their identities were "constructed." The positive outcome of their claims demonstrates that authenticity is not a prerequisite for identity. French draws from this insight a more sweeping conclusion that, far from being evidence of inauthenticity, processes of construction form the basis of all identities and may have important consequences for social justice. Complementing *Ethnomusicology: An Introduction*, this volume of studies, written by world-acknowledged authorities, places the subject of ethnomusicology in historical and geographical perspective. Part I deals with the intellectual trends that contributed to the birth of the discipline in the period before World War II. Organized by national schools of scholarship,

the influence of 19th-century anthropological theories on the new field of "comparative musicology" is described. In the second half of the book, regional experts provide detailed reviews by geographical areas of the current state of ethnomusicological research. The *Britannica Enciclopedia Moderna* covers all fields of knowledge, including arts, geography, philosophy, science, sports, and much more. Users will enjoy a quick reference of 24,000 entries and 2.5 million words. More than 4,800 images, graphs, and tables further enlighten students and clarify subject matter. The simple A-Z organization and clear descriptions will appeal to both Spanish speakers and students of Spanish. Monteiro.--John A. Coleman "Theological Studies" The present volume contains the texts of the speeches and papers presented at the World Forum as well as of the "Plan of Action". The Forum was organized by UNESCO and WIPO in cooperation with

Ministry of Commerce, Thailand. Although Brazilian scholars have collected and studied folklore since the second half of the nineteenth century, their work has gone largely unnoticed by folklorists working in other parts of the world. With the exception of anthropologists who occasionally study the folk literature of indigenous peoples in Brazil, few foreigners are familiar with, or even aware of, the kinds of folklore studies that have been undertaken in that country. This work, first published in 1994, aims to characterize the nature of Brazilian narrative studies and trends; to discuss and assess the roots of the apparent preoccupations, approaches and objectives of traditional narrative scholarship in Brazil; to examine Brazilian folklore scholarship in light of Euro-American research; and to point out the results and accomplishments of Brazilian research while simultaneously indicating possibilities for new directions in research. Annotation copyright by Book News, Inc., Portland, OR "Relebrando-A Velha Literatura de Cordel e a Voz dos Poetas" really contains three important studies on the "cordel" 1) the revision and translation of Curran's PhD dissertation from 1968; 2) the augmentation of one of the chapters of the dissertation, treating Brazil's best known and pioneering poet Leandro Gomes de Barros; 3) the publication of a now historic series of interviews with forty "cordel" poets and publishers in the late 1970s. Curran dedicates much time and energy to this endeavor because he believes the researches were little known in their original form, and more importantly, with the passage of time and the evolution of the "cordel" and Brazil in general, they now remain as historic documents in Brazil's national cultural history. Sean Stroud examines how and why Música Popular Brasileira (MPB) has come to have such a high

status, and why the musical tradition (including MPB) within Brazil has been defended with such vigour for so long. He emphasizes the importance of musical nationalism as an underlying ideology to discussions about Brazilian popular music since the 1920s, and the key debate on so-called 'cultural invasion' in Brazil. The roles of those responsible for the construction of the idea of MPB are examined in detail. Stroud analyses the increasingly close relationship that has developed between television and popular music in Brazil with particular reference to the post-1972 televised song festivals. He goes on to consider the impact of the Brazilian record industry in the light of theories of cultural imperialism and globalization and also evaluates governmental intervention relating to popular music in the 1970s. The importance of folklore and tradition in popular music that is present in both Mário de Andrade and Marcus Pereira's efforts to 'musically map' Brazil

is clearly emphasized. Stroud contrasts these two projects with Hermano Vianna and Itaú Cultural's similar ventures at the end of the twentieth century that took a totally different view of musical 'authenticity' and tradition. Stroud concludes that the defence of musical traditions in Brazil is inextricably bound up with nationalistic sentiments and a desire to protect and preserve. MPB is the musical expression of the Brazilian

middle class and has traditionally acted as a cultural icon because it is associated with notions of 'quality' by certain sectors of the media. This award-winning social history of death and funeral rites during the early decades of Brazil's independence from Portugal focuses on the Cemiterada movement in Salvador, capital of the province of Bahia. The book opens with a lively account of the popu
