National Policy, Global Giants Dec 01 2021 What can we tell about the future of automobiles and the industries that make them by examining their past? Wormald and Rennick trace the history of powered land transport, the rise and fall of the railways, the spectacular rise of the automobile, and what might come next. Delving into the mighty and complex automotive industry, following the growth of the markets and production, this book illustrates the globalization of vehicle manufacturers and component suppliers, giving form to the development of the industry's business model. A key factor in an auto-industry's successes and failures is the often-difficult relationship it has with government, which varies in nature from country

to country. As an illustrative case, Wormald and Rennick present and analyse the entire lifecycle of Australia's automotive history - including its birth, growth, functioning and death - and its shifting relationship with the government that supported it.

City Cycling Jul 20 2023 A guide to today's urban cycling renaissance, with information on cycling's health

benefits, safety, bikes and bike equipment, bike lanes, bike sharing, and other topics. Bicycling in cities is booming, for many reasons: health and environmental benefits, time and cost savings, more and better bike lanes and paths, innovative bike sharing programs, and the sheer fun of riding. City Cycling offers a guide to this urban cycling renaissance, with the goal of promoting cycling as sustainable urban transportation available to everyone. It reports on cycling trends and policies in cities in North America, Europe, and Australia, and offers information on such topics as cycling safety, cycling infrastructure provisions including bikeways and bike parking, the wide range of bike designs and bike equipment, integration of cycling with public transportation, and promoting cycling for women and children. City Cycling emphasizes that bicycling should not be limited to those who are highly trained, extremely fit, and daring enough to battle traffic on busy roads. The chapters describe ways to make city cycling feasible, convenient, and safe for commutes to work and school, shopping trips, visits, and other daily transportation needs. The book also offers detailed examinations and illustrations of cycling conditions in different urban environments: small cities (including Davis, California, and Delft, the Netherlands), large cities (including Sydney, Chicago, Toronto and Berlin), and “megacities” (London, New York, Paris, and Tokyo). These chapters offer a closer look at how cities both with and without

historical cycling cultures have developed cycling programs over time. The book makes clear that successful promotion of city cycling depends on coordinating infrastructure, programs, and government policies.

The Way Forward also offers a detailed critique of not only President Obama but of the progressive movement as a whole--its genesis, its underlying beliefs and philosophies, and how its policies are steering the country to certain ruin. Peace Operations and Restorative Justice May 18 2023

With a bold vision and a distinctive message, Reddy stipulates that international peacekeeping can be designed and implemented using the principles of restorative justice. To prove this, Reddy discusses the congruence of crime, armed conflict and violent disorder, critiquing restorative justice and its nuanced character as a suitable application to complex civil wars. This book provides a comprehensive survey of peace operations and then focuses on the cases of Somalia and Bougainville. The comparison between their societal contexts, their conflicts, peace operations and final outcomes are crucial to this argument. Furthermore, this shows how the constraining, maximising and emergent values of restorative justice can be applied in a peacekeeping setting, from the overall command level through to the behaviours of deployed peacekeepers - with direct contemporary application. This sharp study makes for evocative reading as it introduces the new concept of regeneration as key to any restoratively arranged peace operation. Military, police, NGO and civilian peacekeeper practitioners, as well as academic theorists, can use this unique work to produce better and more lasting results for conflict ridden communities.
