**Fascinating Facts about Phytonutrients in Spices and Healthy Food** Mar 29 2023 For centuries, there have been claims that healthy food garnished with exotic spices and condiments provides vital nutrients that help ward off diseases, especially preventable diseases such as diabetes and heart disease (hypertension, coronary artery disease) and promote longevity. The purpose of writing this book is to update the public about the health benefits of ingredients (phytochemicals) in spices and healthy food using existing scientific evidence. The ultimate proof of health benefits will be deciphered by the isolation and identification of specific phytochemicals acting on specific receptors in the body exerting their biological effects. The important point being emphasized is that if the physiological effect of an ingredient is glaring, it is considered to elicit a significant response. However, when the effect of an ingredient is significant, yet the effect is not readily perceivable then the usefulness goes unnoticed and can be questioned as a myth. For example, coffee has several ingredients, but only caffeine acting on the adenosine receptors stimulates the central nervous system and promotes wakefulness. Similarly, the specific active ingredient in hot chili pepper, capsaicin, activates a member of a recently identified family of receptors called transient receptor potential (TRP) channels. TRP vanilloid 1 (TRPV1), which is involved in certain modalities of pain, promotes the release of hormones in the gastrointestinal (GI) tract. Although, the bioavailability of the active ingredients is low, it is important to realize that these ingredients can cause significant local effects in the GI tract by preventing cholesterol regeneration by subduing microbiota, inhibiting precancerous growth by promoting calcium influx and stimulating nerve endings to transmit information and to release of gut hormones that are involved in regulating a variety of functions including appetite and satiety.

**Doberman Pinscher** Feb 25 2023 Do you know that that Doberman Pinschers need to have their owner be their guide and in command? And do you know that the size alone of Doberman Pinschers acts as a deterrent for most burglars? It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the scent of grass. Many times we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's beauty. Know the details and habits of a dog as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book. But beware, prepare for the challenge! You will have to be able to answer the questions that your child will ask you by showing off their deep knowledge in the microworld of the Doberman Pinscher: -Mom, do you know what the other names Doberman Pinschers are called? I do! -Hey dad, do you know where Doberman Pinschers came from? I do! -Grandpa, do you know why Doberman Pinschers need to be an inside dog? I do! -Grandma, do you know what the average height of a Doberman Pinscher is? I do! -Sarah, you're my big sister, and you've studied a lot, but I bet you don't know what the standard colors of a Doberman Pinscher is! I know that. You don't need anything else; just one click on "Buy Now," and you will let your child live a magical new adventure with his new friend Doberman Pinscher and the magic natural world of dogs.

**Organizing Information in School Libraries** Sep 10 2021 Covering both classification and cataloging principles as well as procedures relevant to school libraries, this book provides a teaching kit for a course on this critical subject that includes content and practice exercises. A valuable resource for instructors in LIS programs who teach courses in cataloguing with an emphasis on school libraries, this textbook explains the nuts and bolts of classification and cataloging as well as the functionality of integrated library systems and how these systems critically serve the mission of the school. Author Cynthia Houston covers Web 2.0 and the social networking features of these systems as well as examining in detail the principles and procedures for subject classification using Sears subject headings or Dewey Decimal Classification using the Sears tool. This teaching tool kit addresses the cataloging of print materials, audiovisual materials, and electronic materials separately—but all within the specific context of the school library. It supplies a number of examples and exercises to reinforce the key concepts and skills as well as to demonstrate the real-world applications of learning concepts and procedures. Based directly on Houston's extensive experience in teaching classification and cataloging courses, the included content and practice exercises enable instructors to use this book for content, for instruction, and for providing student feedback.
