The Digitization of Healthcare Apr 17 2020 Combining conceptual, pragmatic and operational approaches, this edited collection addresses the demand for knowledge and understanding of IT in the healthcare sector. With new technology outbreaks, our vision of healthcare has been drastically changed, switching from a 'traditional' path to a digitalized one. Providing an overview of the role of IT in the healthcare sector, *The Digitization of Healthcare* illustrates the potential benefits and challenges for all those involved in delivering care to the patient. The incursion of IT has disrupted the value chain and changed business models for companies working in the health sector, and also raised ethical issues and new paradigms about delivering care. This book illustrates the rise of patient empowerment through the development of patient communities such as PatientLikeMe, and medical collaborate platforms such as DockCheck, thus providing a necessary tool to patients, caregivers and academics alike.

Traumatic Brain Injury Sep 22 2020 Advocating a pragmatic and multidisciplinary approach to the management of patients with brain injuries, *Traumatic Brain Injury* provides a detailed description of care along the whole-patient pathway. Delivering an evidence-based update on the optimal care of both adult and paediatric patients who have sustained injuries ranging from mild to severe, information from on-going

multi-centre studies in neurotrauma is included. The basic scientific principles of neuropathology, head injury research and scoring systems are presented before detailed sections on emergency department care, patient transfer, intensive care and longer-term care. Rehabilitation is reviewed in detail with chapters discussing the aims and roles of physiotherapy, occupational therapy and neuropsychology amongst others. Discussing medico-legal issues in detail, the effect of injury on the individual and their family are also examined. Emphasising a holistic approach to caring for patients with brain injuries, this is an essential guide for all involved.

One Year On, Improvement Review of NHS Grampian's Clinical Governance Arrangements in Maternity Services Jul 01 2021

Transgender Health Jul 21 2020 The number of people coming out as transgender continues to rise, and this book shows healthcare and medical practitioners how to deliver excellent primary and secondary care to gender diverse patients. This guide provides accessible and practical advice on tailoring the social and ethical aspects of practice to the needs of each individual. Beyond setting out how clinical procedures should work for gender reassignment, it explains how to use language and pronouns in a respectful way, provides information on transgender services and resources, and offers insights into the challenges commonly faced by transgender people in both medical and social contexts. Based on cutting edge research and the lived experience of the author as a non-binary person, this is essential reading for all those working to meet the needs of transgender people in healthcare settings.

Clinical Skills for Healthcare Assistants and Assistant Practitioners Aug 22 2020 *Clinical Skills for Healthcare Assistants and Assistant Practitioners* is an accessible, easy-to-read guide, outlining the fundamental and core skills integral to clinical practice. Fully updated in its second edition, this book is divided into three sections; the first looks at fundamental skills applicable to all staff, such as accountability, communication and record keeping. Section two explores core clinical skills such as respiratory care, pulse, blood glucose management and catheter care. Section three outlines complex clinical skills that require more in-depth training, such as medication and intravenous cannulation. An invaluable resource for healthcare assistants and assistant practitioners, this book will also be of use to newly qualified practitioners, and students in health and social care.

Memories from the Frontline Feb 08 2022 Whilst the world was in 'lockdown' due to the COVID-19

pandemic in 2020, NHS key workers continued to work relentlessly, both caring for those affected by this deadly virus and endeavouring to protect us from catching it. In this book, NHS Grampian healthcare workers recount their memories from this unprecedented time. Talking to former nurse, Kairen Griffiths, NHS healthcare workers from all disciplines document this historic period by sharing their pandemic accounts. From a porter and domestic, through to a consultant and senior medical practitioners, these extraordinary stories tell of commitment and care in the face of uncertainty and individual emotional challenges. The result is a book of poignant, uplifting and powerful stories that are full of emotion, honesty and resilience. The COVID-19 pandemic has undoubtedly taken its toll on huge swathes of the population, but this book recognised the enormous contribution of our healthcare workers over the last few years.

Breastfeed Here Mar 29 2021

Healthy at Work Oct 24 2020 This book aims at exploring the link between corporate and organizational culture, public and private policies, leadership and managerial skills or attitudes, and the successful implementation of work-related healthcare in Europe. Therefore it brings together a wide range of empirical and theoretical contributions from occupational health, management, psychology, medicine, economics, and (organizational) sociology to address the question of how to sustainably promote occupational health. Such important questions are explored as: What aspects of a corporate culture can be associated with health issues? How does leadership style affect the health of employees? How are health-related decisions in the workplace affected by the political environment? To what extent are interventions influenced by corporate culture, leadership and public policy? How can we make such interventions sustainable?

Grampian Action Plan Aug 26 2023

Betraying the NHS Dec 26 2020 Based on his experiences of helping to fight cuts and closures in Suffolk, Michael Mandelstam delivers a damning verdict on the mismanagement of the NHS at national, regional and local level. He charts the widespread cutbacks and closures, both rural and urban, to clinics, A&E services, beds, wards and scores of community hospitals. He outlines how humane care, particularly for older people, is compromised by the ruthless determination of NHS management to increase patient throughput and hit government-set targets. The author highlights how the chaotic change to the NHS is being driven by concealed agendas - including privatisation of the NHS, obsessive interference from central government as well as selective use, if not abandonment, of evidence-based practice. Seriously flawed and damaging decisions are the result, affecting the population at large as well as those most vulnerable - older people with chronic and complex needs, people with physical or learning disabilities and people with mental health problems. Above all, he exposes the scandalous lack of transparency and accountability behind changes that threaten to destroy the NHS.
