The Flow of Management Ideas Mar 17 2022 The widespread promotion of management ideas, their regular inclusion in textbooks and business school curricula and their use in organizational change programs has engendered debates about the impact of these ideas on management and organizational practice. Based on analyses of managerial audience members' activities and related meaning-making prior to, during and after guru events with leading management thinkers, this book sheds new light on how management practitioners come to use management ideas in the different relevant contexts of their working lives. The authors argue that a broader, more differentiated and more dynamic view of managerial audiences is essential in understanding the impact of management ideas as well as the nature of contemporary managerial work. For scholars and students in organisation studies,

knowledge management and management consultancy, as well as reflective management practitioners.

Key Ideas in Sociology Aug 29 2020 With each passing generation, contemporary members of society are intrigued by how those who lived before them viewed and dealt with their changing world. Newer generations borrow ideas from their predecessors and adapt those ideas to new circumstances in order to define and manage social change. Key Ideas in Sociology, Second Edition explores some of the major ideas that have developed out of this tradition and evaluates their origins, their development, and their relevance at the dawn of the twenty-first century. The book follows the course of key concepts that have shaped sociological discourse from the founding period in the nineteenth century to the present, and examines four key ideas that have played a central role—industrial society, democracy, individualism, and modernity. Author Peter Kivisto brings these concepts alive by connecting them to the legendary figures responsible for developing, revising, and expanding sociological theory.

The Idea Hunter May 31 2023 A different way of discovering and developing the best business ideas Jack Welch once said, "Someone, somewhere has a better idea." In this myth-busting book, the authors reveal that great business ideas do not spring from innate creativity, or necessarily from the brilliant minds of people. Rather, great ideas come to those who are in the habit of looking for great ideas all around them, all the time. Too often, people fall into the trap of thinking that the only worthwhile idea is a thoroughly original one. Idea Hunters know better. They understand that valuable ideas are already out there, waiting to be found - and not just in the usual places. Shows how to expand your capacity to find and develop winning business ideas Explains why ideas are a critical asset for every manager and professional, not just for those who do "creative" Reveals how to seek out and select the ideas that best serve your purposes and goals and define who you are, as a professional Offers practical tips on how to master the everyday habits of an Idea Hunter, which include cultivating great conversations The book is filled with illustrative accounts of successful Idea Hunters and stories from thriving "idea" companies. Warren Buffet, Walt Disney, Thomas Edison, Mary Kay Ash, Twitter, and Pixar Animation Studios are among the many profiled.

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 1 Feb 01 2021 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just that, by looking at the big ideas at the first-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

Crowdstorm May 19 2022 A practical guide to tapping into the abundant ideas and talent outside your organization Successful organizations are constantly searching for new ideas. Historically, organizations have looked to their employees and select partners. They have used techniques like brainstorming to gather and evaluate ideas. However, in today's market, talent and new ideas can be found everywhere. The Internet has enabled organizations to greatly expand their searches far beyond their four walls. Instead of ten or one hundred people, organizations from startups to Fortune 500 firms can work with thousands or tens of thousands to discover and assess many, many more ideas (as well as prototypes, partners and people). We call this Crowdstorming. But how do you organize so many people and ideas

to get the best results? Our goal is to help our readers make Crowdstorming work; to help more organizations engage with people far beyond their organizational borders, to find better ideas, solutions, talent and partners so we can address some of our most challenging problems -- not just for the sake of business, but for our society, too. Shaun Abrahamson has spent more than a decade as an early stage investor and advisor partnering with leading startups and global organizations to identify, create and launch new businesses enabled by newly possible relationships with customers and experts. Peter Ryder is the former President of Jovoto and has broad experience as a consultant helping organizations improve their business through the use of new technologies. Bastian Unterberg is the founder and CEO of Jovoto, a Berlin and NYC based firm that organizes a 40,000 person strong creative community to work with global brands on problems ranging from new product design to sustainable architecture.

The Metaphysical Club Oct 24 2022 The Metaphysical Club is the winner of the 2002 Pulitzer Prize for History. A national bestseller and "hugely ambitious, unmistakably brilliant" (Janet Maslin, New York Times) book about the creation of modern American thought. The Metaphysical Club was an informal group that met in Cambridge, Massachusetts, in 1872, to talk about ideas. Its members included Oliver Wendell Holmes Jr. future associate justice of the United States Supreme Court; William James, the father of modern American psychology; and Charles Sanders Peirce, logician, scientist, and the founder of semiotics. The Club was probably in existence for about nine months. No records were kept. The one thing we know that came out of it was an idea -- an idea about ideas. This book is the story of that idea. Holmes, James, and Peirce all believed that ideas are not things "out there" waiting to be discovered but are tools people invent -- like knives and forks and microchips -- to make their way in the world. They thought that ideas are produced not by individuals, but by groups of individuals -- that ideas are social. They do not develop according to some inner logic of their

own but are entirely dependent-- like germs -- on their human carriers and environment. And they thought that the survival of any idea depends not on its immutability but on its adaptability. The *Metaphysical Club* is written in the spirit of this idea about ideas. It is not a history of philosophy but an absorbing narrative about personalities and social history, a story about America. It begins with the Civil War and ends in 1919 with Justice Holmes's dissenting opinion in the case of *U.S. v. Abrams*—the basis for the constitutional law of free speech. The first four sections of the book focus on Holmes, James Peirce, and their intellectual heir, John Dewey. The last section discusses some of the fundamental twentieth-century ideas they are associated with. This is a book about a way of thinking that changed American life.

Monetizing Your Ideas May 26 2020 Ideas change how we live; our lives are improved by creative and innovative ideas birthed by people courageous enough to act on their ideas. People who never give up until their idea becomes a reality. Many people have ideas however some have no clue what to do with their ideas and others just bury their ideas and never do anything about them. In this book, I will show you how to generate and develop great ideas, how to develop a strategic plan, how to determine your target market, how to choose your team and keep them inspired through the process from concept to profit and how to develop a quality brand that lasts. Above all I believe you will be inspired to work on your ideas, to follow your passion and to be the best you possibly can be.

Novel Ideas Dec 14 2021 *Novel Ideas* provides a substantial introduction to the elements of fiction followed by in-depth interviews with successful novelists who speak with candor and insight into the complex process by which a novel is made. This edition includes new and updated interviews as well as writing exercises to enhance its use in the writing classroom. Dorothy Allison recalls “deliciously self-indulgent” days of writing in her bathrobe, wrapped in misery and exultation; Peter Cameron explains how he made the move from short fiction to the novel with the aid of a music composer’s notebook to track the movement of his characters.

Writers as different as Ha Jin, Jill McCorkle, Richard Ford, and Michael Chabon describe their unique approaches to their work while consistently affirming the necessity of committing to the hard effort of it while also remaining open to surprise. Aspiring novelists will find hands-on strategies for beginning, working through, and revising a novel; accomplished novelists will discover new ways to solve the problems they face in process; and serious readers of contemporary fiction will enjoy a glimpse into the way novels are made. Includes interviews with: Dorothy Allison, Larry Brown, Peter Cameron, Michael Chabon, Michael Cunningham, Robb Forman Dew, Richard Ford, Ha Jin, Patricia Henley, Charles Johnson, Wally Lamb, Valerie Martin, Jill McCorkle, Sena Jeter Naslund, Lewis Nordan, Sheri Reynolds, S. J. Rozan, Jane Smiley, Lee Smith, Theodore Weesner

Where Do You Get Your Ideas? Apr 17 2022 Discover the Journal From Initial Idea to Completed Story A wardrobe that leads to a fantasy world...a rendition of Hamlet told by Rosencrantz and Guildenstern...the life and times of the Wicked Witch of the West.... Just where do successful writers get their ideas? Author Fred White demystifies the creative process of idea generation by breaking it down into six essential stages: idea recognition, idea incubation, outlining, research, drafting, and revision. In *Where Do You Get Your Ideas?* you will learn: • How to create, organize, and keep a writer's notebook. • Where to look for ideas--in daily observations, books, news articles, and magazines--and how to recognize a story when you see one. • Techniques for developing ideas into creative works of fiction and non-fiction: free-associating, listing, mapping, and collaging. • How to transform a good idea into a great story, novel, or memoir. With practical advice, techniques, and exercises, plus 75 seminal ideas to jump-start your creativity, *Where Do You Get Your Ideas?* will pull back the curtain on the magic of idea generation and reveal the wealth of writing inspiration right in front of you.

Greek and Roman Political Ideas Jan 15 2022 What is politics? What are the origins of political philosophy? What can we learn from the Greeks and Romans? In *Greek and Roman Political Ideas*, acclaimed classics scholar Melissa Lane introduces the reader to the foundations of Western political thought, from the Greeks, who invented democracy, to the Romans, who created a republic and then transformed it into an empire. Tracing the origins of political philosophy from Socrates to Cicero to Plutarch, Lane reminds us that the birth of politics was as much a story of individuals as ideas.

Turning Ideas into Research Jul 09 2021 How do you turn a really good idea into a really good question, and how do you turn this into successful research? Barbara Fawcett and Rosalie

Pockett use their expertise as supervisors and researchers to provide you with the frameworks and the theoretical and practical guidance you need to design, carry out and communicate your research effectively. Using a range of examples that relate research to the real world, they demonstrate: how to develop research questions how to select appropriate theoretical frameworks how to integrate theoretical perspectives with empirical research how to gather and interpret data how to ensure that the research undertaken makes a difference. The authors' user-friendly approach emphasizes the importance of participation, collaboration and inclusivity, and examines worldviews and understandings of knowledge in order to enable greater critical reflection. Chapters provide guidance on achieving impact with your research, and feature reflective questions to enhance your engagement with the issues covered. This text is the ideal companion as you set about transforming your ideas into robust research.

Ideas Against Ideocracy Jul 21 2022 This groundbreaking work by one of the world's foremost theoreticians of culture and scholars of Russian philosophy gives for the first time a systematic examination of the development of Russian philosophy during the late Soviet period. Countering the traditional view of an intellectual wilderness under the Soviet regime, Mikhail Epstein provides a comprehensive account of Russian thought of the second half of the 20th century that is highly sophisticated without losing clarity. It provides new insights into previously mostly ignored areas such as late-Soviet Russian nationalism and Eurasianism, religious thought, cosmism and esoterism, and postmodernism and conceptualism. Epstein shows how Russian philosophy has long been trapped in an intellectual prison of its own making as it sought to create its own utopia. However, he demonstrates that it is time to reappraise Russian thought, now freed from the bonds of Soviet totalitarianism and ideocracy but nevertheless dangerously engaged into new nationalist aspirations and metaphysical radicalism. We are left with not only a new and exciting interpretation of recent Russian intellectual history, but also the opportunity to rethink our own philosophical heritage.

Ideas Arrangements Effects Aug 10 2021 Ideas are embedded in social arrangements, which in turn produce effects. With this simple premise, this radically accessible systems design book makes a compelling case for arrangements as a rich and overlooked terrain for social justice and world building. Unpacking how ideas like racism and sexism remain sturdy by embedding themselves in everything from physical and social infrastructure to everyday speech and thought habits, this book gives readers the tools to sense, intervene in and imagine new arrangements.

The Sociology of Educational Ideas Feb 13 2022 This study, first published in 1973, examines the principles that lie behind educational dilemmas, and helps to clarify the difficulties of explanation, justification and practical action in the educational system. The author explores various key concepts in the education process, such as Intelligence, Equal Opportunity, Knowledge and Selection. She shows that different and often contrasting interpretations of these concepts imply certain assumptions about the nature of man, the

genesis and knowledge, the education process and its relation to society. This title will be of interest to students of sociology and education.

Testing Business Ideas Feb 25 2023 A practical guide to effective business model testing 7 out of 10 new products fail to deliver on expectations. History of Political Ideas, Volume 8 May 07 2021 Reaching into our own time, Crisis and the Apocalypse of Man confronts the disintegration of traditional sources of meaning and the correlative attempt to generate new sources of order from within the self. Voegelin allows us to contemplate the crisis in its starkest terms as the apocalypse of man that now seeks to replace the apocalypse of God. The totalitarian upheaval that convulsed Voegelin's world, and whose aftermath still defines ours, is only the external manifestation of an inner spiritual turmoil. Its roots have been probed throughout the eight volumes of History of Political Ideas, but its emergence is marked by the age of Enlightenment. In our postmodern era, discussions of the collapse of the "enlightenment project" have become commonplace. Voegelin compels us to follow the great-souled individuals who sought to go from disintegration of the present toward evocations of order for the future. Such thinkers as Comte, Bakunin, and Marx suffered through the crisis and fully understood the need for a new outpouring of the spirit. They resolved to supply the deficiency themselves. As a consequence they launched us irrevocably on the path of the apocalypse of man. One of the great merits of Voegelin's analysis is his exposition of the pervasive character of this crisis. It is not confined to the megalomaniacal dreamers of a revolutionary apocalypse; rather, echoes of it are found in the more moderate Enlightenment preoccupation with progress to be attained through application of the scientific method. Faith in the capacity of instrumental reason to answer the ultimate questions of human existence defined men such as Voltaire, Helvétius, Diderot, D'Alembert, and Condorcet. It remains the authoritative faith of our world today, Voegelin argues, demonstrated by our continuing inability to step outside the parameters of the Enlightenment. Are we condemned, then, to oscillate between the rational incoherence of a science that never delivers on its promises and a now discredited revolutionary idealism that wreaks havoc in practice? This is the question toward which Voegelin's final volume points. While not direct, his response is evident everywhere. Crisis and the Apocalypse of Man could have been written only by a man who had reached his own resolution of the crisis.

[The Shape of Ideas](#) Jun 19 2022 “[Snider has] created something unique: a synthesis of comics, philosophy, and poetry: a thoughtful new way of packaging eternal ideas in cartoon boxes.” —The Los Angeles Review of Books What does an idea look like? And where do they come from? Grant Snider’s illustrations will motivate you to explore these questions, inspire you to come up with your own answers and, like all Gordian knots, prompt even more questions. Whether you are a professional artist or designer, a student pursuing a creative career, a person of faith, someone who likes walks on the beach, or a dreamer who sits on the front porch contemplating life, this collection of one- and two-page comics will provide insight into the joys and frustrations of creativity, inspiration, and process—no matter your age or creative background. “A creative kaleidoscope of humor, insight, and truth. An inventive window into the creative experience filled with hope and encouragement for daydreamers and doodlers, sketchers and scribblers, inventors, explorers, and spinners of yarns.” —Clare Vanderpool, New York Times-bestselling, Newbery Medal-winning author “Grant Snider’s work delivers introspection, humor, and inspiration in visually stunning drawings. They are a colorful look into the creative process—from the moments of quiet contemplation to the days of frenzied desperation.” —Susan Cain, #1 New York Times-bestselling author of *Quiet: The Power of Introverts in a World That Can’t Stop Talking* “A friendly, encouraging depiction of the creative process, with its highs and lows, from a comics creator.” —The Milwaukee Journal-Sentinel
