Tugboats on Puget Sound Feb 19 2023 While square-rigged sailing ships, steamboats and ferries, and ever-larger cruise and cargo-carrying vessels have made their mark on Puget Sound's maritime history, no other vessels have captured the imagination of shore-bound seafarers like tugboats. Beginning in the 1850s when the first steam-powered tugboats arrived in the Sound from the East Coast via San Francisco, company owners and their crews competed fiercely for business, towing ships, log rafts, and barges. The magnetic attraction of powerful, tough tugs both large and small is unexplainable but enduring. This book, featuring about 200 rare historic images and carefully researched text, tells the colorful story of tug boating on Puget Sound.

At once a portrait of two sisters—the rebellious, independent Minna and her inhibited sister, Martha—and of the compelling and controversial doctor who would be revered as one of the twentieth century's greatest thinkers, *Freud's Mistress* is a novel rich with passion and historical detail and "a portrait of forbidden desire [with] a thought-provoking central question: How far are you willing to go to be happy?"* *Publishers Weekly

The Widow Wave Jun 11 2022 Will anyone ever know what happened to the Aloha, a sport fishing boat that vanished with all onboard in the Pacific off San Francisco's coast? 'Knowing' is a complex, inexact business. There's real truth and then there's courtroom truth; a jury's verdict may or may not approach what actually happened. Nor can someone reading about such an event—one that had no witnesses or hard evidence to explain it—be sure where the truth lies. But trials, judges, and juries are what we use in our legal system to find truth. The Widow Wave explores this alternate reality. It is a fascinating true-life mystery and lawyer procedural rolled into one. Jay Jacobs offers no facile answers—and he's not the flawless protagonist typically starring in such dramas. He lets us see how such a big wrongful death case really unfolds, in a true story that reads like a novel. Will the jury find the truth? Will the reader? "An intelligently told true story of honor, integrity and justice. The Widow Wave reminded me of The Perfect Storm, played out in a taut courtroom thriller. Jay Jacobs masterfully weaves the harrowing tale of the last voyage of the Aloha, and courtroom battle that followed. A great read." — Robert Dugoni, New York Times Bestselling Author of My Sister's Grave "A compelling story of a modern day maritime tragedy that beautifully discusses the vital importance of advances in observational technologies, forecasts and communications in avoiding future loss of life at sea. Jacobs skillfully weaves together the legal, scientific and maritime narratives to enthrall and educate the reader." — Julie Thomas, Scripps Institution of Oceanography, Manager of the Institute of Geo and Planetary Physics "Trial lawyer Jay Jacobs, in a unique, personally revealing memoir, defends a widow and her deceased husband's honor in an intimate first person account of how the civil trial process unfolds.... The reader will learn about the strategies, shoals, and embroilments of a real life, vigorously contested trial with its many emotional upheavals." — Justice James Marchiano (ret.), formerly Presiding Justice, California Court of Appeals, First Appellate District "Jacobs' vivid prose pulls you into a compelling drama, deftly transporting you from the courtroom to the storm-tossed Pacific and back to the courtroom again. The book reads like a well-wrought detective novel." — Daniel James Brown, New York Times Bestselling Author of The Boys in the Boat

Called Again Oct 03 2021 In 2011, Jennifer Pharr Davis became the overall record holder on the Appalachian Trail. By hiking 2,181 miles in 46 days - an average of 47 miles per day - she became the first female to ever set that mark. But this is not a book about records or numbers; this is a book about endurance and faith, and most of all love. The most amazing part of this story is not found at the finish, but is discovered through the many challenges, lessons and relationships that present themselves along the trail. This is Jennifer's story, in her own words, about how she started this journey with a love for hiking and more significantly a love for her husband Brew. Together, they were able to overcome rugged mountains and raging rivers, sleet storms and 100 degree heat, shin-splints and illnesses. They made new friends and tested old friendships; they shared together laughter, and tears - a lot of tears. But, through it all, they fell more in love with one another and with the wilderness. By completing this extraordinary amateur feat, Jennifer rose above the culture of multi-million dollar sports contracts that is marked by shortcuts and steroids. This is the story of a real person doing something remarkable. Jennifer Pharr Davis is a modern role-model for women - and men. She is an authentic hero.

Molecular improvement of cereal crops May 30 2021 From the pre-historic era to modern times, cereal grains have been the most important source of human nutrition, and have helped sustain the increasing population and the development of human civilization. In order to meet the food needs of the 21st century, food production must be doubled by the year 2025, and nearly tripled by 2050. Such enormous increases in food productivity cannot be brought about by relying entirely on conventional breeding methods, especially on less land per capita, with poor quality and quantity of water, and under rapidly deteriorating environmental conditions. Complementing and supplementing the breeding of major food crops, such as the cereals, which together account for 66% of the world food supply, with molecular breeding and genetic manipulation may well provide a grace period of about 50 years in which to control population growth and achieve sustainable development. In this volume, leading world experts on cereal biotechnology describe the production and commercialization of the first generation of transgenic cereals designed to substantially reduce or prevent the enormous losses to cereal productivity caused by competition with weeds, and by various pests and pathogens, which is an important first step in that direction.

CookWise Sep 14 2022 In CookWise, food sleuth Shirley Corriher tells you how and why things happen in cooking. When you know how to estimate the right amount of baking powder, you can tell by looking at the recipe that the cake is overleavened and may fall. When you know that too little liquid for the amount of chocolate in a recipe can cause the chocolate to seize and become a solid grainy mass, you can spot chocolate truffle recipes that will be a disaster.
