Toddlers may not understand the sentences right away, but they are absorbing concepts at an early age, so exposure is a valuable advantage that will pay off in the years to come. We also address the linguistic differences between Spanish speaking countries so basic Spanish learners will be aware of the fact that words in Spanish have different meanings across cultures since some Spanish words and sentences are very culture-specific. Students always ask us "how to learn Spanish fast?" The more you understand what is Spanish about, the faster you will learn it. Spanish, like any other language, will have some easy to translate words like "apple" (manzana), but in some occasions, even fruit translations may vary: "banana" could be banana in some countries, banano or plátano in others. The secret is going from the very basic communication into deeper layers. Obviously, if you are going to be a tourist, you don't need to learn words that are used by mechanics or engineers. If you target the communication skills you will be using, your learning experience will be more effective.
