Next Gen DevOps Apr 26 2021 Next Gen DevOps is a step-by-step guide helping managers and executives successfully transition to DevOps and SRE. Supported by experiences gained in a range of organisations, large and small the book and framework of the same name, can help anyone structure their transformation project.

The Empire of the Great Mughals Jun 09 2022 Annemarie Schimmel has written extensively on India, Islam and poetry. In this comprehensive study she presents an overview of the cultural, economic, militaristic and artistic attributes of the great Mughal Empire from 1526 to 1857.

Imperial Identity in the Mughal Empire Jun 28 2021 Having monopolized Central Asian politics and culture for over a century, the Timurid ruling elite was forced from its ancestral homeland in Transoxiana at the turn of the sixteenth century by an invading Uzbek tribal confederation. The Timurids travelled south: establishing themselves as the new rulers of a region roughly comprising modern Afghanistan, Pakistan and northern India, and founding what would become the Mughal Empire (1526-1857). The last survivors of the House of Timur, the Mughals drew invaluable political capital from their lineage, which was recognized for its charismatic genealogy and court culture - the features of which are examined here. By identifying Mughal loyalty to Turco-Mongol institutions and traditions, Lisa Balabanlilar here positions the Mughal dynasty at the centre of the early modern Islamic world as the direct successors of a powerful political and religious tradition.

Micronutrient Deficiencies in Global Crop Production Apr 07 2022 A deficiency of one or more of the eight plant micronutrients (boron, chlorine, copper, iron, manganese, molybdenum, nickel and zinc) will adversely affect both the yield and quality of crops. Micronutrient deficiencies in crops occur in many parts of the world, at various scales (from one to millions of hectares), but differences in soil conditions, climate, crop genotypes and management, result in marked variations in their occurrence. The causes, effects and alleviation of micronutrient deficiencies in crops in: Australia, India, China, Turkey, the Near East, Africa, Europe, South America and the United States of America, are covered, and these are representative of most of the different conditions under which crops are grown anywhere in the world. Links between low contents of iodine, iron and zinc (human micronutrients) in staple grains and the incidence of human health problems are discussed, together with the ways in which the micronutrient content of food crops can be increased and their bioavailability to humans improved. Detailed treatment of topics, such as: soil types associated with deficiencies, soil testing and plant analysis, field experiments, innovative treatments, micronutrients in the subsoil, nutrient interactions, effects of changing cropping systems, micronutrient budgets and hidden deficiencies in various chapters provides depth to the broad coverage of the book. This book provides a valuable guide to the requirements of crops for plant micronutrients and the causes, occurrence and treatment of deficiencies. It is essential reading for many agronomy, plant nutrition and agricultural extension professionals.

Frontier of Faith Dec 03 2021 "Frontier of Faith" examines the history of Islam-especially that of local "mullahs," or Muslim clerics-in the North-West Frontier. A largely autonomous zone straddling the boundary of Pakistan and Afghanistan, the Tribal Areas was established as a strategic buffer zone for British India, and the resulting autonomy allowed local mullahs to assume roles of tremendous power. After Partition in 1947, the Tribal Areas maintained its status as an autonomous region, and for the next fifty years the "mullahs" supported armed mobilizations in exchange for protection of their vested interests in regional freedom. Consequently the Frontier has become the hinterland of successive, contradictory "jihads" in support of Pashtun ethnicism, anti-colonial nationalism, Pakistani territorialism, religious revivalism, Afghan anti-Soviet resistance, and anti-Americanism. Considering this territory is said to be the current hiding place of Osama bin Laden, there couldn't be a

better time for a sourcebook detailing the intricacies of the Pakistan-Afghanistan borderlands today and the function of the "mullahs" and their allies.

Soft Computing for Biomedical Applications and Related Topics Feb 17 2023 This book presents innovative intelligent techniques, with an emphasis on their biomedical applications. Although many medical doctors are willing to share their knowledge – e.g. by incorporating it in computer-based advisory systems that can benefit other doctors – this knowledge is often expressed using imprecise (fuzzy) words from natural language such as "small," which are difficult for computers to process. Accordingly, we need fuzzy techniques to handle such words. It is also desirable to extract general recommendations from the records of medical doctors' decisions – by using machine learning techniques such as neural networks. The book describes state-of-the-art fuzzy, neural, and other techniques, especially those that are now being used, or potentially could be used, in biomedical applications. Accordingly, it will benefit all researchers and students interested in the latest developments, as well as practitioners who want to learn about new techniques.

Bridging the Gulf: EU-GCC Relations at a Crossroads Jan 24 2021 Relations between the European Union (EU) and the Gulf Cooperation Council (GCC) are at a crossroads. After the derailment of the negotiations for the Free Trade Agreement (FTA) in 2008, the cooperation between the two regional blocs has remained low-key in a number of different areas, while the unprecedented changes that have taken place in North Africa and the Middle East, the common neighbourhood of the EU and the GCC, have not led to a renewed, structured cooperation on foreign and security policy issues. This volume addresses the shortcomings and potential of EU-GCC relations by taking stock of their past evolution and by advancing policy recommendations as to how to revamp this strategic cooperation. In this light, it highlights the areas where greater room for manoeuvre exists in order to enhance EU-GCC relations, discusses the instruments available and sheds light on the features of the regional and international context that are likely to significantly influence the new phase in the mutual relation between the two blocs. The book is the result of the research conducted in the framework of the project "Sharaka – Enhancing Understanding and Cooperation in EU-GCC Relations" co-funded by the European Commission.

The Free Negress Elisabeth Jan 04 2022 "She was an 18th century black Surinamese woman worth millions of dollars. But she sought the forbidden: to marry a white man. Why, when she already had so much?" "Elisabeth Samson's immense wealth puzzled many early historians who concluded that it could only have been the result of an inheritance from a master with whom she had lived and by whom she had been set free. After all, how could a woman during a period of slavery and institutionalised discrimination have accumulated so much wealth? And why, then, was she so eager to marry a white man in a time when whites established their own rules and standards for all? The novel is set in eighteenth-century Dutch Guiana (Suriname) where it was not unusual for a white man to solicit black women. Instead, we remain intrigued with this mysterious, fascinating, and intelligent black woman's dream of marrying a white man, in defiance of all norms and conventions, to gain the acceptance she craves in Dutch colonial society."--BOOK JACKET.

Climate Change and Migration Oct 01 2021 Climate change and migration are major concerns in the MENA region, yet the empirical evidence on the impact of climate change and extreme weather events on migration remains limited. Information is broadly lacking on how households in vulnerable areas perceive changes in the climate, how they are affected by extreme weather events, whether they benefit from community and government programs to help them cope with and adapt to a changing climate, and how these conditions influence the decision of household members to migrate, either temporarily or permanently. This introductory chapter summarizes briefly the main results of the study which relied on existing data as well as focus groups and new household surveys collected in 2011 in Algeria, Egypt, Morocco, Syria, and Yemen. The results suggest that households do perceive important changes in the climate, and that many households are being affected by extreme weather events resulting in losses in income, crops, and livestock. The coping and adaptation strategies used by households to deal with weather shocks are diverse, but also limited, with most households not able to recover from the negative impact of weather shocks. The ability of community level responses and government programs to support households is also very limited. Finally, while climate change is not today the main driver of migration flows, it does appear to contribute substantially to these flows, so that worsening climatic conditions are likely to exacerbate future migration flows.

Political Islam, Citizenship, and Minorities Jun 21 2023 This book discusses the relationship between religion and politics in the Middle East and the future of political Christianity. The emergence of political Islam and the recent changes in political Christianity in the region have both contributed to a new perception of the role of Arab Christians.

Lithium and Cell Physiology May 08 2022 Lithium and Cell Physiology explores the role of lithium in a wide range of physiologic contexts. The contributions reflect the most recent advances in our understanding of the biochemical, pharmacological, and clinical applications of this metal ion. The book discusses how lithium modulates cells of the immune system, stimulates granulopoiesis, and influences the course of viral infections. The effect of lithium on the skin, as well as

on inositol phosphate metabolism, cell growth, magnesium-dependent enzymes, and essential fatty acids and prostaglandins is discussed.

Interpreting Global Security Oct 21 2020 This edited collection explores the fruitfulness of applying an interpretive approach to the study of global security. The interpretive approach concentrates on unpacking the meanings and beliefs of various policy actors, and, crucially, explains those beliefs by locating them in historical traditions and as responses to dilemmas. Interpretivists thereby seek to highlight the contingency, diversity, and contestability of the narratives, expertise, and beliefs that inform political action. The interpretive approach is widespread in the study of governance and public policy, but arguably it has not yet had much impact on security studies. The book therefore deploys the interpretive approach to explore contemporary issues in international security, combining theoretical engagement with good empirical coverage through a novel set of case studies. Bringing together a fresh mix of world renowned and up-and-coming scholars from across the fields of security studies, political theory and international relations, the chapters explore the beliefs, traditions, and dilemmas that have informed security practice on the one hand, and the academic study of security on the other, as well as the connections between them. All contributors look to situate their work against a broader historical background and long-standing traditions, allowing them to take a critical yet historically informed approach to the material.

What's Cooking America Nov 14 2022 Friendly and inviting -- bound to be a classic -- What's Cooking America, with clarity, organization and thoroughness, offers more than 800 family-tried-and-tasted recipes. accompanied by a wealth of information. This book will move into America's kitchens to stay. Here's the information you'll have at your fingertips: -- A treasure trove of unique. easy-to-follow recipes from all over America readily transforms every "cook" into a "chef". -- An eye-pleasing page layout -- enhanced by lively illustrations -- that defies confusion and presents pertinent information with clarity and orderliness. -- Well-organized, standardized listings of ingredients for no-mistake food preparation. -- Accurate, time-tested mixing and cooking tips, hints and historical tidbits. -- Informative, instructive and entertaining sidebars for easy perusal.

IoT Dec 15 2022 IOT: Security and Privacy Paradigm covers the evolution of security and privacy issues in the Internet of Things (IoT). It focuses on bringing all security and privacy related technologies into one source, so that students, researchers, and practitioners can refer to this book for easy understanding of IoT security and privacy issues. This edited book uses Security Engineering and Privacy-by-Design principles to design a secure IoT ecosystem and to implement cybersecurity solutions. This book takes the readers on a journey that begins with understanding the security issues in IoT-enabled technologies and how it can be applied in various aspects. It walks readers through engaging with security challenges and builds a safe infrastructure for IoT devices. The book helps readers gain an understand of security architecture through IoT and describes the state of the art of IoT countermeasures. It also differentiates security threats in IoT-enabled infrastructure from traditional ad hoc or infrastructural networks, and provides a comprehensive discussion on the security challenges and solutions in RFID, WSNs, in IoT. This book aims to provide the concepts of related technologies and novel findings of the researchers through its chapter organization. The primary audience includes specialists, researchers, graduate students, designers, experts and engineers who are focused on research and security related issues. Souvik Pal, PhD, has worked as Assistant Professor in Nalanda Institute of Technology, Bhubaneswar, and JIS College of Engineering, Kolkata (NAAC "A" Accredited College). He is the organizing Chair and Plenary Speaker of RICE Conference in Vietnam; and organizing co-convenor of ICICIT, Tunisia. He has served in many conferences as chair, keynote speaker, and he also chaired international conference sessions and presented session talks internationally. His research area includes Cloud Computing, Big Data, Wireless Sensor Network (WSN), Internet of Things, and Data Analytics. Vicente García-Díaz, PhD, is an Associate Professor in the Department of Computer Science at the University of Oviedo (Languages and Computer Systems area). He is also the editor of several special issues in prestigious journals such as Scientific Programming and International Journal of Interactive Multimedia and Artificial Intelligence. His research interests include eLearning, machine learning and the use of domain specific languages in different areas. Dac-Nhuong Le, PhD, is Deputy-Head of Faculty of Information Technology, and Vice-Director of Information Technology Apply and Foreign Language Training Center, Haiphong University, Vietnam. His area of research includes: evaluation computing and approximate algorithms, network communication, security and

vulnerability, network performance analysis and simulation, cloud computing, IoT and image processing in biomedical. Presently, he is serving on the editorial board of several international journals and has authored nine computer science books published by Springer, Wiley, CRC Press, Lambert Publication, and Scholar Press.

The Cost of Sugar Sep 12 2022 The Cost of Sugar is an intriguing history of those rabid times in Dutch Surinam between 1765-1779 when sugar was king. Told through the eyes of two Jewish step sisters, Eliza and Sarith, descendants of the settlers of 'New Jerusalem of the River' now known today as Jodensvanne. The Cost of Sugar is a frank expose of the tragic toll on the lives of colonists and slaves alike.

TouchDevelop Aug 11 2022 "The book is great! It's clear and easy to read, with loads of examples that showed my students what to do." -- Larry Snyder, Emeritus Professor, University of Washington, Department of Computer Science and Engineering
"Having the TouchDevelop book available made our events so much easier. Students could figure things out for themselves with help from the book." -- Jennifer Marsman, Microsoft Principal Developer Evangelist
Mobile devices such as smartphones and tablets are set to become the main computers that virtually all people will own and carry with them at all times. And yet, mobile devices are not yet used for all computing tasks. A project at Microsoft Research was created to answer a simple question: "It is possible to create interesting apps directly on a smartphone or tablet, without using a separate PC or a keyboard?" The result is TouchDevelop, a programming environment that runs on all modern mobile devices such as Windows Phone, iPhone, iPad, Android phones and tablets, and also on PCs and Macs. This book walks you through all of the screens of the TouchDevelop app, and it points out similarities and differences of the TouchDevelop language compared to other programming languages. For users, the book can serve as a handy reference next to the phone. The book systematically addresses all programming language constructs, starting from the very basic constructs such as variables and loops. The book also explores many of the phone sensors and data sources which make creating apps for mobile devices so rewarding. If you are new to programming with TouchDevelop, or if you have not yet worked on touchscreen devices, we suggest that you read the book starting from Chapter 1. If you are already familiar with the basic paradigm of the TouchDevelop programming environment, then feel free to jump ahead to the later chapters that address particular topic areas. This book is written from the perspective of a person developing their code using a web browser. The TouchDevelop Web App runs in many modern browsers on many different devices including smartphones and tablets, Macs, PC. All screenshots and navigation instructions refer to the TouchDevelop Web App running in a browser. For Windows Phone, there is a dedicated TouchDevelop app in the Windows Phone Store which gives access to many more sensors and data sources. Starting with the TouchDevelop app v3.0 for Windows Phone 8, the phone app will share the same look and navigation structure and all features of the Web App. What you will learn
The little tricks to programming on your mobile devices and for a mobile device
The scripting language and cloud-based ecosystem
Using cameras, video and audio, and other sensors such as a microphone, accelerometer, compass, and gyroscope
Access to the web, authorized access to web services
How to write simple games using a built-in physics engine
Who this book is for
This programming language was written for people who wish to be able to create apps from their phone. This scenario is particularly appealing to enthusiastic end-users who own mobile devices and students, who are the target audience of this book.
Table of Contents
Chapter 1 Introduction to TouchDevelop
Chapter 2 The Scripting Language

Heavy Metals in Soils May 16 2020 This third edition of the book has been completely re-written, providing a wider scope and enhanced coverage. It covers the general principles of the natural occurrence, pollution sources, chemical analysis, soil chemical behaviour and soil-plant-animal relationships of heavy metals and metalloids, followed by a detailed coverage of 21 individual elements, including: antimony, arsenic, barium, cadmium, chromium, cobalt, copper, gold, lead, manganese, mercury, molybdenum, nickel, selenium, silver, thallium, tin, tungsten, uranium, vanadium and zinc. The book is highly relevant for those involved in environmental science, soil science, geochemistry, agronomy, environmental health, and environmental engineering, including specialists responsible for the management and clean-up of contaminated land.

Cryptocurrencies and Blockchain Technology Nov 02 2021 With cryptocurrencies like Bitcoin on the rise, many wonder if these digital currencies could be the exchange medium of the future, but what are cryptocurrencies and the blockchain technology that facilitates them? Blockchain technology involves linking a series of digital records through cryptography without the use of a centralized server, which when applied to asset exchange creates cryptocurrencies. However, there are various concerns about the ability to regulate cryptocurrencies, their stability, and whether they can be applied on a global

scale. This volume enables readers to better understand these new technologies and the controversies surrounding them.

Ending Terrorism Jul 18 2020 Like all other terrorist movements, al-Qaeda will end. While it has traits that exploit and reflect the current international context, it is not utterly without precedent: some aspects of al-Qaeda are unusual, but many are not. Terrorist groups end according to recognisable patterns that have persisted for centuries, and they reflect, among other factors, the counter-terrorist policies taken against them. It makes sense to formulate those policies with a specific image of an end in mind. Understanding how terrorism ends is the best way to avoid being manipulated by the tactic. There is vast historical experience with the decline and ending of terrorist campaigns, yet few policymakers are familiar with it. This paper first explains five typical strategies of terrorism and why Western thinkers fail to grasp them. It then describes historical patterns in ending terrorism to suggest how insights from that history can lay a foundation for more effective counter-strategies. Finally, it extracts policy prescriptions specifically relevant to ending the campaign of al-Qaeda and its associates, moving towards a post-al-Qaeda world.

Heaven Help Helen Sloane Mar 06 2022 Helen Sloane is in for one interesting year. Written as a series of journal entries, *Heaven Help Helen Sloane* is refreshingly honest, poignant, and often hilarious, documenting—in Helen's own words—the daily struggles a young Christian woman must face. Helen's new job as a social worker keeps her busy all day in a whirlwind of case notes and court papers, and at home she's a house group leader for Frenton-on-Sea's New Wave Christian Fellowship. She loves her church but she struggles with faith and doubt, exposed to the religious extremes of both hyper-spiritual friends and her New Age mom. And with her busy schedule, Helen also struggles to make time for love. Still, she finds two men in her life: a handsome worship leader who might not be as godly as he seems, and a former Christian turned Bohemian bad boy. Can she keep her faith strong in the midst of a chaotic life? Jeff Lucas answers this question through the joy, tragedy, love, and heartbreak revealed in the pages of Helen Sloane's journal.

Radiology Illustrated: Pediatric Radiology Jul 10 2022 This case-based atlas presents images depicting the findings typically observed when imaging a variety of common and uncommon diseases in the pediatric age group. The cases are organized according to anatomic region, covering disorders of the brain, spinal cord, head and neck, chest, cardiovascular system, gastrointestinal system, genitourinary system, and musculoskeletal system. Cases are presented in a form resembling teaching files, and the images are accompanied by concise informative text. The goal is to provide a diagnostic reference suitable for use in daily routine by both practicing radiologists and radiology residents or fellows. The atlas will also serve as a teaching aide and a study resource, and will offer pediatricians and surgeons guidance on the clinical applications of pediatric imaging.

South Asian Sufis Nov 21 2020 Often described as the soul of Islam, Sufism is one of the most interesting yet least known facet of this global religion. Sufism is the softer more inclusive and mystical form of Islam. Although militant Islamists dominate the headlines, the Sufi ideal has captured the imagination of many. Nowhere in the world is the handprint of Sufism more observable than South Asia, which has the largest Muslim population of the world, but also the greatest concentration of Sufis. This book examines active Sufi communities in Pakistan, India, and Bangladesh that shed light on the devotion, and deviation, and destiny of Sufism in South Asia. Drawn from extensive work by indigenous and international scholars, this ethnographical study explores the impact of Iran on the development of Sufi thought and practice further east, and also discusses Sufism in diaspora in such contexts as the UK and North America and Iran's influence on South Asian Sufism.

Handbook of Seed Physiology Mar 26 2021 The latest findings in seed physiology—discussed as they relate to agricultural problems! Presenting the latest findings in the area of seed physiology as well as the practical applications of that knowledge in the field, the *Handbook of Seed Physiology: Applications to Agriculture* provides a comprehensive view of seed biology and its role in crop performance. Key topics include seed germination, crop emergence, crop establishment, dormancy, preharvest sprouting, plant hormones, abscisic and gibberellic acids, weeds, grain quality, oil crops, and malting quality. Abundant case studies provide information of value to researchers, students, and professionals in the fields of seed science, field crop research, crop science, agronomy, and seed technology. The *Handbook of Seed Physiology* discusses vital topics which serve as the basis for the development of techniques and processes to improve seed performance and crop yield. In this text, you will explore: the effect of the soil physical environment on seed germination the roles of physiology, genetics, and environment in the inception, maintenance, and termination of dormancy the relationship between the termination of dormancy and the synthesis and signaling of gibberellins and abscisic acid mechanisms of orthodox seed deterioration and approaches for repair of seed damage characteristics, behavior, and mechanisms of desiccation tolerance in recalcitrant seeds the role of seed moisture in free radical assaults on seeds and the protective function of raffinose oligosaccharides the production of free radicals and their effect on lipids and lipid peroxidation components of grain quality in oil crops and factors influencing them structural components and genotypic and environmental factors affecting barley malting quality In addition to the latest scientific information in the area of seed physiology, this text provides insights into practical applications of that knowledge through the description of: screening protocols for germination tolerance to temperature and water stress methods for improving seed performance in the field techniques for controlling preharvest sprouting of cereals breeding and production strategies for improving grain quality population-based threshold models in the prediction of germination and emergence patterns modeling changes in dormancy to predict weed emergence Extensive reference sections

accompanying each chapter include both foundation texts and current research. Principles and concepts discussed in the text are elaborated upon through equations, figures, and tables covering such topics as water and soil thermal regimes; seed water potential; temperature and water effects on germination; free radical attack; and molecular structures. Exploring concepts, techniques, and processes related to seed germination and crop establishment, this comprehensive, one-of-a-kind reference is an indispensable tool for seed scientists and agricultural professionals. Add it to your library today and put seed physiology research to work in establishing high-quality [next crops](#)!

[Epic and Sediton](#) Mar 18 2023 Iran's national epic, the Shahnameh of Ferdowsi, has traditionally been regarded by both Persians and Westerners as a poem celebrating the central role of monarchy in Persian history. In this groundbreaking book, Dick Davis argues that the poem is far more than a patriotic chronicle of kingly deeds. Rather, it is a subtle and highly ambiguous discussion of authority, and far from being a celebration of monarchy, its most famous episodes and heroes amount to a radical critique of the institution. Davis demonstrates that the public world of kingly authority is shadowed in the poem by a series of tragic father-son relationships, and that in both the royal and familial spheres, authority figures are invariably presented as morally inferior to those whom they govern. The Shahnameh's complex aesthetic structure and its tragic resolution of problems of authority and hierarchy make it an artistic artifact able to take its rightful place beside the major masterpieces of world literature.

[Manley's Technology of Biscuits, Crackers and Cookies](#) Feb 22 2021 Manley's Technology of Biscuits, Crackers and Cookies is widely regarded as the standard work in its field. Part one covers management issues such as HACCP, quality control, process control and product development. Part two deals with the selection of raw materials and ingredients. The range and types of biscuits is covered in part three, while part four covers the main production processes and equipment, from bulk handling and metering of ingredients to packaging, storage and waste management. Eight expert authors have joined Duncan Manley in extensively updating and expanding the book, which is now some 25% longer than the previous edition. Part one now includes a new chapter on sustainability in the biscuit industry and the discussion of process and efficiency control is more detailed. In part two the information on wheat flour has been extensively revised to reflect recent developments and there are entirely new chapters on fats and oils and packaging materials. Photographs of the major types of biscuits now illustrate chapters in part three, which also includes a newly-composed chapter on the position of biscuits in nutrition. Finally, part four has been comprehensively reviewed and revised with the assistance of an author from a major machinery manufacturer. With its distinguished editor and team of expert contributors this new edition consolidates the position of Manley's Technology of Biscuits, Crackers and Cookies as the standard reference work in the industry. Widely regarded as the standard work in its field Covers management issues such as HACCP, quality control, process control and product development Deals with the selection of raw materials and ingredients
