Colonialism and Modern Social Theory Sep 20 2020 Modern society emerged in the context of European colonialism and empire. So,

too, did a distinctively modern social theory, laying the basis for most social theorising ever since. Yet colonialism and empire are absent from the conceptual understandings of modern society, which are organised instead around ideas of nation state and capitalist economy. Gurminder K. Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed. Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel, the authors go on to focus on the work of Tocqueville, Marx, Weber, Durkheim and Du Bois. As well as unpicking critical omissions and misrepresentations, the chapters discuss the places where colonialism is acknowledged and discussed – albeit inadequately – by these founding figures; and we come to see what this fresh rereading has to offer and why it matters. This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought, its limitations, and its wider possibilities.

Aging Easy May 17 2020 People often ask, "Why Seniors?" My response is always the same, "Why NOT Seniors?" I have always had an unwavering desire to serve and protect the elderly. Even as a child, when given the opportunity to choose, my choice was always to be in the company of the "older folk". I have found their wisdom and conversation to be priceless. For Seniors, living independently during their golden years can be an enjoyable and rewarding time of life. Most desire to maintain their dignity, quality of life, and independence while living at home. Sounds simple enough. However, what I have found to be true, both professionally and personally, is that things aren't always so simple. As a very young adult, I can recall experiencing the loss of my maternal great-grandmother. Having not been afforded the knowledge that I currently possess, watching her cognitive decline over a 5-year span was painful. On the

day of her funeral, I can still recall feeling as though I'd lost my grandmother several years prior. A better understanding of her diagnosis would have added more quality to the time we shared. Experiencing the loss of my paternal grandmother was another taxing experience. Though her diagnosis did not rob her of her cognitive ability, Cancer certainly took everything else. During this experience, my knowledge base for the situation was greater. Therefore, medical attention, placement, and long-term planning were much easier. Most recently, the loss of my maternal grandfather was a challenge that tugged on every ounce of knowledge, experience, and emotion possible. Within a 7-month period, I watched my grandfather drift from what most called, "The World's Oldest Teenager" to being completely bedridden and dependent on others for care. Heart attack, stroke, cancer, kidney failure, dialysis, feeding tube, tracheostomy, cardiac arrest, and resuscitation were only among the most significant challenges that he endured. Fortunately, my family and I were able to make "informed" decisions to assure that he maintained quality of life. Working in Senior care for over 20 years, I have been exposed to all aspects. I have consoled weeping widows. I have found placement for seniors who have no family. I have advocated for seniors who were mistreated by family and/or professionals. I have found assistance for seniors that wanted to remain at home but needed a little help. I have helped family to understand that Hospice is actually very beneficial and not death sentence. I have hired good caregivers. I have terminated poor caregivers. I have also provided Psychotherapy for seniors who suffer from depression and anxiety. In short, Seniors and their families experience the same issues as those in other populations. For me, it is a God-given charge that I do all that is within my power to assure that this population is provided with the supports needed to be safe, healthy, and happy.

Stabilization and Human Security in UN Peace Operations Jan 05 2022 UN peace operations are increasingly asked to pursue stabilization mandates with lofty expectations of being able to stabilize conflict zones, achieve national reconciliation, and rebuild state legitimacy. This book investigates the relationship between UN stabilization mandates and the concept of 'human security'. The book is divided into three parts. Part I outlines the emergence of stabilization and other trends in peacekeeping practice and outlines an analytical framework of human security. Part II applies the analytical framework to case studies of MINUSMA, MINUSCA, and UNMISS examining issues, such as human rights, empowerment, protection, and vulnerability. In Part III the book draws out several concerns that arise from stabilization mandates, including the militarisation of UN peace operations and the consequences under international humanitarian law, the risks of close cooperation with the host state and engagement in counter-terror activities, and the potential clash between peacebuilding activities and militarisation. The book will be a valuable resource for academics, policymakers and practitioners working on UN peacekeeping generally, and those specifically looking at stabilization, from the perspective of international relations, international law, peace and conflict studies, security studies and human rights.

Know Your Price Sep 01 2021 Changing perceptions about the worth of African Americans and their communities Know Your Price establishes new means of determining value of Black communities. The deliberate devaluation of Blacks and their communities, stemming from America's centuries-old history of slavery, racism, and other state-sanctioned policies like redlining have tangible, far-reaching, and negative economic and social impacts. Rejecting policies shaped by flawed perspectives, the book gives fresh insights on these impacts and provides a new value paradigm to limit them. In the book, noted educator, journalist, and scholar Andre Perry takes readers on a guided tour of five Black-majority cities whose assets and strengths are undervalued. Perry begins the tour in his hometown of Wilksburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Perry gives an overview of Black-majority cities and spotlights four where he has a deep connection to--Detroit, New Orleans, Birmingham and Washington, D.C.--providing an intimate look at the assets residents should demand greater value from. Know Your Price demonstrates through rigorous research and thorough analysis the worth of Black people's intrinsic strengths, real property, and traditional institutions. All of these assets are means of empowerment, as Perry argues for shifting away from simplified notions of equality and moving towards maximizing equity.

An Integrated Approach to Home Security and Safety Systems Jun 22 2023 This book provides an integrated solution for security and safety in the home, covering both assistance in health monitoring and safety from strangers/intruders who want to enter the home with harmful intentions. It defines a system whereby recognition of a person/stranger at the door is done using three modules: Face Recognition, Voice Recognition and Similarity Index. These three modules are taken together to provide a percentage likelihood that the individual is in the "known" or "unknown" category. The system can also continuously monitor the health parameters of a vulnerable person living alone at home and aid them in calling for help in an emergency. The authors have analyzed a number of existing biometric techniques to provide security for an individual living alone at home. These biometric techniques have been tested using MATLAB® image processing and signal processing toolboxes, and results have been calculated on the basis of recognition rate. A major contribution in providing security is a hybrid algorithm proposed by the author named PICA, which combines features of both PCA (Principle Component Analysis) and ICA (Independent Component Analysis) algorithms. This hybrid approach gives better performance recognition than either system alone. The second proposed hybrid algorithm for voice recognition is named as a MFRASTA algorithm by combining features of MFCC (Mel Frequency Cepstral Coefficient) and RASTA-PLP (RelAtive SpecTrA-Perceptual Linear Prediction) algorithm. After performing experiments, results are collected on the basis of recognition rate. The authors have also proposed a third technique named as a Similarity Index to provide trust-based security for an individual. This technique is text independent in which a person is recognized by pronunciation, frequency, tone, pitch, etc., irrespective of the content spoken by the person. By combining these three techniques, a high recognition rate is provided to the person at the door and high security to the individual living independently at home. In the final contribution, the authors have proposed a fingertip-based application for health monitoring by using the concept of sensors. This application is developed using iPhone 6's camera. When a person puts their fingertip on a camera lens, with the help of brightness of the skin, the person's heartbeat will be monitored. This is possible even with a low-quality camera. In case of any emergency, text messages will be sent to the family members of the individual living alone by using 3G Dongle and MATLAB tool. Results show that the proposed work outperforms all the existing techniques used in face recognition, voice recognition, and health monitoring alone.

International Relations and Security in the Digital Age Mar 07 2022 This book examines the impact of the information revolution on international and domestic security, attempting to remedy both the lack of theoretically informed analysis of information security and the US-centric tendency in the existing literature. *International Relations and Security in the Digital Age* covers a range of topics, including: critical infrastructure protection, privacy issues, international cooperation, cyber terrorism, and security policy. It aims to analyze the impact of the information revolution on international and domestic security; examine what existing international relations theories can say about this challenge; and discuss how international relations theory can be developed to better meet this challenge. The analysis suggests that Liberalism's focus on pluralism, interdependence and globalization, Constructivism's emphasis on language, symbols and images (including 'virtuality'), and some elements of Realist strategic studies (on the specific topic of information

warfare) contribute to a better understanding of digital age security. This book will be of interest to students of security studies, globalization, international relations, and politics and technology.

Riding for Deliveroo Apr 08 2022 What is life like for workers in the gig economy? Is it a paradise of flexibility and individual freedom? Or is it a world of exploitation and conflict? Callum Cant took a job with one of the most prominent platforms, Deliveroo, to find out. His vivid account of the reality is grim. Workers are being tyrannised by algorithms and exploited for the profit of the few – but they are not taking it lying down. Cant reveals a transnational network of encrypted chats and informal groups which have given birth to a wave of strikes and protests. Far from being atomised individuals helpless in the face of massive tech companies, workers are tearing up the rulebook and taking back control. New developments in the workplace are combining to produce an explosive subterranean class struggle – where the stakes are high, and the risks are higher. *Riding for Deliveroo* is the first portrait of a new generation of working class militants. Its mixture of compelling first-hand testimony and engaging analysis is essential for anyone wishing to understand class struggle in platform capitalism.

The Far Right Today Nov 03 2021 The far right is back with a vengeance. After several decades at the political margins, far-right politics has again taken center stage. Three of the world's largest democracies – Brazil, India, and the United States – now have a radical right leader, while far-right parties continue to increase their profile and support within Europe. In this timely book, leading global expert on political extremism Cas Mudde provides a concise overview of the fourth wave of postwar far-right politics, exploring

its history, ideology, organization, causes, and consequences, as well as the responses available to civil society, party, and state actors to challenge its ideas and influence. What defines this current far-right renaissance, Mudde argues, is its mainstreaming and normalization within the contemporary political landscape. Challenging orthodox thinking on the relationship between conventional and far-right politics, Mudde offers a complex and insightful picture of one of the key political challenges of our time.

Chinese Security Policy Jan 25 2021 This volume provides a coherent and comprehensive understanding of Chinese security policy, comprising essays written by one of America's leading scholars. Chinese Security Policy covers such fundamental areas as the role of international structure in state behavior, the use of force in international politics (including deterrence, coercive diplomacy, and war), and the sources of great-power conflict and cooperation and balance of power politics, with a recent focus on international power transitions. The research integrates the realist literature with key issues in Chinese foreign policy, thereby placing China's behaviour in the larger context of the international political system. Within this framework, Chinese Security Policy considers the importance of domestic politics and leadership in Chinese policy making. This book examines how Chinese strategic vulnerability since U.S.-China rapprochement in the early 1970s has compelled Beijing to seek cooperation with the United States and to avoid U.S.-China conflict over Taiwan. It also addresses the implications of the rise of China for the security of both United States and of Chinese neighbors in East Asia, and considers the implications of China's rise for the regional balance of power and the emerging twenty-first century East Asian security order. This book will be of great interest to all students of Chinese Security and Foreign Policy, Chinese and Asian Politics, US foreign policy and International Security in general.

The Effect Oct 02 2021 *The Effect: An Introduction to Research Design and Causality* is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams. Concepts are demonstrated with a heavy emphasis on graphical intuition and the question of what we do to data. When we "add a control variable" what does that actually do? Key Features:

- Extensive code examples in R, Stata, and Python
- Chapters on overlooked topics in econometrics classes: heterogeneous treatment effects, simulation and power analysis, new cutting-edge methods, and uncomfortable ignored assumptions
- An easy-to-read conversational tone
- Up-to-date coverage of methods with fast-moving literatures like difference-in-differences
