You Should Come With Me Now Aug 21 2023 M. John Harrison is a cartographer of the liminal. His work sits at the boundaries between genres – horror and science fiction, fantasy and travel writing – just as his characters occupy the no man’s land between the spatial and the spiritual. Here, in his first collection of short fiction for over 15 years, we see the master of the New Wave present unsettling visions of contemporary urban Britain, as well as supernatural parodies of the wider, political landscape. From gelatinous aliens taking over the world’s financial capitals, to the middle-aged man escaping the pressures of fatherhood by going missing in his own house... these are weird stories for weird times. ‘M. John Harrison’s slippery, subversive stories mix the eerie and familiar into beguiling, alarming marvels. No one writes quite like him; no one I can think of writes such flawless sentences, or uses them to such disorientating effect.’ – Olivia Laing, author of *The Lonely City* ‘These stories map a rediscovered fictional hinterland, one tucked behind the glossier edifices of modernity and genre with views down alleyways into pubs and flats where Patrick Hamilton glares balefully at J. G. Ballard.’ – Will Eaves, author of *This is Paradise* ‘M. John Harrison moves elegantly, passionately, from genre to genre, his prose lucent and wise, his stories published as SF or as fantasy, as horror or as mainstream fiction. In each playing field, he wins awards, and makes it look so easy. His prose is deceptively simple, each word considered and placed where it can sink deepest and do the most damage.’ – Neil Gaiman, author of *American Gods* ‘With an austere and deeply moving humanism, M. John Harrison proves what only those crippled by respectability still doubt – that science fiction can be literature, of the very greatest kind.’ – China Miéville, author of *Perdido Street Station*

He That Should Come Jan 14 2023 In this first of her plays for religious broadcasting, a nativity play, Dorothy L. Sayers wanted to convince listeners of the truth that Christ was born into our deeply problematic world, in his case, in territory overrun by an army of occupation. Although framed as it were by the voices of the three 'wise men' asking whether the birth of a particular child could possibly fulfil their desires, the focus of the play is on the conflict of opinion (about roads, taxes, and so forth) expressed by those in the courtyard of the inn at Bethlehem. Joseph is given a most significant role, and it is the shepherds whose gifts are presented when the Holy Family is revealed.

Women Should Come With a Manual! Apr 17 2023 We've all been in bookstores and walked by rows of dating and selfhelp books meant to guide us along in the wild world of relationships. There have been volumes written on the theory, psychology and in-depth evaluation of the dating dance, but none provide a complete step-by-step system of the process. Every device you buy comes with a manual. Yet when it comes to one of the most important things in life-our dating relationships-many of us are left clueless. This book is the how-to manual that would be included if a relationship came in a box on a store shelf. It will guide you along the path of finding, snagging and retaining the perfect partner. It is harsh and sometimes prejudiced, but always insightful and honest. If something strikes a little close to home, deal with it. Truth hurts. But recognizing it will help.

Should Increased Regulation of Bank Risk-Taking Come from Regulators Or from the Market? Jun 19 2023 The heavy losses in bank asset portfolios do not reflect an inherent failure of markets to monitor risk adequately but rather the perverse incentives of the financial safety net to excessive risk-taking. The unsustainable rise in house prices and their subsequent sharp decline derived from the combination of a public policy to expand home ownership to unrealistic levels and from a financial safety net that encouraged excessive risk-taking by banks. Charts and tables.

Good Booty Oct 19 2020 NPR Best Books of 2017 In this sweeping history of popular music in the United States, NPR's acclaimed music critic examines how popular music shapes fundamental American ideas and beliefs, allowing us to communicate difficult emotions and truths about our most fraught social issues, most notably sex and race. In *Good Booty*, Ann Powers explores how popular music became America's primary erotic art form. Powers takes us from nineteenth-century New Orleans through dance-crazed Jazz Age New York to the teen scream years of mid-twentieth century rock-and-roll to the cutting-edge adventures of today's web-based pop stars. Drawing on her deep knowledge and insights on gender and sexuality, Powers recounts stories of forbidden lovers, wild shimmy-shakers, orgasmic gospel singers, countercultural perverts, soft-rock sensitivos, punk Puritans, and the cyborg known as Britney Spears to illuminate how eroticism—not merely sex, but love, bodily freedom, and liberating joy—became entwined within the rhythms and melodies of American song. This cohesion, she reveals, touches the heart of America's anxieties and hopes about race, feminism, marriage, youth, and freedom. In a survey that spans more than a century of music, Powers both heralds little known artists such as Florence Mills, a contemporary of Josephine Baker, and gospel queen Dorothy Love Coates, and sheds new light on artists we think we know well, from the Beatles and Jim Morrison to Madonna and Beyoncé. In telling the history of how American popular music and sexuality intersect—a magnum opus over two decades in the making—Powers offers new insights into our nation psyche and our soul.

I Should Be Burnt Out By Now... So How Come I'm Not? Aug 09 2022 "An uplifting read for anyone with a hectic and stressful life, which is, let's face it, all of us." — Neil Bradford, Managing Director, Forrester North America There has been a great deal of talk during the past two decades about the serious problem of stress and burnout. Most of the discussion focuses on the pessimistic side of the story. The underlying assumption is that we are in a fierce struggle, one that we frequently lose. Burnout is presented as almost inevitable, and solutions focusing on recovery are offered. But there is another, more optimistic side to the story. What about the people who endure tough times with courage and grace, or bounce back from crises with renewed energy when logic tells you the situation should have left them depleted and discouraged? For all the talk about burnout, the fact is that the majority of people spend most of their lives coping amazingly well. Being good at not burning out is a skill more than a genetic personality trait. Just like any skill, you have to work at it. You can learn to manage your behaviour and your thinking, but it takes discipline and practice to do it. There are thousands of success stories every day about people who continue to survive and make the best of tough times. So how do they do it? What are the real stories of how individuals survive and thrive during uncertain and difficult times? And what is their advice on preventing burnout? This book answers these questions.

Greater Power Should Come with Greater Accountability Jul 28 2021 In light of Big Data processing, which is becoming more automated and reliant on data-driven decision-making (eg via the use of AI), and the trend of outsourcing any (especially complex) data processing task, the

distinction between the roles and responsibilities of data controllers and processors has become less clear. This provocation paper provides a brief discussion of this issue for areas such as smart city policy making.

If War Should Come Feb 15 2023 When Britain declared war on Nazi Germany in 1939, it did not come as a surprise. Hitler's remilitarisation and repudiation of the Treaty of Versailles sounded a warning bell for what was to follow. Philip MacDougall here examines what steps the British Government took to prepare the country for the war they knew was coming. Focusing on the front-line counties of Hampshire, Sussex and Kent, he looks at how they learnt lessons from the effect of war on civilian populations during previous conflicts; the public perception of war on the home front as evidenced by Mass Observation; plans for the emergency services, food supplies, the ARP, dispersal of industry and government, and control of enemy aliens; and how effective these preparations were after the outbreak of war. This is a must-read book for anyone interested in British history during the late thirties and early forties, and for local historians in these three counties.
