Change Your Schedule, Change Your Life Aug 27 2023 An eye-opening handbook from a leading Ayurvedic physician that blends cutting-edge science on "clock genes" with ancient eastern wisdom to help us understand how to harness the power of chronobiology to effortlessly lose weight, sleep better, exercise

stronger, reduce stress, and boost our wellbeing. "It's not you, it's your schedule." Does it sound like magic? It's not. We've all heard of circadian rhythms—those biological processes that give us jet lag and make us night owls or early birds. But few of us know just how profoundly these diurnal patterns affect our overall health. Bad habits like skipping meals, squeezing in workouts when it's convenient, working late into the night to maximize productivity and then trying to "catch up" on sleep during the weekend disrupt our natural cycles. A growing body of research on chronobiology reveals just how sensitive the human body is to these rhythms all the way down to the genetic level. Our "clock genes" control more than we realize, and small changes can make the difference between battling our bodies, and effortlessly managing weight, sleep, stress, inflammation, and more. Marrying ancient Ayurvedic wisdom with the latest scientific research, Dr. Suhas Kshirsagar's holistic step-by-step 30-day plan gives you the tools—and the schedule—you need to transform your life. With diagnostic quizzes to determine your specific mind-body type, you will learn to adapt your schedule for effortless wellness for life.

On Becoming Baby Wise Jun 13 2022 The infant management concepts presented in this book have found favor with over two million parents and twice as many contented babies. On Becoming Babywise brings hope to the tired and bewildered parents looking for an alternative to sleepless nights and fussy babies. The Babywise Parent Directed Feeding concept has enough structure to bring security and order to your baby's world, yet enough flexibility to give mom freedom to respond to any need at any time. It teaches parents how to lovingly guide their baby's day rather than be guided or enslaved to the infant's unknown needs. The information contained within On Becoming Babywise is loaded with success. Comprehensive breast-feeding follow-up surveys spanning three countries, of mothers using the PDF method verify that as a result of the PDF concepts, 88% breast-feed, compared to the national average of only 54% (from the National Center for Health Statistics). Of these breast-feeding mothers, 80% of them breast-feed exclusively without a formula complement. And while 70% of our mothers are still breast-feeding after six months, the national average encourage to follow demand feeding without any

guidelines is only 20%. The mean average time of breast-feeding for PDF moms is 33 1/2 weeks, well above the national average. Over 50% of PDF mothers extend their breast-feeding toward and well into the first year. Added to these statistics is another critical factor. The average breast-fed PDF baby sleeps continuously through night seven to eight hours between weeks seven and nine. Healthy sleep in infants is analogous to healthy growth and development. Find out for yourself why a world of parents and pediatricians utilize the concepts found in *On Becoming Babywise*.
